The Changing Frontier Adam B. Jaffe,Benjamin F. Jones,2015-08-24 In 1945, Vannevar Bush, founder of Raytheon and one-time engineering dean at MIT, delivered a report to the president of the United States that argued for the importance of public support for science, and the importance of science for the future of the nation. The report, Science: The Endless Frontier, set America on a path toward strong and well-funded institutions of science, creating an intellectual architecture that still defines scientific endeavor today. In The Changing Frontier, Adam B. Jaffe and Benjamin Jones bring together a group of prominent scholars to consider the changes in science and innovation in the ensuing decades. The contributors take on such topics as changes in the organization of scientific research, the geography of innovation, modes of entrepreneurship, and the structure of research institutions and linkages between science and innovation. An important analysis of where science stands today, The Changing Frontier will be invaluable to practitioners and policy makers alike.

  Discussing Trump's America Online Vera Slavtcheva-Petkova,2023-03-03 This book offers a novel, grounded-theory approach to the study of online comments about Donald Trump and the USA in countries with a turbulent relation with America: China, Mexico and Russia. Slavtcheva-Petkova advocates for a departure from Jürgen Habermas's public sphere and democratic deliberative

framework, introducing instead the concept of post-deliberative public spheres. The book provides a qualitative thematic analysis via the constant comparison method, coupled with quantitate content analysis of more than 2200 social media comments posted from Trump's election in 2016 until July 2020. Three empirical chapters are devoted to the countries under study, showing how it is possible to map the comments onto a spectrum of authoritarianism/censored media to democracy/free media. Slavtcheva-Petkova argues that existence and strength of an underpinning ideology and the scope that ideology leaves for constructive political discussions online is of key importance, exploring themes such as identity, patriotism and populism; democracy; power and responsibility. Timely and innovative, 'Trump's America Online' astutely displays how post-deliberative public spheres are valuable spaces for political talk despite the challenges they face across the globe.

   Greening Social Work Education Susan Hillock,2024-03-01 Despite urgent calls for global action, sustainable social work practice, and a solid "green" theoretical knowledge base, North American social work and helping professions have been slow to learn from community activists, acknowledge the international climate emergency, and act collectively to achieve climate justice. Greening Social Work Education examines how social work educators can best incorporate sustainability content into social work curricula, integrate green teaching methods, and mobilize students and colleagues towards climate action, justice, and leadership. Drawing on Canadian content, this collection highlights Indigenous, eco-feminist, collective-action, and multi-interdisciplinary approaches to social work. The book provides a rationale for why the topic of greening is important for social work and the helping professions; discussion of current debates, tensions, and issues; useful ideas related to innovative interdisciplinary theoretical approaches, analyses, and constructs; and practical recommendations for teaching green social work education. In doing so, Greening Social Work Education strives to help social workers and educators gain the confidence and tools they need to

transform their teaching and curricula.

The LearningWheel Deborah Kellsey,Amanda Taylor,2016-12-07 Given the
influence of digital technologies on the world at large education and
educators are yet again being forced to consider their educational practices.
Not all educators have been socialised professionally to use technologies and
therefore knowledge gaps exist. This book adds to emerging conversations
about the use of technologies to support and indeed replace traditional
teaching methodologies in a range of educational settings. It offers an
example of innovative approach 'LearningWheel' to bridge the afore mentioned
knowledge gap and provides an opportunity for readers to engage with
technologies for teaching and learning purposes. Beginning with an outline of
how technologies are shaping the learning landscape more broadly each
subsequent chapter takes on a layer of the LearningWheel and sets it in
context from a theoretical position. An example wheel is included in each
chapter, as are stop and pause questions to prompt educators to engage with
the content in a very real sense. By the end of the book readers will have
had the opportunity to connect with the LearningWheel (VCoP) in the
development of a Learning Wheel unique to this book.
