A Romantic Story of Celt Cheng-Zhong Su,2007 Before Christianity reached the Celtic territory, a rich landlord Dinkins had many women. The one he loved mostly was called Sophia. Sophia loved him too. One day, Dinkins saved a pretty girl named Vipy, in a wild mountain pass. Since she was homeless, Dinkins kept her living with him. They lived happily, before a Christian apostle Farley told Dinkins that he was bewitched by a monster. Farley gave him a cross and told him that it could protect him from danger. Soon, Dinkins found Vipy was in fact a werewolf under a beautiful skin. The cross though worked a little but it wasn't enough as protecting him and it revealed his unfaithfulness to their love. It rouse Vipy's wrath. As a monster, she didn't know how to win the heart of a human being so she gouged out Dinkins'; physical heart and left him dead. Sophia turned to Farley for help. Farley killed the werewolf but he could not return the life of Dinkins; only Death had the power to do it. After being humiliated and insulted by the Death, Sophia did have her husband's heart back and saved him. When Dinkins revived and was told what Farley had done for him, he donated all his property to church. For this reason, many years late, when his son Xu grew up, the family was poor and no girl wanted to marry him. At Lughnasadh (a Celtic festival), Xu met a beautiful girl. In despite of many pursuers, she loved him. Xu was exited and worried by this unmatched love but his sister warned him that the girl might be another monster like Vipy. She told him a good method to test it. At the night of Halloween, Celt used to drink whisky with pumpkin, for it was the poison of monsters; the smell could protect innocent people from them. The sister told her brother to drink it with the suspected girl at that night.

The Chinese Face of Jesus Christ: Roman Malek,2017-07-05 This volume provides an annotated bibliography of the Western and Chinese literature on Jesus Christ in China. It is a sequel to the interdisciplinary collection on the manifold faces and images of Jesus throughout Chinese history, from the Tang dynasty (618?907) to the present time.The present bibliography broadens and deepens the above-mentioned subject matter, and also points out aspects which have been addressed in the contributions and anthologies of the

previous volumes of *The Chinese Face of Jesus Christ*, but which have not been treated thoroughly. Another aim of this bibliography is to initiate and enable further research, particularly in China. It includes bibliographical data from the beginning of the introduction of Christianity to China until the year 2013, occasionally also until 2014. A list of 'Key References' enables the reader to identify important works on main topics related to Jesus Christ in China. Some examples of book covers and title pages are included in the section of 'Illustrations.' Other volumes of the collection *The Chinese Face of Jesus Christ* are in preparation: Vol. 3c will present longer quotations from the sources listed in the present bibliography, Vol. 4b will contain a general index with glossary, and Vol. 5 will deal with the iconography of Jesus Christ in China.

Popular Culture Co-Productions and Collaborations in East and Southeast Asia Eyal Ben-Ari, Nissim Otmazgin, 2012-10-01 This wide-ranging volume is the first to examine the characteristics, dynamics and wider implications of recently emerging regional production, dissemination, marketing and consumption systems of popular culture in East and Southeast Asia. Using tools based in a variety of disciplines - organizational analysis and sociology, cultural and media studies, and political science and history - it elucidates the underlying cultural economics and the processes of region-wide appropriation of cultural formulas and styles. Through discussions of Japanese, Chinese, Korean, Philippine and Indonesian culture industries, the authors in the book describe a major shift in Asia's popular culture markets toward arrangements that transcend autonomous national economies by organizing and locating production, distribution, and consumption of cultural goods on a regional scale. Specifically, the authors deal with patterns of co-production and collaboration in the making and marketing of cultural commodities such as movies, music, comics, and animation. The book uses case studies to explore the production and exploitation of cultural imaginaries within the context of intensive regional circulation of cultural commodities and images. Drawing on empirically-based accounts of co-production and collaboration in East and Southeast Asia's popular culture, it adopts a regional framework to analyze the complex interrelationships among cultural industries. This focus on a regional economy of transcultural production provides an important corrective to the limitations of previous studies that consider cultural products as text and use them to investigate the meaning of popular culture.

Terrorism Subdues Now Save the Planet John Landis, 2005 For many people in this Planet, World Government under the United Nations is a long-standing dream. But will it ever become reality? There are now indications that a number of people and institutions around the globe, indeed, believe that it will. A few examples to illustrate this: Kofi Annan, Secretary General of the United Nations' recent pronouncement – fifty billion dollars... (from developed nations) would be a start in lifting the poorer nations of the world from their impoverishment. [The start if redistribution of world wealth through the United Nations] Next, a Green Party manifesto in part . . . humans have a unique responsibility for the stewardship of the Earth. No species, especially on the upper end o the food chain can have unchecked,

exponential growth without depleting the Earth's carrying capacity. [Planned World Population Control] . . . consumption – oriented lifestyles that have evolved in the industrial world have resulted in a minority of people consuming a majority of resources. [A call for world resource sharing in a more egalitarian world society] The author excepts the premise that World Government becoming reality for the purposes of this novel [poetic license, you know]. But its primary emphasis herein focuses on World Government's effects on the lives of people as the action ebbs and flows around the globe. Rich characters enliven the plot with nations and political systems in conflict making this a thrilling journey, one filled with suspense and many surprises for the readers enjoyment.

