Post Traumatic Stress Disorders in a Global Context Md, PhD, Emilio Ovuga, 2012-01-20 If, as a health care or social service provider, one was called upon to help someone who has experienced terror in the hands of a hostage taker, an irate and chronically abusive spouse or parent, or a has survived a motor vehicle accident, landslide, earthquake, hurricane or even a massive flood, what would be one's priority response? What would be considered as the most pressing need of the individual requiring care? Whatever the answer to each of these questions, people who have experienced terror, suffer considerable psychological injury. Post-Traumatic Stress Disorder in a Global Context offers some answers to meet the needs of health care and social service providers in all settings, whether in a hospital emergency room, at the war front, or natural disaster site. The take home message is, after providing emergency care, there is always a pressing need to provide mental health care to all victims of traumatic stress.

Data Processing Techniques and Applications for Cyber-Physical Systems (DPTA 2019) Chuanchao Huang, Yu-Wei Chan, Neil Yen, 2020-02-03 This book covers cutting-edge and advanced research on data processing techniques and applications for Cyber-Physical Systems. Gathering the proceedings of the International Conference on Data Processing Techniques and Applications for Cyber-Physical Systems (DPTA 2019), held in Shanghai, China on November 15-16, 2019, it examines a wide range of topics, including: distributed processing for sensor data in CPS networks; approximate reasoning and pattern recognition for CPS networks; data platforms for efficient integration with CPS networks; and data security and privacy in CPS networks. Outlining promising future research directions, the book offers a valuable resource for students, researchers and professionals alike, while also providing a useful reference guide for newcomers to the field.

**Advanced Parallel Processing Technologies** Chenggang Wu, Albert Cohen, 2013-11-26 This book constitutes the refereed post-proceedings of the 10th International Symposium on Advanced Parallel Processing Technologies, APPT 2013, held in Stockholm, Sweden, in August 2013. The 30 revised full papers presented were carefully reviewed and selected from 62 submissions. The papers cover a wide range of topics capturing some of the state of the art and practice in parallel architecture, parallel software, concurrent and distributed systems, and cloud computing, with a highlight on computing systems for big data applications.

**Cities Surround The Countryside** Robin Visser, 2010-04-12 Denounced as parasitical under Chairman Mao and devalued by the norms of traditional Chinese ethics, the city now functions as a site of individual and collective identity in China. Cities envelop the countryside, not only geographically and demographically but also in terms of cultural impact. Robin Visser illuminates the cultural dynamics of three decades of radical urban development in China. Interpreting fiction, cinema, visual art, architecture, and urban design, she analyzes how the aesthetics of the urban environment have shaped the emotions and behavior of people and cultures, and how individual and collective images of and practices in the city have produced urban aesthetics. By relating the built environment to culture, Visser situates postsocialist Chinese urban aesthetics within local and global economic and intellectual trends. In the 1980s, writers, filmmakers, and artists began to probe the contradictions in China's urbanization policies and rhetoric. Powerful neorealist fiction, cinema, documentaries, paintings, photographs, performances, and installations contrasted forms of glittering urban renewal with the government's inattention to a livable urban infrastructure. Narratives and images depicting the melancholy urban subject came to illustrate ethical quandaries raised by urban life. Visser relates her analysis of this art to major transformations in urban planning under global neoliberalism, to the development of cultural studies in the Chinese academy, and to ways that specific cities, particularly Beijing and Shanghai, figure in the cultural imagination. Despite the environmental and cultural destruction caused by China's neoliberal policies, Visser argues for the emergence of a new urban self-awareness, one that offers creative resolutions for the dilemmas of urbanism through new forms of intellectual engagement in society and nascent forms of civic governance.

**Sizhu Instrumental Music of South China** Alan Robert Thrasher, 2008 According to a reader's report, this is one of the finest studies on (any kind of) Chinese music to emerge in recent years. Based on extensive fieldwork and a thorough knowledge of the scholarly literature, the author examines the theoretical underpinnings of the 'silk and bamboo' instrumental ensemble traditions of the Chaozhou, Hakka and Cantonese peoples of South China. Stepping back far into history, the book opens with a penetrating examination of Confucian theory, the ancient corpus of behavioral doctrine which promoted music as a means of achieving social harmony and which, together with Daoist belief, exercised unusually strong influence over common-practice music and aesthetics. This is followed by a rigorous analysis of the music itself, focusing upon linear and modal structures and performance styles which reflect a fascinating mix of ancient ideologies and more recent influences.

