Mathematical and Numerical Approaches for Multi-Wave Inverse Problems

Larisa Beilina, Maïtine Bergounioux, Michel Cristofol, Anabela Da Silva, Amelie Litman, 2020-06-30 This proceedings volume gathers peer-reviewed, selected papers presented at the "Mathematical and Numerical Approaches for Multi-Wave Inverse Problems" conference at the Centre International de Rencontres Mathématiques (CIRM) in Marseille, France, in April 2019. It brings the latest research into new, reliable theoretical approaches and numerical techniques for solving nonlinear and inverse problems arising in multi-wave and hybrid systems. Multi-wave inverse problems have a wide range of applications in acoustics, electromagnetics, optics, medical imaging, and geophysics, to name but a few. In turn, it is well known that inverse problems are both nonlinear and ill-posed: two factors that pose major challenges for the development of new numerical methods for solving these problems, which are discussed in detail. These papers will be of interest to all researchers and graduate students working in the fields of nonlinear and inverse problems and its applications.

Corporate Governance in Asia Julian Roche, 2005-02-01 The impact of the economic downturn and the increase in financial scandals emerging from major corporations has generated a growing interest in governance issues and has emphasized the need for companies to be transparent in their dealings with shareholders and the markets. Although the issues in Asia are fundamentally similar to those in the rest of the world, there are some crucial differences in the way in which Asian corporations acknowledge and confront these issues and in the political and legal frameworks under which they operate. Using examples of good and bad governance, Roche analyzes if the Asian approach to governance issues is unique. Business and finance students, as well as executives with an interest in Asian business or corporate governance will find this an authoritative and insightful guide to this complex and important topic.
