Its systematically designed and presented case studies delineate how both linguistic and cultural-social factors exert an influence on metonymic conceptualization, and demonstrate the importance of corpus data and quantitative methods in exploring and visualizing metonymic variation.

The China Horizon Weiwei Zhang, 2016-05-10 This is a book of China's own political narrative written by one of China's leading and best-known thinkers. It is the last part of the author's China Trilogy, which is a best-seller in China, with over one million copies sold. The book in itself is a centerpiece of the unfolding debate within China on the nature and future of the country and how it compares with the West. It addresses a hugely important issue of the day, i.e., in what way China is overtaking or may overtake the United States as the world's preeminent power. The author provides an original and thought-provoking study on how China has managed, through its own development model, to catch up and even surpass, to various extents, the United States, in terms of gross GDP, net household assets and social protection. The book elaborates on how China has engaged itself in reshaping its institutions to ensure its smooth rise, drawing on the strengths of its own traditions, socialist legacies and elements from the West. It analyzes the weakness of the Western political institutions and discusses how China has developed its own institutional edge over the West. The

author argues that as a civilizational state, China has evolved a logic of its own for development and its own political discourse which questions seriously many Western assumptions about democracy, good governance and universal values. The book recaptures the essence of China's past glory and discusses the horizon of the Chinese dream as well as how China should meet the various challenges ahead. It offers a unique and original perspective on the future of this coming superpower. Like *The China Wave*, this book is both discerning and provocative, and serves as a required reading for everyone concerned with the rise of China and its global implications. Contents: From Catching-Up to Surpassing From Myth to Truth Beyond the Western Institutions A New Political Discourse Glory and Dream of a Civilizational State Conclusion: The Logic of a Civilizational State Readership: Researchers, policy-makers, general readers interested in the rise of China, its model of development and its global impact.

Minor China Hentyle Yapp, 2021-03-12 In *Minor China* Hentyle Yapp analyzes contemporary Chinese art as it circulates on the global art market to outline the limitations of Western understandings of non-Western art. Yapp reconsiders the all-too-common narratives about Chinese art that celebrate the heroic artist who embodies political resistance against the authoritarian state. These narratives, as Yapp establishes, prevent Chinese art, aesthetics, and politics from being discussed in the West outside the terms of Western liberalism and notions of the “universal.” Yapp engages with art ranging from photography and performance to curation and installations to foreground what he calls the minor as method—tracking aesthetic and intellectual practices that challenge the predetermined ideas and political concerns that uphold dominant conceptions of history, the state, and the subject. By examining the minor in the work of artists such as Ai Weiwei, Zhang Huan, Cao Fei, Cai Guo-Qiang, Carol Yinghua Lu, and others, Yapp demonstrates that the minor allows for discussing non-Western art more broadly and for reconfiguring dominant political and aesthetic institutions and structures.

Cognitive Sociolinguistics Revisited Gitte Kristiansen, Karlien Franco, Stefano De Pascale, Laura Rosseel, Weiwei Zhang, 2021-11-22 *Cognitive Sociolinguistics* draws on the rich theoretical framework of Cognitive Linguistics and focuses on the social factors that underlie the variability of meaning and conceptualization. In the last decade, the field has expanded in various ways. The current volume takes stock of current and emerging advances in the field in short academic contributions. The studies collected in this book have a usage-based approach to language variation and change, drawing on the theoretical framework of Cognitive Linguistics and are sensitive to social variation, be

it cross-linguistic or language-internal. Three types of contributions are collected in this book. First, it contains theoretical overview papers on the domains that have witnessed expansion in recent years. Second, it presents novel research ideas in proof-of-concept contributions, aimed at blue-sky research and out-of-the-box linguistic analyses. Third, it showcases recent empirical studies within the field. By combining these three types of contributions, the book provides an encompassing overview of novel developments in the field of Cognitive Sociolinguistics.

Contemporary Chinese Art, Aesthetic Modernity and Zhang Peili Paul Gladston, 2019-10-17 In recent decades the previously assumed dominance within the international art world of western(ized) conceptions of aesthetic modernity has been challenged by a critically becalming diversification of cultural outlooks widely referred to as 'contemporaneity'. Contributing to that diversification are assertions within mainland China of essential differences between Chinese and western art. In response to the critical impasse posed by contemporaneity, Paul Gladston charts a historical relay of mutually formative interactions between the artworlds of China and the West as part of a new transcultural theory of artistic criticality. Informed by deconstructivism as well as syncretic Confucianism, Gladston extends this theory to a reading of the work of the artist Zhang Peili and his involvement with the Hangzhou-based art group, the Pond Association (Chi she). Revealed is a critical

aesthetic productively resistant to any single interpretative viewpoint, including those of Chinese exceptionalism and the supposed immanence of deconstructivist uncertainty. Addressing art in and from the People's Republic of China as a significant aspect of post-West contemporaneity, Gladston provides a new critical understanding of what it means to be 'contemporary' and the profound changes taking place in the art world today.

The Ancient Ship Wei Zhang, 2009-10-13 Originally published in 1987, two years before the Tiananmen Square protests, Zhang Wei's award-winning novel is the story of three generations of the Sui, Zhao, and Li families living in the fictional northern town of Wali during China's troubled postliberation years. Spanning four decades following the creation of the People's Republic in 1949, *The Ancient Ship* is a bold examination of a society in turmoil, the struggle of oppressed people to control their own fate, and the clash between tradition and modernization. In the course of the narrative, the townspeople of Wali face the moments that have defined China's history during the latter part of the twentieth century: the land reform programs, the famine of 1959-1961, the Great Leap Forward, the Anti-Rightist Campaign, and the Cultural Revolution. Translated into English for the very first time, *The Ancient Ship* is a revolutionary work of Chinese fiction that speaks to people across the globe.

After the Internet, Before Democracy Johan Lagerkvist, 2010 China has lived with the Internet for nearly two decades. Will increased Internet use, with new possibilities to share information and discuss news and politics, lead to democracy, or will it to the contrary sustain a nationalist supported

authoritarianism that may eventually contest the global information order? This book takes stock of the ongoing tug of war between state power and civil society on and off the Internet, a phenomenon that is fast becoming the centerpiece in the Chinese Communist Party's struggle to stay in power indefinitely. It interrogates the dynamics of this enduring contestation, before democracy, by following how Chinese society travels from getting access to the Internet to our time having the world's largest Internet population. Pursuing the rationale of Internet regulation, the rise of the Chinese blogosphere and citizen journalism, Internet irony, online propaganda, the relation between state and popular nationalism, and finally the role of social media to bring about China's democratization, this book offers a fresh and provocative perspective on the arguable role of media technologies in the process of democratization, by applying social norm theory to illuminate the competition between the Party-state norm and the youth/subaltern norm in Chinese media and society.
