*Paisajes de antropología urbana* María Cátedra,2012-10-03 Este libro explora diversos paisajes de la ciudad de Ávila, desde la perspectiva de la antropología social y cultural. A través del recorrido en tiempo y espacio de diferentes aspectos culturales, e inesperados ángulos, se iluminan temas urbanos fundamentales: las relaciones del campo y la ciudad, la estratificación urbana, la representación de la ciudad interna y externamente, y su recreación simbólica. Aunque algunos de estos ángulos -las procesiones de Semana Santa, el culto de la Virgen de Sonsoles o la Virgen de las Vacas- aparentemente aluden a la corte celestial, este libro trata sobre la corte terrenal, sobre lo que los santos dicen de quien los venera. A través de los distintos capítulos se ofrece una mirada del conjunto de la ciudad y de sus barrios, la pugna entre el centro y la periferia por ganar el espacio cualitativo de la ciudad, el tema del poder y la representación, grupos, conflictos y oposiciones, definición desde dentro y desde fuera de lo que es la ciudad y su presentación al exterior. este texto trata, en definitiva, de mostrar cuánto de construcción simbólica tienen las ciudades.

Benefactives and Malefactives Fernando Zúñiga,Seppo Kittilä,2010-04-14 Benefactives are constructions used to express that a state of affairs holds to someone's advantage. The same construction sometimes also serves as a malefactive, whose meanings are generally not a simple mirror image of the benefactive. Benefactive constructions cover a wide range of phenomena: malefactive passives, general and specialized

benefactive cases and adpositions, serial verb constructions and converbal constructions (including e.g. verbs of giving and taking), benefactive applicatives, and other morphosyntactic strategies. The present book is the first collection of its kind to be published on this topic. It includes both typological surveys and in-depth descriptive studies, exploring both the morphosyntactic properties and the semantic nuances of phenomena ranging from the familiar English double-object construction and the Japanese adversative passive to comparable phenomena found in lesser-known languages of Africa, Asia, and the Americas. The book will appeal to typologists and linguists interested in linguistic diversity and it will also be a useful reference work for linguists working on language description.

*Creoles, their Substrates, and Language Typology* Claire Lefebvre, 2011-02-17 Since creole languages draw their properties from both their substrate and superstrate sources, the typological classification of creoles has long been a major issue for creolists, typologists, and linguists in general. Several contradictory proposals have been put forward in the literature. For example, creole languages typologically pair with their superstrate languages (Chaudenson 2003), with their substrate languages (Lefebvre 1998), or even, creole languages are alike (Bickerton 1984) such that they constitute a “definable typological class” (McWhorter 1998). This book contains 25 chapters bearing on detailed comparisons of some 30 creoles and their substrate languages. As the substrate languages of these creoles are typologically different, the detailed investigation of substrate features in the creoles leads to a particular answer to the question of how creoles should be classified typologically. The bulk of the data show that creoles reproduce the typological features of their substrate languages. This argues that creoles cannot be claimed to constitute a definable typological

class.

*Converging Worlds* Louise A. Breen, 2013-06-17 Providing a survey of colonial American history both regionally broad and Atlantic in coverage, *Converging Worlds* presents the most recent research in an accessible manner for undergraduate students. With chapters written by top-notch scholars, *Converging Worlds* is unique in providing not only a comprehensive chronological approach to colonial history with attention to thematic details, but a window into the relevant historiography. Each historian also selected several documents to accompany their chapter, found in the companion primary source reader. *Converging Worlds: Communities and Cultures in Colonial America* includes: timelines tailored for every chapter chapter summaries discussion questions lists of further reading, introducing students to specialist literature fifty illustrations. Key topics discussed include: French, Spanish, and Native American experiences regional areas such as the Midwest and Southwest religion including missions, witchcraft, and Protestants the experience of women and families. With its synthesis of both broad time periods and specific themes, *Converging Worlds* is ideal for students of the colonial period, and provides a fascinating glimpse into the diverse foundations of America. *Translation and Linguistic Hybridity* Susanne Klinger, 2014-12-05 This volume outlines a new approach to the study of linguistic hybridity and its translation in cross-cultural writing. By building on concepts from narratology, cognitive poetics, stylistics, and film studies, it explores how linguistic hybridity contributes to the reader's construction of the textual agents' world-view and how it can be exploited in

