The Chinese Language John DeFrancis,1986-03-01 DeFrancis's book is first rate. It entertains. It teaches. It demystifies. It counteracts popular ignorance as well as sophisticated (cocktail party) ignorance. Who could ask for anything more? There is no other book like it. ... It is one of a kind, a first, and I would not only buy it but I would recommend it to friends and colleagues, many of whom are visiting China now and are adding 'two-week-expert' ignorance to the two kinds that existed before. This is a book for everyone. --Joshua A. Fishman, research professor of social sciences, Yeshiva University, New York Professor De Francis has produced a work of great effectiveness that should appeal to a wide-ranging audience. It is at once instructive and entertaining. While being delighted by the flair of his novel approach, the reader will also be led to ponder on some of the most fundamental problems concerning the relations between written languages and spoken languages. Specifically, he will be served a variety of information on the languages of East Asia, not as dry pedantic facts, but as appealing tidbits that whet the intellectual appetite. The expert will find much to reflect on in this book, for Professor DeFrancis takes nothing for granted. --William S.Y. Wang, professor of linguistics, University of California at Berkeley

Excerpt: ...one, two or more objects in a picture suggest another. In Chwen chu turn the explanation, we have a change in the meaning accompanying

a change in the posture of the figures. In Hiai sheng we have the borrowing of a word symbol already in use, to be the symbol of another word like it in sound. An additional mark helps to indicate the new word symbolized. Hie agree. Sheng sound. In Kia tsie we have borrowing without an additional mark. As in r nii woman, used for thou, because both were called nu or nok. The six principles may be reduced to three. First, pictures of objects. Second, pictures suggestive of ideas, words or things, including the first, third, and fourth principles. Third, borrowing symbols on the ground of phonetic identity, including the fifth and sixth principles. Examples Of Chi' Shi. 5 heaven. Sw says from--yi one, ta great. Tt says, with more probability, that it is a picture of an idea. Three concave lines horizontal and parallel represent heaven in one old form. Tan H sunrise. The sun rising. Here the single stroke is the horizon. The sunrise is named tan from its redness. Tan red is applied, among other things, to the golden elixir, which was cinnabar, called kin tan, sien tan, elixir of the immortals, elm sha red sand, etc. The reference here is to red oxide of mercury. The medical properties of mercury, and its assumption of a liquid form at low temperature, led the ancient Chinese alchemists to believe that in it was concealed the elixir of life. Evening, si, zik, dik, is suggested by the half-moon just seen. TM A boundary between fields is represented by two fields placed...

Analysis of Chinese Characters G. D. Wilder, J. H. Ingram, 2014-08-23 An excerpt from "INTRODUCTION TO ANALYSIS OF CHINESE CHARACTERS" THE author of the great Chinese English dictionary Mr. Giles, has not hesitated to express most trenchantly his contempt of etymology as it has been applied to Chinese Characters. He says that Much of the etymology of the Shuo Wen is childish in the extreme, and that the phonetic principle of combination is the only one of which we can pretend to know anything. Notwithstanding the ridicule heaped upon it, scholars, like Chalmers, Chalfant, Wieger and others have continued to pursue the fascinating study of the origin of these symbols and have given us most interesting results. These results are so convincing that in the teaching of character writing we have unhesitatingly adopted the principle that the etymology of the earliest Chinese writers on the subject, childish though it may often be and fanciful, is yet superior to the numerous mnemonics that have been invented by foreign students to assist in the difficult task of memorizing the forms of a few thousand characters. The student of these pages may often consider the etymology suggested fanciful and the logic of the combinations farfetched but the following consideration should be borne in mind. They are the products of Chinese fancy and imagination and to some extent show the workings of the Chinese mind. Therefore they interest us who are students of Chinese thought. Moreover they often may only seem to be fanciful because we are ignorant of the ancient customs out of which they arise, or of the forms of the utensils of which they are pictures, or of the variations of pronunciation in the different dialects. If any one of us were entrusted with the task of inventing written symbols for both concrete objects and abstract ideas it is doubtful if we would produce anything much less fanciful and we certainly could produce nothing of such rich historic interest, as certainly invests the 3000 most primitive characters. Writing Chinese characters is a task of memory. Modern pedagogy insists on the value of logical or even fanciful links between ideas for fixing them in mind. Those who try to learn Chinese characters almost invariably grope for some association of ideas, some logic in the formation by which to hold them in memory. We have no doubt that the groupings which have been arrived at already by a study of the ancient inscriptions of the early seal writings and etymologies are more interesting, more logical, and wider in range than any memory system that has been or can be invented by the superficial study of the characters as written with the modern Chinese pen. These etymological studies enlist the interest of the historic imagination to aid the dry-as-dust task of committing to memory these curious symbols of the thought of three or four millenniums....

China in Symbolic Communication Sui Yan, 2017-07-31 What kinds of human individuals, events, things and commodities can best represent China? How have those representative symbols evolved in Chinese history? How have they been highlighted, disseminated and accepted? In this book, a full range of symbols and seemingly discrete social phenomena, hidden in diverse fields of Chinese society, are given lucid explanations based on the interdisciplinary theories of semiotics and communication. It studies the evolution of classic Chinese symbols through history and investigates the root

causes for the communication of negative Chinese images in modern times. Besides, this book explicates the pattern of interaction between groups communication and mass communication in the Chinese society by exploring the different paths of transmutation and communication for the symbol of the APEC Blue. How the image of China is constructed via non-government symbols is also addressed. By pointing out that classic semiotics has been reduced to an embarrassing dilemma of a severe lack of historical sense, this book seeks to make Western semiotic findings bear closely on Chinese social reality and accomplish an updated contribution to this academic discipline. This book will appeal to scholars and students of semiotics and communication. Readers who are interested in modern Chinese society will also benefit from it.
