The New Enlightenment and the Fight to Free Knowledge Peter B. Kaufman,2021-02-23 How do we create a universe of truthful and verifiable information, available to everyone? In *The New Enlightenment and the Fight to Free Knowledge*, MIT Open Learning's Peter B. Kaufman describes the powerful forces that have purposely crippled our efforts to share knowledge widely and freely. Popes and their inquisitors, emperors and their hangmen, commissars and their secret police—throughout history, all have sought to stanch the free flow of information. Kaufman writes of times when the Bible could not be translated—you'd be burned for trying; when dictionaries and encyclopedias were forbidden; when literature and science and history books were trashed and pulped—sometimes along with their authors; and when efforts to develop public television and radio networks were quashed by private industry. In the 21st century, the enemies of free thought have taken on new and different guises—giant corporate behemoths, sprawling national security agencies, gutted regulatory commissions. Bereft of any real moral compass or sense of social responsibility, their work to surveil and control us are no less nefarious than their 16th- and 18th- and 20th- century predecessors. They are all part of what Kaufman calls the Monsterverse. *The New Enlightenment and the Fight to Free Knowledge* maps out the opportunities to mobilize for the fight ahead of us. With the Internet and other means of media production and distribution—video especially—at hand, knowledge institutions like universities, libraries, museums, and archives have a special responsibility now to counter misinformation, disinformation, and fake news—and especially efforts to control the free flow of information. A film and video producer and former book publisher, Kaufman begins to draft a new social contract for our networked video age. He draws his inspiration from those who fought tooth and nail against earlier incarnations of the Monsterverse—including William Tyndale in the 16th century; Denis Diderot in the 18th; untold numbers of Soviet and Central and East European dissidents in the 20th—many of whom paid the ultimate price. Their successors? Advocates of free knowledge like Aaron Swartz, of free software like Richard Stallman, of an enlightened public television and radio network like James Killian, of a freer Internet like Tim Berners-Lee, of fuller rights and freedoms like Edward Snowden. All have been striving to secure for us a better world, marked by the right balance between state, society, and private gain. The concluding section of the book, its largest piece, builds on their work, drawing up a progressive agenda for how today's free thinkers can band together now to fight and win. With everything shut and everyone going online, *The New Enlightenment and the Fight to Free Knowledge* is a rousing call to action that expands the definition of what it means to be a citizen in the 21st century.

Code Swaraj Carl Malamud,Sam Pitroda,2018 CODE SWARAJ is the story of a modern-day campaign of civil resistance which takes inspiration from Mahatma Gandhi and his campaigns of satyagraha that changed the nature of how our governments interact with their citizens. In their quest for universal access to knowledge, democratizing information, and decolonizing knowledge, Malamud

and Pitroda apply those Gandhian values to our modern times and lay out a compelling agenda for change for India and the world. Source for this book is available at public.resource.org/swaraj for download.

Google Hacks Tara Calishain,Rael Dornfest,2003 Explains how to take advantage of Google's user interface, discussing how to filter results, use Google's special services, integrate Google applications into a Web site or Weblog, write information retrieval programs, and play games.

The Burn Philip Dawkins,2019-05-22 Mercedes is an outsider. Tara makes sure she knows it. When a high school production of *The Crucible* forces them together, tensions escalate into acts of bullying—both online and IRL. *THE BURN* explores what happens to a teacher and his students when a classroom conflict turns into an online witch hunt.

Handbook of Research on Innovative Technology Integration in Higher Education Nafukho, Fredrick Muyia,2015-02-28 Our increasingly globalized world is driven by shared knowledge, and nowhere is that knowledge more important than in education. Now more than ever, there is a demand for technology that will assist in the spread of knowledge through customized, self-paced, and on-demand learning. The *Handbook of Research on Innovative Technology Integration in Higher Education* provides an international perspective on the need for information and communication technology in education and training. Highlighting the use of technology in both formal and informal learning, this book is an essential reference for academics, corporate leaders, government agencies, profit and non-profit organizations, policymakers, or anyone interested in the use of technology to educate and share information.

Listenable Bert Weiss,2023-03-28 There is great news and bad news when it comes to podcasting. The great news? Anybody can start a podcast. The bad news? Anybody can start a podcast. And it seems as if everyone is starting a podcast. A simple Google search reveals countless guides about how to start a podcast. From equipment to software, someone can go live with a new podcast in a matter of days with simple step-by-step instructions about recording and launching their show. But what's lacking is simple and effective training on how to create a podcast that's actually listenable—that makes listeners hit that subscribe button. In *Listenable*, syndicated morning-drive radio host, Bert Weiss, shares a simple content and delivery strategy anyone can use to produce a show that builds a large, loyal audience.