order to encourage the reader to empathise with one world-view rather than another and, consequently, how translation shifts in linguistic hybridity can affect the world-view that the reader constructs. Linguistic hybridity is a hallmark of cross-cultural texts such as postcolonial, migrant and travel writing as source and target language come into contact not only during the process of writing these texts, but also often in the (fictional or non-fictional) story-world. Hence, translation is frequently not only the medium, but also the object of representation. By focussing on the relation between medium and object of representation, the book complements existing research that so far has neglected this aspect. The book thus not only contributes to current scholarly debates – within and beyond the discipline of translation studies – concerned with cross-cultural writing and linguistic hybridity, but also adds to the growing body of translation studies research concerned with questions of voice and point of view.

*Causality I. A Theory of Energy, Time and Space* Ilija Baruk?i?, 2008-11-07 ----- Volume 1 (August 21th, 2010) ----- : This highly original book gives an exact insight into the philosophical, logical, mathematical and physical foundations of causality. Causality is designed to provide both, the new methodology for making causal inferences on the basis of (non-) experimental data and the underlying theory. The new mathematical tools for evaluating causal relationships from (non-) experimental data are presented in the simplest and most intelligible form. Causality is thus an excellent book for self study and a pragmatic help for researchers. Anyone who wishes to elucidate cause effect relationships from (non-) experimental data will find this book invaluable. The reader will enjoy to read and use this book. Finally, a unified mathematical and statistical model of causation is available.

**Accental Change and Language Contact** Joe Salmons,2003-08-29 The author presents an original proposal for a shared Celtic-Germanic accental system, which has fundamental implications for Proto-Germanic.

Interface Dynamics D. Berthe,D. Dowson,M. Godet,C.M. Taylor,1988-09-01 Many tribologists are today not only explicitly concerned with interface action but also with interface composition. This proceedings volume presents a timely review on topics ranging from interface dynamics to interface elimination, covering all factors such as contact stress fields, interface rheology, and boundary slip, that control the passage from formation to elimination. The volume contains 45 papers divided into 13 sessions, that were presented at the symposium.

**Ideophones** F. K. Erhard Voeltz,Christa Kilian-Hatz,2001-12-19 The present volume represents a selection of papers presented at the International Symposium on Ideophones held in January 1999 in St. Augustin, Germany. They center around the following hypotheses: Ideophones are universal; and constitute a grammatical category in all languages of the world; ideophones and similar words have a special dramaturgic function that differs from all other word classes: they simulate an event, an emotion, a perception through language. In addition to this unique function, a good number of formal parallels can be observed. The languages dealt with here display strikingly similar patterns of derivational processes involving ideophones. An equally widespread common feature is the introduction of ideophones via a verbum dicendi or complementizer. Another observation concerns the sound-symbolic behavior of ideophones. Thus the word formation of ideophones differs from other words in their tendency for

iconicity and sound-symbolism. Finally it is made clear that ideophones are part of spoken language — the language register, where gestures are used — rather than written language.

**Integral Bases for Affine Lie Algebras and Their Universal Enveloping Algebras** David Mitzman, 1985  
This work is a revised version of the author's Ph.D. thesis written under the supervision of J. Lepowsky at Rutgers University in 1983.

Asymmetry in Grammar Anna Maria Di Sciullo, 2003-03-20 *Asymmetry in Grammar: Morphology, Phonology and Acquisition* presents evidence that asymmetry, as a property of linguistic relations, is salient in grammar. The papers in morphology bring further evidence for the centrality of asymmetry in word-structure. It is shown that asymmetry is part of the internal structure of functional constructs such as determiners and complementizers, as it is the case for lexical constructs. Further evidence is presented for the asymmetry of prefixes in verb structure. A typology of formal objects based on the distinction between maximal and minimal categories is formulated. It is proposed that Formal Complexity drives the change from synthetic to analytic expressions. The papers in phonology point to the fact that asymmetry is part of that linguistic dimension in terms of processes that eliminates symmetric relations, in terms of head-dependency relations, in terms of relative scope of the distinctive features in any inventory, in terms of universal principles in combination with certain language specific choices. Moreover, the papers on acquisition bring to fore experimental data that point to the same direction. The asymmetry of grammatical relations provides the form of the initial state of language that enables the child to cope with the poverty of the stimulus. The collection includes papers in morphology by Anna Maria Di Sciullo, Angela Ralli, Réjean

