What You Will Learn Use the Java EE 8 and the JavaServer Faces APIs to build Java-based web applications through four practical real-world case studies Process user input with JSF and the expression language by building a calculator application Persist data using JSF templating and Java Persistence to manage an inventory of books Create and manage an alumni database using JSF, Ajax, web services and Java EE 8's security features. <u>Icons of the Highway</u> Tony Worobiec,Eva Worobiec,2008 Often when people think of America, the image of the roadside motel with bright, audacious neon lighting invariably comes to mind. The 50s, a decade immortalised by the classic cult movie American Graffiti, was perhaps the pinnacle of this fabulous indulgence. But much of what people associate with this particular slice of American life is now in steady decline. In this collection, husband and wife Tony and Eva Worobiec capture, in outstanding photography, the magic that remains - from the High Line motel at the Canadian border to the desert towns of Arizona and New Mexico.

  Drive Daniel H. Pink,2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and

satisfaction-at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose-and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

  Getting Started Deborah Morley,1999 Over the last few years, Internet and World Wide Web use has skyrocketed and, consequently, many are interested in developing a Web site for personal or business use. Though, creating a Web site has in the past been very complicated and primarily left to computer professionals, the introduction of Web publishing programs such as Microsoft FrontPage 98 has made Web site creation a possibility for almost anyone. While many computer books are enormous and difficult to read, Getting Started: Web Page Design with Microsoft FrontPage 98 is concise and readable. It begins with the essential information a Web page designer needs to become familiar with the World Wide Web and basic Web page design fundamentals, and then covers how to create complete Web sites -- all in six concise chapters.

  GREP in InDesign Peter Kahrel,2008-10-27 Updated: June 2015. Author Peter Kahrel updated this Short Cut to cover InDesign CC. Several examples have been added, and most examples are now analysed in more detail. Updated: August 2010. Author Peter Kahrel updated this Short Cut to cover InDesign CS5. Updated: November 2009. Author Peter Kahrel updated this Short Cut to address typos and reader comments. GREP (short for General Regular-Expression Print) is a powerful tool that lets you use wildcards (jokers) to search and replace text. InDesign's GREP implementation can be used for text and also for formatting codes, finding patterns in text as well as literal text. GREP moves beyond the restrictions that hampered earlier InDesign search features, but unfortunately it does have the reputation of being difficult to master. As with many things, it can be challenging to learn, but, fortunately, a lot can be done with surprisingly simple expressions. The aim of this Short Cut is to show how to create simple but powerful regular expressions.
