Reinforced Concrete Design Sayed

Mahmoud,2023-09-18 This book provides the reader with the fundamentals of analysis and design of reinforced concrete (RC) elements, together with elements' reinforcement details, in a simple way. The book provides a valuable design guide for undergraduate civil and architectural engineering students. It can also act as a resource for recent graduates and practicing engineers. Throughout the book, the presented design procedures for structural elements provide a roadmap which enables students and practicing engineers to create their own programming codes to increase the productivity of their design practice.

Free of Fear Hussain Al-Shahristani,2021-03-29

Free of fear is about a man who overcame his fear to say no to Saddam Hussein when he wanted him to work on a nuclear weapons programme. The book vividly describes the atrocities of Saddam's tyranny and how he and other inmates survived in Abu Ghraib prison. He overcame his fear again when he defied Saddam by escaping from prison after spending ten years in solitary confinement. After the fall of the regime, he was called upon to assume different ministerial positions and played leading roles in new Iraq. This book is an eyewitness account of five decades of modern Iraq with all its turmoil and challenges. It describes successes and failures at nation-building endeavours. Autobiography of Hussain Al-Shahristani is a mirror of recent Iraq's history.

Earthquake-Induced Structural Pounding Robert
Jankowski,Sayed Mahmoud,2015-03-14 This books
analyzes different approaches to modeling
earthquake-induced structural pounding and shows
the results of the studies on collisions between
buildings and between bridge segments during
ground motions. Aspects related to the mitigation
of pounding effects as well as the design of
structures prone to pounding are also discussed.
Earthquake-induced structural pounding between
insufficiently separated buildings, and between
bridge segments, has been repeatedly observed
during ground motions. The reports after
earthquakes indicate that it may result in limited
local damage in the case of moderate seismic
events, or in considerable destruction or even the
collapse of colliding structures during severe
ground motions. Pounding in buildings is usually
caused by the differences in dynamic properties
between structures, which make them vibrate out-
of-phase under seismic excitation. In contrast, in
the case of longer bridge structures, it is more
often the seismic wave propagation effect that
induces collisions between superstructure segments

during earthquakes.

 Matindoost, 2020-09-04 We have experienced such
 enormous developments in different fields of
 science and technology, sending Space Shuttles to
 outer space and discovering the microscopic germs
 hidden in the textures of the elements; A Melody
 Called Peace is here to make such progresses in
 the very core of our hearts and to remind us once
 more that literature and art can bridge the souls
 of strangers and bless them with the sweet taste
 of peace and love. This book is the result of a
 massive international collaboration between poets,
 authors and artists from different parts of the
 world who answered the invitation call of the
 messengers of peace and civilization, we, the
 authors and participants, believe that peace is
 the result of the reconciliation of the opposites
 and poetry - in its simple but rich form - and has

the ability to convey the genuine and common concerns of all humankind living in different parts of the world while they hold different beliefs. A Melody Called Peace, like a big and glamorous lantern, shines the light once more on the shadows which have tarnished the beloved peace; the melody of dozens of poets and authors will fondle the hearts of the residents of the world, reminding them of this famous phrase: Nil Desperandum! And finally, Gloria in altissimis Deo et in terra pax hominibus bonae voluntatis!

Poison Penmanship Jessica Mitford,2010-09-07
Jessica Mitford was a member of one of England's most legendary families (among her sisters were the novelist Nancy Mitford and the current Duchess of Devonshire) and one of the great muckraking journalists of modern times. Leaving England for America, she pursued a career as an investigative reporter and unrepentant gadfly, publicizing not only the misdeeds of, most famously, the funeral business (The American Way of Death, a bestseller) and the prison business (Kind and Usual Punishment), but also of writing schools and weight-loss programs. Mitford's diligence, unfailing skepticism, and acid pen made her one of the great chroniclers of the mischief people get up to in the pursuit of profit and the name of

good. Poison Penmanship collects seventeen of Mitford's finest pieces—about everything from crummy spas to network-TV censorship—and fills them out with the story of how she got the scoop and, no less fascinating, how the story developed after publication. The book is a delight to read: few journalists have ever been as funny as Mitford, or as gifted at getting around in those dark, cobwebbed corners where modern America fashions its shiny promises. It's also an unequalled and necessary manual of the fine art of investigative reporting.

Advances in Architecture, Engineering and Technology Federica Rosso, Claudia Fabiani, Haşim Altan, Mourad Amer, 2022-03-17 This book examines a range of subjects with a specific focus on architectural and technological advancements. Architecture is the constant innovation in designing for high efficiency in the performance of buildings, in terms of planning, construction and energy, while maintaining creativity in its form. Moreover, the field of architecture goes hand in hand with that of technology. Nowadays, engineering technology has to cope with the rapid industrialization and urbanization seen in most countries. Furthermore, creative design and construction practices are challenging tasks to the architects and engineers to meet the ever-growing demands of society. Therefore, this book on Advances in Engineering Science and Architectural Design is provided to cover a wide range of topics in architecture, engineering, and

technology.

