Mass Communications Research Methods H.J.

Hsia,2015-10-23 Originally published in 1988. Step-by-step, this book leads students from problem identification, through the mazes of surveys, experimentation, historical/qualitative studies, statistical analysis, and computer data processing to the final submission and publication in scientific or popular publications.

Financial Planning and Counseling Scales John E.

Grable,Kristy L. Archuleta,R. Roudi Nazarinia Roy,2010-11-17 The personal, household, and consumer finance field is growing quite rapidly, especially as universities and policy makers see the need for additional research and clinical application in this dynamic area of study. Currently, the profession is advancing towards the stage where professional practice becomes increasingly evidenced-based. *Financial Planning and Counseling Scales* provides educators, researchers, students, and practitioners with a much needed review of reliable and valid personal assessment scales and instruments that can be used for both research and clinical practice. In addition to presenting actual scales and instruments with applicable psychometric details, the book also includes an overview of measurement issues and psychometric evaluation.

Scientific and Technical Aerospace Reports ,1982 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Communication Systems A. Bruce Carlson,1986

Modularly organized, this book permits flexibility in the

coverage of the three major parts: signal and system analysis, analog communication, and digital communication. It features worked examples and exercises for students to solve within chapters, helping them to master new concepts as they are introduced.

Balanced Microwave Filters Ferran Martin, Lei Zhu, Jiasheng Hong, Francisco Medina, 2018-02-26 This book presents and discusses strategies for the design and implementation of common-mode suppressed balanced microwave filters, including, narrowband, wideband, and ultra-wideband filters This book examines differential-mode, or balanced, microwave filters by discussing several implementations of practical realizations of these passive components. Topics covered include selective mode suppression, designs based on distributed and semi-lumped approaches, multilayer technologies, defect ground structures, coupled resonators, metamaterials, interference techniques, and substrate integrated waveguides, among others. Divided into five parts, *Balanced Microwave Filters* begins with an introduction that presents the fundamentals of balanced lines, circuits, and networks. Part 2 covers balanced transmission lines with common-mode noise suppression, including several types of common-mode filters and the application of such filters to enhance common-mode suppression in balanced bandpass filters. Next, Part 3 examines wideband and ultra-wideband (UWB) balanced bandpass filters with intrinsic common-mode suppression. Narrowband and dual-band balanced bandpass filters with intrinsic common-mode suppression are discussed in Part 4. Finally, Part 5 covers other balanced circuits, such as balanced power dividers and combiners, and differential-mode equalizers with common-mode filtering. In addition, the book: Explores a research topic of increasing interest due to the growing demand of balanced

transmission lines and circuits in modern communication systems Includes contributions from prominent worldwide experts in the field Provides readers with the necessary knowledge to analyze and synthesize balanced filters and circuits Balanced Microwave Filters is an important text for R&D engineers, professionals, and specialists working on the topic of microwave filters. Post graduate students and Masters students in the field of microwave engineering and wireless communications, especially those involved in courses related to microwave filters, and balanced filters and circuits will also find it to be a vital resource.

StarBriefs 2001 ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on. Yet nobody would wonder at someone taking a short walk every day - after twenty five years that person would have covered a surprisingly long distance. This is exactly the story behind this list, which appeared first as a few pages within the directory StarGuides (or whatever name it had at that time) and as a distinct sister publication since 1990. The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations, acronyms, contractions and symbols which they might encounter in all aspects of the vast range of their professional activities, including traveling. Perhaps it is a bit paradoxical, but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline, they will probably encounter more difficulties when dealing with adjacent fields. It is for this purpose that this dictionary

might be most often used. Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions.

Education, Innovation and Economic Society

Development Norbert Grünwald,2015-06-03 The ICEBE conference held in Shijiazhuang is the seventh in a series of annual conferences on engineering and business education and ICIE is the 5th international conference that runs every two years on innovation and entrepreneurship. It is the fourth joint conference organised by the Robert-Schmidt-Institute (University Wismar), hosted by Shijiazhuang University of Economics and co- organized by La Consolacion College Manila. The theme of the conference is “Education Innovation and Economic Society Development” which describes the emphasis that is laid on always combining education with the need of the society, not only to consider one in isolation from the others. Therefore the primary target of the conference is to provide the delegates with cross-disciplinary interests related to the subjects above in engineering and business education.

Data Converters Franco Maloberti, 2007-02-22 This book is the first graduate-level textbook presenting a comprehensive treatment of Data Converters. The advancement of digital electronics urged the availability of a still missing support for teaching and self-learning analog-digital interfaces at many levels: the specification, the conversion methods and architectures, the circuit design and the testing. This book, after the necessary study of the background theoretical elements, covers aspects and provide elements for a deep and comprehensive knowledge. The breath and the level of details of topics is enhanced by introductory material in each chapter and the use of many examples, most of them in the form of computer behavioral simulations. The examples and the end-of-chapter problems help in understanding and favor self-practice using tools that are effective for training and for design activity. Data Converters is a textbook that is also essential for engineering professionals as it was written for responding to a shortage of organically organized material on the topic. The book assumes a solid background in analog and digital circuits as well as a working knowledge of simulation tools for circuit and behavioral analysis. A background on statistical analysis is also helpful, though not strictly necessary. Coverage of all the basic elements essential for a clear understanding of sampling, quantization, noise in sampled-data systems and mathematical tools for sampled-data linear systems Comprehensive definition of the parameters used to specify data converters and necessary for understanding product data sheets Coverage of all the architectures used in Nyquist-rate data converters and detailed study of features,

limits and design techniques Detailed study of oversampled and Sigma-Delta converters with simulation examples and use of spectra and histograms for a clear understanding of features and limit if the noise shaping Coverage of digital correction and calibration techniques for enhancing performances Use of theory and intuitive views to explain circuits and systems operation and limits Coverage of testing methods and description of the data processing used for testing and characterization Extensive use of Simulink and Matlab in examples and problem sets to assist reader comprehension and favor deeper study

StarBriefs Plus Andre Heck, 2004-03-31 With about 200,000 entries, *StarBriefs Plus* represents the most comprehensive and accurately validated collection of abbreviations, acronyms, contractions and symbols within astronomy, related space sciences and other related fields. As such, this invaluable reference source (and its companion volume, *StarGuides Plus*) should be on the reference shelf of every library, organization or individual with any interest in these areas. Besides astronomy and associated space sciences, related fields such as aeronautics, aeronomy, astronautics, atmospheric sciences, chemistry, communications, computer sciences, data processing, education, electronics, engineering, energetics, environment, geodesy, geophysics, information handling, management, mathematics, meteorology, optics, physics, remote sensing, and so on, are also covered when justified. Terms in common use and/or of general interest have also been included where appropriate.

Scattering and Localization of Classical Waves in Random Media Ping Sheng,1990 The past decade has witnessed breakthroughs in the understanding of the wave localization phenomena and its implications for wave multiple scattering in inhomogeneous media. This book brings together review articles written by noted researchers in this field in a tutorial manner so as to give the readers a coherent picture of its status. It would be valuable both as an up-to-date reference for active researchers as well as a readable source for students looking to gain an understanding of the latest results.
