Dictionary of Contemporary Chinese Military History Larry M. Wortzel, 1999-09-30 Tracking the evolution of the Red Army through the war against Japan and the Chinese civil war, Wortzel's book provides a comprehensive basic reference focusing on the major events, people, and issues that have produced the historical legacy of the People's Liberation Army. Placing contemporary Chinese military history in the context of China's 19th century clashes with the West and Japan, Wortzel illustrates how the imposition of unequal treaties by foreign powers conditioned China's 20th century defense forces and actions and explains how the Communist military forces developed. It also shows how fractionalization in the Communist military leadership led to the Cultural Revolution and Mao Zedong's purges. Drawing on a substantial number of sources available only in Chinese as well as on English-language secondary sources, the book provides a basic reference aimed at orienting the nonspecialist to the significant events and people in China's recent military history. The book will also provide a quick reference for the specialist in Chinese history.

Historical Dictionary of Hong Kong Cinema Lisa Odham Stokes, Rachel Braaten, 2020-01-15 Hong Kong cinema began attracting international attention in the 1980s. By the early 1990s, Hong Kong had

become Hollywood East as its film industry rose to first in the world in per capita production, was ranked second to the United States in the number of films it exported, and stood third in the world in the number of films produced per year behind the United States and India. This second edition of Historical Dictionary of Hong Kong Cinema contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 600 cross-referenced entries on directors, producers, writers, actors, films, film companies, genres, and terminology. This book is an excellent resource for students, researchers, and anyone wanting to know more about Hong Kong cinema.

Medieval Animals on the Move László Bartosiewicz, Alice M. Choyke, 2021-02-24 This book investigates relations between humans and animals over several centuries with a focus on the Middle Ages, since important features of our perceptions regarding animals have been rooted in that period. Elucidating various aspects of medieval human-animal relationships requires transdisciplinary discourse, and so this book aims to reconcile the materiality of animals with complex cultural systems illustrating their subtle transitions 'between body and mind'.

Fan Ye's Book of Later Han (Houhanshu), 2023-07-31 The Book of Later Han (Houhanshu) by Fan Ye (398-445) is enormously important as China's most complete work on Eastern Han history in biographical form. For the first time in any Western language, the author introduces Fan Ye's magnificent writings in lively translation with rich annotation and informative and insightful commentary. This first volume covers its early military history and highlights the lives and achievements of the twenty-eight generals who helped Emperor Guangwu unify China and establish the Eastern Han dynasty. Also included are images of these twenty-eight founding fathers, maps, and information related to early Eastern Han systems.

The Battle for Manchuria and the Fate of China Harold M. Tanner, 2013-03-18 "A well-organized and excellently researched work" (H-War) on one of the crucial battles of China's civil war. In the spring of 1946, Communists and Nationalist Chinese were battled for control of Manchuria and supremacy in the civil war. The Nationalist attack on Siping ended with a Communist withdrawal, but further pursuit was halted by a ceasefire brokered by the American general, George Marshall. Within three years, Mao Zedong's troops had captured Manchuria and would soon drive Chiang Kai-shek's forces off the mainland. Did Marshall, as Chiang later claimed, save the Communists and determine China's fate? Putting the battle into the context of the military and political struggles fought, Harold M. Tanner casts light on all sides of this historic confrontation and shows how the outcome has been, and continues to be, interpreted to suit the needs of competing visions of China's past and future. "A

genuine addition to our knowledge about this battle and the Chinese civil war in general.” —Mark Wilkinson, Virginia Military Institute

Deng Xiaoping Michael Dillon, 2014-10-27 One of the most important figures in global politics during the second half of the 20th century; Deng Xiaoping is generally considered the central figure behind China's economic liberalization programme that produced historically unprecedented growth rates and development beginning in the late 1970s. Lifting nearly a billion people out of poverty, Deng Xiaoping's 'Four Modernisations' called for reform in agriculture, industry, military, and science and technology. Today these reforms are considered to be the crucial turning point in modern Chinese history, enabling China to effectively harness its previously-latent power in its quest to become a global economic superpower. Just ten years after this tremendous achievement, Deng's brutal suppression of the democracy movement at Tiananmen Square severely undermined his international and domestic reputation. To explain the seeming contradictions between Deng Xiaoping's desire for economic liberalization and political conservatism, Michael Dillon's biography utilizes recently-released Chinese sources to detail Deng Xiaoping's emergence from a minority, second-class community in the Sichuan province, via education in France, to his meteoric rise to the top of the CCP's political hierarchy, illustrating the ways in which his life of struggle and survival shaped his political career. Dillon's biography addresses Xiaoping as both an intensely committed communist capable of playing a principal role in the Great Leap Forward from 1958 to 1961, while incurring the wrath of Mao only ten years later as he was exiled and purged during the Cultural Revolution. Emphasizing Deng Xiaoping's effectiveness as a party operator and political bruiser rather than an intellectual capable of formulating the reforms for which he eventually took credit, this book sheds light on Deng's ability to capitalize upon the planning expertise of other party members. This biography of the central figure in China's economic liberalization is essential for any reader interested in or affected by China's rise to global prominence.