Holding on to You Ash Parsons,2020 First published in the United States of America as *The falling between us* by Philomel Books, an imprint of Penguin Random House LLC, 2018--Title page verso. Includes an excerpt from *Girls save the world* in this one.

The Falling Between Us Ash Parsons,2018-03-13 All-consuming fame and fortune prove too much for a teen popstar who suddenly goes missing--Eddie and the Cruisers for the Justin Bieber era. An uplifting story of love, grief, and forgiveness.--Kirkus Reviews A Junior Library Guild Selection! Just eight months ago, fifteen-year-old Roxanne Stewart was stuck in her

tiny, middle-of-nowhere hometown with no prospects of leaving. But after her boyfriend, Joshua Blackbird, posts a performance of an original song on YouTube, he becomes an overnight sensation, catapulting to the dizzying heights of celebrity, and Rox joins him on the whirlwind ride of a massive national tour. But it's not long before the never-blinking eye of fame begins weighing them both down--the constant hunger of managers, diehard fans who call themselves Birdies, record execs, paparazzi, and even family, all leeching onto Joshua. Then one day, Joshua Blackbird disappears. Was it a suicide? An accident? Rox will stop at nothing to find out the truth. The Falling Between Us is a haunting love story and a piercing look at the costs of fame. Praise for The Falling Between Us With a shrewd and sympathetic narrator and multiple elements of interest--music, celebrity, grief, mental health--this novel is a recommended first purchase. --School Library Journal

Skin in the Game Clémentine Deliss, 2023-12-13 Skin in the Game follows on from the acclaimed fieldwork diary, The Metabolic Museum. In this new book, Clémentine Deliss expands on how artists understand risk and contention both in their work and with regard to historical collections. Through a series of compelling conversations, questions are raised on how to work on colonial collections through the concept of the prototype as generative of a multiplicity of non-exclusive interpretations. The book includes interviews with leading women artists spanning two generations--Ruth Buchanan, Otobong Nkanga, Collier Schorr, Joëlle Tuerlinckx, and Andrea Zittel--in which they discuss that moment of skin in the game, when each of them took the decision to become an artist, to enter the Hades of an uncertain existence and the Heaven of aesthetic experiment. What was the prototype that defined their career and their life's trajectory, that like a revenant returns over the course of an artist's lifetime? CLÉMENTINE DELISS (*1960, London) is an independent curator whose practice crosses the borders of contemporary art, critical anthropology and curatorial experimentation. She is internationally recognized for her seminal work on the Post-Ethnographic, on African modernism, and for her interventionist practices in art. She is Honorary Global Humanities Professor of History of Art at the University of Cambridge, and Associate Curator at KW Institute for Contemporary Art in Berlin.

Googled Ken Auletta, 2009-11-03 A revealing, forward-looking examination of the outsize influence Google has had on the changing media Landscape. There are companies that create waves and those that ride or are drowned by them. As only he can, bestselling author Ken Auletta takes readers for a ride on the Google wave, telling the story of how it formed and crashed into traditional media businesses--from newspapers to books, to television, to movies, to telephones, to advertising, to Microsoft. With unprecedented access to Google's founders and executives, as well as to those in media who are struggling to keep their heads above water, Auletta reveals how the industry is being disrupted and redefined. Using Google as a stand-in for the digital revolution, Auletta takes readers inside Google's closed-door meetings and paints portraits of Google's notoriously private founders, Larry Page and Sergey Brin, as well as those who work with--and against--them. In his narrative, Auletta provides the fullest account ever told of Google's rise, shares the "secret sauce" of Google's success, and shows why the worlds of "new" and "old" media often communicate as if residents of different planets. Google engineers start from an assumption that the old ways of doing things can be improved and made more efficient, an approach that has yielded

remarkable results? Google will generate about \$20 billion in advertising revenues this year, or more than the combined prime-time ad revenues of CBS, NBC, ABC, and FOX. And with its ownership of YouTube and its mobile phone and other initiatives, Google CEO Eric Schmidt tells Auletta his company is poised to become the world's first \$100 billion media company. Yet there are many obstacles that threaten Google's future, and opposition from media companies and government regulators may be the least of these. Google faces internal threats, from its burgeoning size to losing focus to hubris. In coming years, Google's faith in mathematical formulas and in slide rule logic will be tested, just as it has been on Wall Street. Distilling the knowledge accrued from a career of covering the media, Auletta will offer insights into what we know, and don't know, about what the future holds for the imperiled industry.

