The Forgotten Rohingya: Their Struggle for Human Rights in Burma Habib Siddiqui, 2019 Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as settlers from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets? - Are restricted from traveling outside their villages? - Have no legal right to own land or property? - Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings? - Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan? - Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. The Forgotten Rohingya makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The

author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.

The Syntax Construction Kit Mark Rosenfelder, 2018-11 An accessible but incisive introduction to modern syntax and generative grammar, for conlangers and anyone interested in languages or linguistics. Syntax can be frustrating, because there are multiple schools that seem to fight over inessential things. I hope I can show you that this is normal for a new field, and that it actually makes syntax fun. New discoveries are being made, and you can participate- something that's a lot harder to do in, say, quantum mechanics. The emphasis here is on doing syntax-- learning how to make and how to evaluate syntactic arguments. What's in it? An introduction to the Chomsky Hierarchy, a classification of grammars that's used both in linguistics and computer science, as well as a comparison to other generative techniques, such as Markov text generators. A tour of Chomsky's methods- production rules and transformations- with overnight stays in the Syntactic Structures, X-bar, and Minimalist stages in his thought. A leisurely stroll through interesting bits of syntax: the English verbal complex, pronouns and other anaphors, relative clauses, quantifiers and more. The emphasis is on doing syntax- not just learning rules and drawing trees, but learning how syntactic arguments are made. An overview of alternatives to Chomsky's approach: generative syntax, cognitive linguistics, relational grammars, word grammar, construction grammar, Jackendoff's *Simpler Syntax*, and Comrie's universals. A chapter on production which asks, how real are these grammars? Do we really have syntactic categories and transformations in the brain, or in the genome? A chapter on how you can apply all this to your conlangs. The *Syntactic Bestiary*- an annotated list of transformations and constraints, which you can think about for conlanging, or use to evaluate syntactic theories. Plus, unlike most syntax textbooks, this one comes with a set of web toys so you can see the rules in action and write your own. It makes the ideas come alive much more than mere diagrams can.