**Child and Youth Well-being in China** Lijun Chen, Dali L. Yang, Di Zhou, Qiang Ren, 2018-12-13 The true measure of any society is how it treats its children, who are in turn that society's future. Making use of data from the longitudinal Chinese Family Panel Studies survey, the authors of this timely study provide a multi-faceted description and analysis of China's younger generations. They assess the economic, physical, and social-emotional well-being as well as the cognitive performance and educational attainment of China's children and youth. They pay special attention to the significance of family and community contexts, including the impact of parental absence on millions of left-behind children. Throughout the volume, the authors delineate various forms of disparities, especially the structural inequalities maintained by the Chinese Party-state and the vulnerabilities of children and youth in fragile families and communities. They also analyze the social attitudes and values of Chinese youth. Having grown up in a period of sustained prosperity and greater individual choice, the younger Chinese cohorts are more independent in spirit, more open-minded socially, and significantly less deferential to authority than older cohorts. There is growing recognition in China of the importance of investing in children's future and of helping the less advantaged. Substantial improvements in child and youth well-being have been achieved in a time of growing economic prosperity. Strong political commitment is needed to sustain existing efforts and to overcome the many obstacles that remain. This book will be of considerable interest to researchers of Chinese society and development.

*Legislation, Technology and Practice of Mine Land Reclamation* Zhenqi Hu, 2014-09-23 Legislation, Technology and Practice of Mine Land Reclamation contains the proceedings of the Beijing International Symposium on Land Reclamation and Ecological Restoration (LRER 2014, Beijing, China, 16-19 October 2014). The contributions cover a wide range of topics: - Monitoring, prediction and assessment of environmental damage in mining areas - S

**Intelligent Computing Theories and Application** De-Shuang Huang, Kang-Hyun Jo, Jianqiang Li, Valeriya Gribova, Vitoantonio Bevilacqua, 2021-08-09 This two-volume set of LNCS 12836 and LNCS 12837 constitutes - in conjunction with the volume LNAI 12838 - the refereed proceedings of the 17th International Conference on Intelligent Computing, ICIC 2021, held in Shenzhen, China in August 2021. The 192 full papers of the three proceedings volumes were carefully reviewed and selected from 458 submissions. The ICIC theme unifies the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. The theme for this conference is "Advanced Intelligent Computing Methodologies and Applications." The papers are organized in the following

subsections: Evolutionary Computation and Learning, Image and signal Processing, Information Security, Neural Networks, Pattern Recognition Swarm Intelligence and Optimization, and Virtual Reality and Human-Computer Interaction.

**Childhood Adversity and Developmental Effects** Lisa Albers Prock, 2015-04-15 Child trauma and violence is not an issue that is constrained to one nationality or one ethnicity. A staggering number of children around the world are subjected to violence and abuse, both domestic and political. The current volume examines the issue of developmental trauma from a variety of viewpoints, including sociological, epidemiological, genetic, and psychiatric. The chapters contained within are broken into the following sections: Child neglect and violence from an international perspective The effects of war and armed conflict on children's health and development The impact of childhood trauma on mental and physical health into adulthood Case studies of interventions that provide possibilities for treatment in a variety of different contexts Written by a researcher from Harvard Medical School and Children's Hospital (Boston), this book provides an important resource for understanding violence as an almost ubiquitous presence in children's lives around the world, as well as offering directions for treatment and interventions. This book is an important resource for researchers, counselors, psychologists, child advocates, and anyone who seeks to understand how adversity in childhood affects a person's entire life.

