**Field Recordings from the Inside Joe Bonomo,2017-02-14**

Using as its epigraph and unifying principle Luc Sante’s notion that “Every human being is an archeological site,” Field Recordings from the Inside provides a deep and personal examination at the impact of music on our lives. Bonomo effortlessly moves between the personal and the critical, investigating the ways in which music defines our personalities, tells histories, and offers mysterious, often unbidden access into the human condition. The book explores the vagaries and richness of music and music-

making—from rock and roll, punk, and R&B to Frank Sinatra, Nashville country, and Delta blues—as well as the work of a diverse group of artists and figures—Charles Lamb, music writer Lester Bangs, painter and television personality Bob Ross, child country musician Troy Hess, and songwriter Greg Cartwright. Mining the often complex natures and shapes of the creative process, *Field Recordings from the Inside* is a singular work that blends music appreciation, criticism, and pop culture from one of the most critically acclaimed music writers of our time.

Handling Societal Complexity Dorien DeTombe, 2015-02-24

This handbook for the Methodology of Societal Complexity describes the theoretical development of the field and lays the foundation for the application of the Compram Methodology in the context of addressing complex societal problems. As such, it offers a valuable resource for scientists, practitioners, politicians, master

and PhD students in the fields of methodology, the social sciences, operational research, management and political science and for all others who are professionally involved in handling complex societal problems. These problems are the kind that fill the front page of quality newspapers; they have a huge impact on society, involve a variety of phenomena and actors, and are therefore difficult to handle. The structured Compram Methodology provides sound guidelines for handling real-life societal problems democratically, sustainably and transparently. Examples of the use of the Compram Methodology are provided in the domain of global safety with regard to healthcare, economics, climate change, terrorism, large city problems, large technological projects and floods. Complex societal problems must be treated as multi-disciplinary, multi-actor, multi-level and often as multi-continental issues. As such, they call for a multi-disciplinary and multi-actor approach that takes into account the emotional aspects of the problem and the problem handling process, including the micro, meso and macro level, which can be accomplished using the methods, models and tools from the field of the Methodology of Societal Complexity. The Compram Methodology improves the problem handling process and increases the quality of interventions and therefore the quality

of life. Handling complex societal problems can reduce conflicts, save money and ultimately even save lives. Dorien J. DeTombe is an internationally recognized expert and founder of the Theory of the Methodology of Societal Complexity and the Compram Methodology.

Introduction to Metaphysics Gabby Mccarthy, 2018-10-09

Metaphysics is the branch of philosophy concerned with the nature of existence, being and the world. Arguably, metaphysics is the foundation of philosophy: Aristotle calls it e;first philosophye; (or sometimes just e;wisdom;), and says it is the subject that deals with e;first causes and the principles of thingse;. It asks questions like: e;What is the nature of reality?e;, e;How does the world exist, and what is its origin or source of creation?e;, e;Does the world exist outside the mind?e;, e;How can the incorporeal mind affect the physical body?e;, e;If things exist, what is their objective nature?e;, e;Is there a God (or many gods, or no god at all)?e;. Originally, the Greek word e;metaphysikae; (literally e;after physicse;) merely indicated that part of Aristotle's oeuvre which

came, in its sequence, after those chapters which dealt with physics. Later, it was misinterpreted by Medieval commentators on the classical texts as that which is above or beyond the physical, and so over time metaphysics has effectively become the study of that which transcends physics. This book provides a detailed resume of current knowledge about the Metaphysics.

**Technology:** Linda D. Behen, 2013-06-17 Learn how to integrate pop culture and technology into school library programs and classrooms, and make today's digital content, mobile devices, and students' changing interests work to the educator's advantage. Today's school libraries need to evolve and meet the needs of 21st-century students—the instruction, programming, and library services must be relevant to today's learners. Additionally, the interactions between educators and the students are what make the critical difference in the students' learning, and turn the library and classroom into places where they will find, assimilate, experience, and understand information. This book provides practical strategies for using pop culture and technology trends to connect with easily distracted middle and high school students and hold their attention. Author Linda D. Behen addresses why school libraries are in transition and why there is a need for dramatic change. She discusses the evolution of all libraries in response to digital content; ubiquitous mobile devices such as smart phones, iPads, and other tablet computers; patrons' changing interests; and the ways in which schools and school libraries have found to effectively adapt to technology changes and student needs. This

book is essential for middle and high school librarians and educators, library school students and instructors, and young adult public librarians.