Canac-Marquis, Abdelkader Fassi Fehri, papers in phonology by Eric Raimy, Harry van der Hulst and Nancy Ritter, Glyne Piggott, Charles Reiss, Elan Dresher, and papers in acquisition from Maria Louisa Rivero and Magdalena Golezdzinowska, and David Lebeaux.

**Typological Studies** Guglielmo Cinque, 2014-02-04 In this book, Cinque takes a generative perspective on typological questions relating to word order and to the syntax of relative clauses. In particular, Cinque looks at: the position of the Head vis à vis the relative clause in relation to the position of the verb vis à vis his object; a general cross-linguistic analysis of correlatives; the need to distinguish a sentence-grammar, from a discourse-grammar, type of non-restrictives (with languages differing as to whether they possess both, one, the other, or neither); a selective type of extraction from relative clauses; and a tentative sketch of a more ample work in progress on a unified analysis of externally headed, internally headed, and headless relative clauses.

**A Guide to Common Animals of Western North America** Jerry G Chmielewski, 2016-07-15 The authors provide the tourist to western North America with a trilingual introduction to the wildlife. Our intent in this introductory guide is not to be exhaustive but instead to provide some background information on some of the wildlife<sup>3</sup> you will hopefully encounter while visiting our rugged mountainous wilderness.

**Pidgins and Creoles** Jacques Arends, Pieter Muysken, Norval Smith, 1994-12-20 This introduction to the linguistic study of pidgin and creole languages is clearly designed as an introductory course book. It does not demand a high level of previous linguistic knowledge. Part I: General Aspects and Part II: Theories of

Genesis constitute the core for presentation and discussion in the classroom, while Part III: Sketches of Individual Languages (such as Eskimo Pidgin, Haitian, Saramaccan, Shaba Swahili, Fa d'Ambu, Papiamentu, Sranan, Berbice Dutch) and Part IV: Grammatical Features (such as TMA particles and auxiliaries, noun phrases, reflexives, serial verbs, fronting) can form the basis for further exploration. A concluding chapter draws together the different strands of argumentation, and the annotated list provides the background information on several hundred pidgins, creoles and mixed languages. Diversity rather than unity is taken to be the central theme, and for the first time in an introduction to pidgins and creoles, the Atlantic creoles receive the attention they deserve. Pidgins are not treated as necessarily an intermediate step on the way to creoles, but as linguistic entities in their own right with their own characteristics. In addition to pidgins, mixed languages are treated in a separate chapter. Research on pidgin and creole languages during the past decade has yielded an abundance of uncovered material and new insights. This introduction, written jointly by the creolists of the University of Amsterdam, could not have been written without recourse to this new material.

Some new operations on single-valued neutrosophic matrices and their applications in multi-criteria group decision making Faruk Karaaslan, Khizar Hayat, The single-valued neutrosophic set plays a crucial role to handle indeterminant and inconsistent information during decision making process. In recent research, a development in neutrosophic theory is emerged, called single-valued neutrosophic matrices, are used to address uncertainties. The beauty of single-valued neutrosophic matrices is that the utilizing of several fruitful operations in decision making.

**Enhancing the Quality of Learning** John R. Kirby, Michael J. Lawson, 2012-05-21 High quality learning is extensive, well integrated, deep, and supports the use of knowledge in new situations that require adaptation of what has been learned previously. This book reviews current research on the nature of high quality learning and the factors that facilitate or inhibit it. The book addresses relationships between quality of learning and learners' dispositions, teaching methods, cognitive strategies, assessment and technologies that can support learning. The chapters provide theoretical analyses, reports of classroom research, and suggestions for practical application for both teachers and learners. The book will be of value to teachers at all levels of education and provides guidance for students about how to approach classroom tasks in order to develop high quality learning.