Computational Systems Bioinformatics Peter Markstein, Ying Xu, 2006 This volume contains about 40 papers covering many of the latest developments in the fast-growing field of bioinformatics. The contributions span a wide range of topics, including computational genomics and genetics, protein function and computational proteomics, the transcriptome, structural bioinformatics, microarray data analysis, motif identification, biological pathways and systems, and biomedical applications. There are also abstracts from the keynote addresses and invited talks. The papers cover not only theoretical aspects of bioinformatics but also delve into the application of new methods, with input from computation, engineering and biology disciplines. This multidisciplinary approach to bioinformatics gives these proceedings a unique viewpoint of the field. Sample Chapter(s). Chapter 1: Exploring the Ocean's Microbes: Sequencing the Seven Seas (122 KB). Contents: Exploring the Ocean's Microbes: Sequencing the Seven Seas (M E Frazier et al.); Protein Network Comparative Genomics (T Ideker); Bioinformatics at Microsoft Research (S Mercer); Protein Fold Recognition Using Gradient Boost Algorithm (F Jiao et al.); Efficient Annotation of Non-Coding RNA Structures Including Pseudoknots via Automated Filters (C Liu et al.); Efficient Generalized Matrix Approximations for Biomarker Discovery and Visualization in Gene Expression Data (W Li et al.); Sorting Genomes by Translocations and Deletions (X Qi et al.); Detection of Cleavage Sites for HIV-1 Protease in Native Proteins (L You); Identifying Biological Pathways via Phase Decomposition and Profile Extraction (Y Zhang & Z Deng); Complexity and Scoring Function of MS/MS Peptide De Novo Sequencing (C Xu & B Ma); Simulating In Vitro Epithelial Morphogenesis in Multiple Environments (M R Grant et al.); and other papers. Readership: Research and application community in bioinformatics, systems biology, medicine, pharmacology and biotechnology. A useful reference for graduate researchers in bioinformatics and computational biology.

**A Cultural History of the Chinese Language** Sharron Gu, 2011-12-22 Chinese, one of the oldest active languages, evolved over 5,000 years. As such, it makes for a fascinating case study in the development of language. This cultural history of Chinese demonstrates that the language grew and responded to its music and visual expression in a manner very similar to contemporary English and other Western languages. Within Chinese cultural history lie the answers to numerous questions that have haunted scholars for decades: How does language relate to worldview? What would happen to law after its language loses absolute binding power? How do music, visual, and theatrical images influence literature? By presenting Chinese not as a system of signs but as the history of a community, this study shows how language has expanded the scope of Chinese imagination and offers a glimpse into the future of younger languages throughout the world.

*Social and Economic Transitions in China and India* Keerty Nakray, Zhang Yi, John Clammer, Wenjuan Zhang, 2022-11-09 This book conducts a comparative analysis of social and economic changes in the welfare state transformations in China and India, at national and sub-national levels. Discussions are made based on impacts from the social and economic changes in the last century and the fourth industrial revolution on welfare state transformations in China and India, the world's two largest countries in terms of population and density. First-hand empirical work is conducted by a group of scholars from India and China, which draws on inter-disciplinary and cross-cultural academic traditions to deepen social, cultural and legal understanding between the two countries. This book would appeal to undergraduate and graduate students in comparative sociology, political science, law and comparative welfare studies as well as researchers in these fields, as well as researchers in policy think-tanks and research institutes and officials in government and non-governmental organizations.

**Distributed Communities on the Web** John Plaice, Peter Kropf, Peter Schulthess, Jacob Slonim, 2003-08-02 This book constitutes the thoroughly refereed post-proceedings of the 4th International Workshop on Distributed Communities on the Web, DCW 2002, held in Sydney, Australia in April 2002. The 25 revised full papers presented together with an introductory overview and outline of the field were carefully reviewed and selected from 59 submissions. The papers are organized in topical sections on adaptive networks, collaborative systems, languages for the Web, and adaptive distributed systems.

**Cellular Migration and Formation of Axons and Dendrites** Bin Chen, Kenneth Y. Kwan, 2020-05-29 Cellular Migration and Formation of Neuronal Connections, Second Edition, the latest release in the Comprehensive Developmental Neuroscience series, presents the latest information on the genetic, molecular and cellular mechanisms of neural

development. This book provides a much-needed update that underscores the latest research in this rapidly evolving field, with new section editors discussing the technological advances that are enabling the pursuit of new research on brain development. This volume focuses on the formation of axons and dendrites and cellular migration. Features leading experts in various subfields as section editors and article authors Presents articles that have been peer reviewed to ensure accuracy, thoroughness and scholarship Includes coverage of mechanisms which regulate the formation of axons and dendrites and cellular migration Covers neural activity, from cell-intrinsic maturation, to early correlated patterns of activity

Embracing the Song of Term: An Mental Symphony within **Xueyi Wang**

In a world consumed by monitors and the ceaseless chatter of quick interaction, the melodic splendor and emotional symphony developed by the written word frequently disappear into the backdrop, eclipsed by the relentless noise and disruptions that permeate our lives.