VIII Olympiad Ellen Phillips, 2015-11-18 The VIII Olympiad, the eighth volume in The Olympic Century series, begins in the most extraordinary of cities at a most extraordinary time: Paris in the 1920s. Now the stuff of legend, it was a place where the likes of Ernest Hemingway, James Joyce and Pablo Picasso discussed art and culture in the cafes by day and danced in the jazz clubs long into the night. Played out in front of this dazzling backdrop, the Games of Paris 1924 created its own legends. Paavo Nurmi, the Flying Finn, cemented his status as the most dominant distance runner of the age, claiming five gold medals in individual and team competition. In the pool, a 20-year-old American named Johnny Weissmuller won three golds in swimming and a bronze in water polo, while also winning acclaim for his chiselled physique. Weissmuller would go on to parlay his Olympic fame into a long Hollywood acting career playing Tarzan the Ape Man. The focus then shifts to 1928 and the second Winter Olympic Games, held in the luxurious French resort town of St. Moritz. The book paints a picture of exuberant crowds cheering as fearless sledders pilot primitive bobsleighs down the treacherous Cresta run, and urging the Swedish lumberjack Per Erik Hedlund through the slush for close to five hours to win the 50-kilometre cross-country ski race. It also tells the story of a smiling, 16-year-old figure skater from Norway named Sonja Henie, the unrivaled star of St. Moritz, who floated effortlessly between soft spots in the ice to win gold. Like Weissmuller four years earlier, Henie's Olympic triumph would

also lead to Hollywood stardom. Juan Antonio Samaranch, former President of the International Olympic Committee, called The Olympic Century, e;The most comprehensive history of the Olympic games ever publishede;.

Arbitration and International Trade in the Arab Countries Nathalie Najjar,2017-10-30 Arbitration and International Trade in the Arab Countries examines international trade arbitration in the MENA region and analyses legal sources, decisions and practices through the prism of freedom and safety requirements. The work is an essential guide to the body of arbitration law at both the practical and theoretical levels.

Bahrain 1975/76 - 2020 Anthony Axon,Susan Hewitt,2023-09-20 Bahrain has roots deep in the past, going back some 5,000 years. It was a vital link between civilisations, such as the Phoenicians, the Levant and Mesopotamia. The 'modern' era of Bahrain began in 1783, following the island's conquest by Ahmed al-Fateh. It has been ruled by the al-Khalifa family since 1961. Bahrain was declared independent from the United Kingdom in August 1971, and issued its first constitution in 1973.

African Textiles Today Chris Spring,2012-10-09 African Textiles Today illustrates how African history is read, told, and recorded in cloth. All artifacts or works of art hold within them stories that range far beyond the time of their creation or the lifetime of their creator, and African textiles are patterned with these hidden histories. In Africa, cloth may be used to memorialize or commemorate something - an event, a

person, a political cause - which in other parts of the world might be written down in detail or recorded by a plaque or monument. History in Africa can be read, told, and recorded in cloth. Making and trading numerous types of cloth have been vital elements in African life and culture for at least two millennia, linking different parts of the continent with each other and the rest of the world. Africa's long engagement with the peoples of the Mediterranean and the islands of the Atlantic and Indian Oceans provides a story of change and continuity. *African Textiles Today* shows how ideas, techniques, materials, and markets have adapted and flourished, and how the dynamic traditions in African textiles have provided inspiration for the continent's foremost contemporary artists and photographers. With a concluding chapter discussing the impact of African designs across the world, the book offers a fascinating insight into the living history of Africa.

Historical Dictionary of Librarianship Mary Ellen Quinn, 2014-05-08 Although the history of librarianship as an organized profession dates only as far back as the mid-19th century, the history of libraries is much older, and people have been engaged in pursuits that we recognize as librarianship for many thousands of years. This book traces librarianship from its origins in ancient times through its development in response to the need to control the flood of information in the modern world to the profound transformations brought about by the new technologies of the late 20th and early 21st centuries. The Historical

Dictionary of Librarianship focuses on librarianship as a modern, organized profession, emphasizing the period beginning in the mid-19th century. Author Mary Ellen Quinn relates the history of this profession through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 300 cross-referenced entries on important personalities, libraries around the world, and notable organizations and associations. This book is an excellent access point for students, researchers, and anyone wanting to know more about librarianship.