Technology and Medicine Bengt Nielsen, 2023-10-03 Taking a holistic approach, this book describes the developments in medicine and medical technology from ancient times to modern days. It is an exciting journey where readers will learn about the many great inventions by people that did not take the knowledge of their times as a fact. They challenged mysticism, beliefs, the religion, and the Church. They were true scientists long before we knew how to define what a scientist is. This book is, in a way, connecting the dots between the past and the future within healthcare. Features *

- Provides details on further developments that gave new and exceptional information for diagnostic or therapeutic purposes
- Gives the reader a new perspective and a common thread of life on medicine and MedTech as well as an improved understanding of how far we have come and how much there still is to work on before we fully understand the human body and its functionality
- Discusses and gives insight into ongoing research projects that could become clinically available in the future

Innovative Data Integration and Conceptual Space Modeling for COVID, Cancer, and Cardiac Care Amy Neustein, Nathaniel Christen, 2022-01-18 In recent years, scientific research and translation medicine have placed increased emphasis on computational methodology and data curation across many disciplines, both to advance underlying science and to instantiate precision-medicine protocols in the lab and in clinical practice. The nexus of concerns related to oncology, cardiology, and virology (SARS-CoV-2) presents a fortuitous context within which to examine the theory and practice of biomedical data curation. Innovative Data Integration and Conceptual Space Modeling for COVID, Cancer, and Cardiac Care argues that a well-rounded approach to data modeling should optimally embrace multiple perspectives inasmuch as data-modeling is neither a purely formal nor a purely conceptual discipline, but rather a hybrid of both. On the one hand, data models are

designed for use by computer software components, and are, consequently, constrained by the mechanistic demands of software environments; data modeling strategies must accept the formal rigors imposed by unambiguous data-sharing and query-evaluation logic. In particular, data models are not well-suited for software-level deployment if such models do not translate seamlessly to clear strategies for querying data and ensuring data integrity as information is moved across multiple points. On the other hand, data modeling is, likewise, constrained by human conceptual tendencies, because the information which is managed by databases and data networks is ultimately intended to be visualized/utilized by humans as the end-user. Thus, at the intersection of both formal and humanistic methodology, data modeling takes on elements of both logico-mathematical frameworks (e.g., type systems and graph theory) and conceptual/philosophical paradigms (e.g., linguistics and cognitive science). The authors embrace this two-sided aspect of data models by seeking non-reductionistic points of convergence between formal and humanistic/conceptual viewpoints, and by leveraging biomedical contexts (viz., COVID, Cancer, and Cardiac Care) so as to provide motivating examples and case-studies in this volume. Provides an analysis of how conceptual spaces and related cognitive linguistic approaches can inspire programming and query-processing models Outlines the vital role that data modeling/curation has played in significant medical breakthroughs Presents readers with an overview of how information-management approaches intersect with precision medicine, providing case studies of data-modeling in concrete scientific practice Explores applications of image analysis and computer vision in the context of precision medicine Examines the role of technology in scientific publishing, replication studies, and dataset curation

Introduction to Privacy Enhancing Technologies Carlisle Adams,2021-10-30 This textbook provides a unique lens through which the myriad of existing Privacy Enhancing Technologies (PETs) can be easily comprehended and appreciated. It answers key privacy-centered questions with clear and detailed explanations. Why is privacy important? How and why is your privacy being eroded and what risks can this pose for you? What are some tools for protecting your privacy in online environments? How can these tools be understood, compared, and evaluated? What steps can you take to gain more control over your personal data? This book addresses the above questions by focusing on three fundamental elements: It introduces a simple classification of PETs that allows their similarities and differences to be highlighted and analyzed; It describes several specific PETs in each class, including both foundational technologies and important recent additions to the field; It explains how to use this classification to determine which privacy goals are actually achievable in a given real-world environment. Once the goals are known, this allows the most appropriate PETs to be selected in order to add the desired privacy protection to the target environment. To illustrate, the book examines the use of PETs in conjunction with various security technologies, with the legal infrastructure, and with communication and

computing technologies such as Software Defined Networking (SDN) and Machine Learning (ML). Designed as an introductory textbook on PETs, this book is essential reading for graduate-level students in computer science and related fields, prospective PETs researchers, privacy advocates, and anyone interested in technologies to protect privacy in online environments.