Implementing Computing Supported Cooperative Learning David

Blended Learning: Concepts, Methodologies, Tools, and Applications

Management Association, Information Resources, 2016-08-18 Traditional classroom learning environments are quickly becoming a thing of the past as research continues to support the integration of learning outside of a structured school environment. Blended learning, in particular, offers the best of both worlds, combining classroom learning with mobile and web-based learning environments. Blended Learning: Concepts, Methodologies, Tools, and Applications explores emerging trends, case studies, and digital tools for hybrid learning in modern educational settings. Focusing on the latest technological innovations as well as effective pedagogical practice, this critical multi-volume set is a comprehensive resource for instructional designers, educators, administrators, and graduate-level students in the field of education.

Pop Quiz Tom Ryan, 2017-09-12 Television is so five years ago.

Deeper John Seabrook, 1998-02-19 Deeper presents a brilliant writer's eyewitness account of a fascinating, tumultuous period in the early history of the online world: when the medium moved decisively from that of a geeky hobby to a recognized part of mainstream popular culture.

Tracing the (Post)Apartheid Novel beyond 2000 Danyela Dimakatso

Demir, Olivier Moreillon, 2023-12-01 This anthology comprises of interviews with contemporary South African authors, offering vignettes of their lives and summaries of their works. In curating this book, Danyela Demir and Olivier Moreillon step beyond pure literary theory and analysis. They welcome the authors to speak and assess the literary panorama in which they live and co-create. However, Demir and Moreillon also trace concepts and terms that describe the current South African literature, such as post-transitional literature and literature beyond 2000. By adopting a world-literary approach to (post)apartheid literature, this book contributes to debates on contemporary South African writing. In addition, *Tracing the (Post)Apartheid Novel Beyond 2000* seeks to raise awareness of the imbalance in both critical and public attention between literary 'big names', such as André P. Brink, J.M. Coetzee, Nadine Gordimer and Zakes Mda, who are popular worldwide, and the younger and newer generation of South African writers, who go largely

unnoticed. Print edition not for sale in Sub Saharan Africa.

The Ediacaran Invasion Craig DeLancey, A fast ride through dizzying scientific extrapolations! When Paleontologist Karen Regan discovers a machine in 550 million year old rock, she is shocked to discover it appears intact. She calls on her former lover, Steve Ryle, to supply his revolutionary microscopic robots to explore the interior of the device. With the help of an engineer, Daltry, the three of them discover more than they dreamed possible: the machine not only is still active, but it has been waiting to deliver a terrible message – a message that cannot be heard, but must be experienced. A message that will transform each of them into something more – or less – than human. How these three explorers react to the gift of the Ediacaran machine will determine whether the human race survives or perishes. Praise for the “Ediacarian Machine” (which forms the first third of *The Ediacaran Invasion*, and was published in *Analog Science Fiction*) include: “A very classic skiffy scenario. It has robotics, alien wonders, mysteries to be solved, exploratory adventures, and cosmic scope. It has ethical issues to be worked out. No one is an idiot or a villain, even when they don’t agree. Fans should really like it. RECOMMENDED.” –Lois Tilton, writing in *Locus* _____ Short Novel 35,000 words DANGEROUS IDEAS In the spirit of *The Twilight Zone* and *Golden Age Science Fiction*, the *Dangerous Ideas* collection presents short novels of science fiction that explore the most extreme possibilities--and leave you in wonder.

Putting Learning Before Technology! Klaus Zierer, 2019-02-21 For many, digitalization is the key to revolutionizing education. But what do we know about its impact on the learning process? What benefits are on offer and what are the risks? What are the consequences for educational interventions? *Putting Learning Before Technology!* discusses these questions and more in a thorough exploration of the use of technology in educational settings. Central to the author's argument is that digitalization as a sole and structural measure will bring little benefit and that the teachers who bring lessons to life are much more important. Features of the book include: evidence from Visible Learning research to scientifically frame the effectiveness and pitfalls of technology in the classroom; real-life classroom examples; graphics to clearly illustrate key concepts and studies. This book is a fascinating analysis of the impact, possibilities, and limits of the use of technology within education, and will appeal to teachers and teacher-trainers in any setting or country.
