A SOCIO-ECONOMIC ANALYSIS OF GOVERNMENT HEALTH INSURANCE SCHEMES IN VIJAYAPURA DISTRICT Dr. Bhakti Mahindrakar (Tatuskar) ,2022-04-11 1.1 Introduction: Over the years plan priorities have changed. In the beginning, they were growth-centric. Now, these have become human-centric. Human development is accorded a prime place; it depends upon Education, Health, and Sanitation. To achieve economic development, human development is most essential, but still, around 270 million i.e. 21.9 percent of people in India are unable to afford major health care facilities and services at the market price. So, Government of India and respective State Governments have made special efforts to solve this problem through the means of government Healthcare Schemes with government funding and Public Private Partnership, to improve Life expectancy and to minimize health related issues like Infant Mortality Rate, Neonatal Mortality Rate, and Maternal Mortality Rate and also to boost the productivity of people to work more and earn more for attaining economic development and growth to build a strong nation.

The Rise and Fall of the Pyramid Schemes in Albania Mr.Christopher J. Jarvis,1999-07-01 What lessons can be drawn from the unprecedented growth and spectacular collapse of financial pyramid schemes in Albania? This paper discusses the origins of the pyramid schemes and the way the authorities handled them. It also analyzes the economic effects of the pyramid schemes, concluding that despite the descent into anarchy triggered by the schemes' collapse their direct effects on the economy are difficult to specify and appear to have been limited. Finally, the paper argues that prevention of pyramid schemes is better than cure, and that governments and international financial institutions should be vigilant in clamping down on frauds.

Greenhouse Gas Control Technologies B. Eliasson,P. Riemer,A. Wokaun,1999-05-20 These proceedings contain 270 papers outlining ideas and contributions to the new scientific, technical and political discipline of Greenhouse Gas (GHG) Control. The contributions were presented at the 4th International Conference on Greenhouse Gas Control Technologies (GHGT-4). It was the largest gathering of experts active in this new and fast-developing field. GHGT-4 was different from its predecessors in that it included all greenhouse gases, not only CO₂, and all issues which could contribute to the mitigation of the greenhouse problem - technical, economic and political. The main focus was on practical solutions and real demonstrations of mitigation technology being planned and implemented today. It also addressed ways to increase the efficiency of power production and utilisation, and looked at proposals to encourage the development of renewable energy sources. During the Opening Session, 10 keynote addresses were heard from prominent personalities in government, industry and academia. To tackle this very inter-disciplinary problem and to achieve acceptable solutions, it is essential for industry and government to initiate intense dialogue and cooperation. Conferences like this can provide the opportunity for a meeting of minds between engineers and politicians in the face of global challenge. The primary attributes of this global challenge are manifold: the problem is global and international; it is inter-disciplinary, both in substance and approach; it covers technical, political and economic issues and involves government, science, industry and academia; it is complex and non-linear; and it will take the efforts of all parties involved to solve the problem. These proceedings contain ideas for starting demonstration projects and for making better use of the power and flexibility of market measures. They also show it is a problem we can influence and that there is a wealth of ideas. The challenge now is to find the right partners to put these ideas into action.

Drawing on a wide variety of sources of evidence from around the world, this new book from the director of the Citizen's Income Trust, UK, provides an essential foundation for policy and implementation debates. Governments, think tanks, economists, and public servants will find this thorough encompassing book indispensable to their consideration of the economic and social advantages and practicalities of a basic income.

Compensation Schemes for Damages Caused by Healthcare and Alternatives to Court Proceedings Dobrochna Bach-Golecka,2021-05-16 The book discusses compensation mechanisms and other non-judicial means that offer alternatives to court proceedings, designed and provided for within national legal regimes. Such schemes are primarily of a civil or administrative character and are mainly intended to supplement criminal liability for medical negligence. As such, the book focuses on medical malpractice and prospective medical harm from a civil law perspective. It examines the contemporary perspective of a patient-physician relationship, which has evolved from a relation

of a quasi-patrimonial character into a partnership of quasi-equal parties, dealing with a medical treatment procedure as a scientific endeavor. It also reviews the extra-legal conditions that are taken into account in compensation arrangements, particularly the need to satisfy a psychological urge for conciliation and empathy on the part of medical personnel. Lastly, the book explores the responsibility of public authorities and healthcare providers to guarantee access to healthcare that is of a sufficient quality, based upon standards provided for in international (and European) law.

Pro Windows Server AppFabric Stephen Kaufman,Danny Garber,2010-04-28 This book will teach you all about Windows Server AppFabric, a set of extensions to Windows Server that allow it to function as a lightweight, application server. The combination of Windows Server and AppFabric provides an easy-to-manage platform for developing, deploying, and reliably hosting middle-tier WCF/WF services. Windows Server AppFabric fills an important vacuum left in the wake of COM and COM+’s demise as the .NET platform has risen to prominence. Provided as an extension to Internet Information Services (IIS), the built-in application server frees you from having to create your own Windows services to perform application hosting. Instead, you can take advantage of plumbing and infrastructure that Microsoft provides for you, freeing you to focus on just your business logic while still being able to deploy n-tier solutions on Windows Server. In this way, Windows Server AppFabric solves the problem of developing, deploying, and reliably hosting middle-tier WCF/WF services. If you’re an experienced developer, you’ll want to learn about Windows Server AppFabric fast, without a lot of reading. And that’s what this book is all about. It cuts to the chase and shows you the simplicity and elegance that combine to form Windows Server AppFabric, getting you up to speed fast, so that you can take advantage of all the platform has to offer.

International Climate Policy to Combat Global Warming Dirk T.G. Rübbelke,2002-01-01 In their pursuit of policies to combat global warming, countries will find that they may also receive additional benefits which are not directly associated with the primary aim. These ancillary benefits are likely to include, for example, a reduction in pollution as a result of carbon containment policies. International Climate Policy to Combat Global Warming is one of the first books which analyses climate policy, taking account of ancillary as well as primary benefits. The author integrates ancillary benefits into the theory and explores the implications for international policy measures. Because of the private character of ancillary benefits, the author is able to treat climate policy as an impure public good which in turn has an impact on the efficient climate protection level. He highlights the general failures of the standard approach to climate policy design and goes on to propose a new approach to international negotiations on climate change. He suggests a flexible matching scheme which would help overcome free-rider incentives and which would have considerable advantages over traditional co-operative designs.
