**Field and Service Robotics** Kazuya Yoshida,Satoshi Tadokoro,2013-12-30 FSR, the International Conference on Field and Service Robotics, is the leading single track conference of robotics for field and service applications. This book presents the results of FSR2012, the eighth conference of Field and Service Robotics, which was originally planned for 2011 with the venue of Matsushima in Tohoku region of Japan. However, on March 11, 2011, a magnitude M9.0 earthquake occurred off the Pacific coast of Tohoku, and a large-scale disaster was caused by the Tsunami which resulted, therefore the conference was postponed by one year to July, 2012. In fact, this earthquake raised issues concerning the contribution of field and service robotics technology to emergency scenarios. A number of precious lessons were learned from operation of robots in the resulting, very real and challenging, disaster environments. Up-to-date study on disaster response, relief and recovery was then featured in the conference. This book offers 43 papers on a broad range of topics including: Disaster Response, Service/Entertainment Robots, Inspection/Maintenance Robots, Mobile Robot Navigation, Agricultural Robots, Robots for Excavation, Planetary Exploration, Large Area Mapping, SLAM for Outdoor Robots, and Elemental Technology for Mobile Robots.

This new revised edition is a step-by-step guide to serving children and youth with disabilities as well as the family members, caregivers, and other people involved in their lives. The authors show how staff can enable full use of the library's resources by integrating the methods of educators, medical and psychological therapists, social workers, librarians, parents, and other caregivers. Widening the scope to address the needs of teens as well as preschool and school-age children, this edition also discusses the needs of Spanish-speaking children with disabilities and their families, looking at cultural competency as well as Spanish-language resources. Enhanced with checklists, stories based on real experiences, descriptions of model programs and resources, and an overview of appropriate internet sites and services, this how-to gives thorough consideration to Partnering and collaborating with parents and other professionals Developing special collections and resources Assessing competencies and skills Principles underlying family-centered services and resource-based practices The interrelationship of early intervention, special education, and library service This manual will prove valuable not only to children's services librarians, outreach librarians, and library administrators, but also early intervention and family support professionals, early childhood and special educators, childcare workers, daycare and after school program providers, and policymakers.
