Legally Victimising National Monuments Dr. Krishan Mahajan,2018-05-30 Can Parliament and the Union Government deprive Indians of their cultural heritage right to monuments? How has this deprivation been achieved by using the legislative process? Has the judicial culture of the Supreme Court been able to return to Indians this cultural heritage right? Can nationally important monuments be protected in a contrary political economy? How to retrieve and restore to Indians the fundamental right to the distinct culture of monuments by understanding what a monument is?

Numerical Prediction of Flow, Heat Transfer, Turbulence and Combustion D. Brian Spalding,2015-07-14 Numerical Prediction of Flow, Heat Transfer, Turbulence and Combustion: Selected Works of Professor D. Brian Spalding focuses on the many contributions of Professor Spalding on thermodynamics. This compilation of his works is done to honor the professor on the occasion of his 60th birthday. Relatively, the works contained in this book are selected to highlight the genius of Professor Spalding in this field of interest. The book presents various research on combustion, heat transfer, turbulence, and flows. His thinking on separated flows paved the way for the multi-dimensional modeling of turbulence. Arguments on the universality of the models of turbulence and the problems that are associated with combustion engineering are clarified. The text notes the importance of combustion science as well as the problems associated with it. Mathematical computations are also presented in determining turbulent flows in different environments, including on curved pipes, curved ducts, and rotating ducts. These calculations are presented to further strengthen the claims of Professor Spalding in this discipline. The book is a great find for those who are interested in studying thermodynamics.

The State of the Nation Fali S. Nariman, 2013-05-01 A definitive, analytical and meticulous account of the present state of the nation – from a constitutional perspective – by one of India's most respected legal luminaries An ardent defender of the Constitution of India, Fali Nariman has today attained the status of an outstanding lawyer who strongly believes in the rule of the law and stands by his convictions. In this timely volume, the author highlights crucial issues that the legislature, the executive, judiciary, the bar and the common people have to deal with virtually on a day-to-day basis. His main focus is on corruption at various levels and in 'hallowed' institutions, including the judiciary. The author contends that the legislative and executive wings of the government – the elected representatives of the people – were (and are) expected to provide for the welfare of the people. He points out that they have failed miserably simply because making of laws is not enough; applying and enforcing laws – which are also the primary duties of the government – have left much to be desired. Consequently, it is the judiciary that tells the government when and how to distribute excess food, what crops to grow and what not to grow, which economic projects are good for the country and which are not, and what fuel should be used in our vehicles and whether 2G/3G licences should be allotted only through auctions! The judiciary is hence accused of overreach! The contents also throw light on other important subjects such as: the implications of reservations for certain sections of the population (including minorities); the true purpose and significance of the Constitution; Centre–State relations; and whether the Constitution has benefited the common people over the years. This is a book that is absorbing as well as thought-provoking that will make the readers put on their thinking caps.