Nochimson, 2016-01-26 With 25 essays that embrace a wide spectrum of topics and perspectives including intertextuality, transnationality, gender representation, repetition, the use of music, color, and sound, depiction of time and space in human affairs, and Wong's highly original portrayal of violence, *A Companion to Wong Kar-Wai* is a singular examination of the prestigious filmmaker known around the world for the innovation, beauty, and passion he brings to filmmaking. Brings together the most cutting edge, in-depth, and interesting scholarship on arguably the greatest living Asian filmmaker, from a multinational group of established and rising film scholars and critics Covers a huge breadth of topics such as the tradition of the jianghu in Wong's films; queering Wong's films not in terms of gender but through the artist's liminality; the phenomenological Wong; Wong's intertextuality; America through Wong's eyes; the optics of intensities, thresholds, and transfers of energy in Wong's cinema; and the diasporic presence of some ladies from Shanghai in Wong's Hong Kong Examines the political, historical, and sociological influence of Wong and his work, and discusses his work from a variety of perspectives including modern, post-modern, postcolonial, and queer theory Includes two appendices which examine Wong's work in Hong Kong television and commercials

City of Virtues Chuck Wooldridge, 2015-08-01 Throughout Nanjing's history, writers have claimed that its spectacular landscape of mountains and rivers imbued the city with "royal qi," making it a place of great political significance. *City of Virtues* examines the ways a series of visionaries, drawing

on past glories of the city, projected their ideologies onto Nanjing as they constructed buildings, performed rituals, and reworked the literary heritage of the city. More than an urban history of Nanjing from the late 18th century until 1911 – encompassing the Opium War, the Taiping occupation of the city, the rebuilding of the city by Zeng Guofan, and attempts to establish it as the capital of the Republic of China – this study shows how utopian visions of the cosmos shaped Nanjing's path through the turbulent 19th century.

Financing without Bank Loans Jiazhao G. Wang, Juan Yang, 2016-04-18 This book covers all important financial innovations for SME financing, and combines theoretical analysis and real world practices employed in China's financial market. As China is increasingly becoming a key player in the global economy, the book helps readers gain a better understanding of the current structure and operation of, as well as future changes in, the Chinese economy. Given the high likelihood of RMB joining the IMF's SDR in the near future, this book offers a well-timed publication that will prove valuable for a broad readership, either as a reference book or as a guide to understanding, researching, teaching on and making business decisions about China and related issues.

The Economy of Lower Yangzi Delta in Late Imperial China Billy K. L. So, 2012-10-02 Historically, the Lower Yangzi Delta (or Jiangnan), has played a key role in China's economic development. Indeed, as the prime example of a traditional Chinese market economy, the region serves as the core case study when making comparisons between the Chinese and Western economies in the early modern period. This book explores aspects of this vibrant market economy in late imperial China, and by presenting a reconstructed narrative of economic development in the early modern Jiangnan, provides new perspectives on established theories of Chinese economic development. Further, by examining economic values alongside social structures, this book produces a historically comprehensive account of the contemporary Chinese economy which engenders a deeper and broader understanding of China's current economic success. With a broad range of empirical case studies which incorporate a range of social science and cultural theories, this book will be of great interest to students and scholars of Chinese history, as well as Chinese economics and business.

Empire and Local Worlds Mingming Wang, 2017-03-02 Mingming Wang, one of the most prolific anthropologists in China, has produced a work both of long-term historical anthropology and of broad social theory. In it, he traces almost a millennium of history of the southern Chinese city of Quanzhou, a major international trading entrepot in the 13th century that declined to a peripheral regional center by the end of the 19th century. But the historical trajectory understates the complex set

of interrelationships between local structures and imperial agendas that played out over the course of centuries and dynasties. Using urban structure, documentary analysis, and archaeological artifacts, Wang shows how the study of Quanzhou represents a Chinese template for civilizational studies, one distinctly different from Eurocentric models propounded by such theorists as Sahlins, Wolf, and Elias.

The Phantom Heroine Judith T. Zeitlin, 2007-06-30 Zeitlin's study centers on the seventeenth century, one of the most interesting and creative periods of Chinese literature and politically one of the most traumatic, witnessing the overthrow of the Ming, the Manchu conquest, and the subsequent founding of the Qing. Drawing on fiction, drama, poetry, medical cases, and visual culture, the author departs from more traditional literary studies, which tend to focus on a single genre or author. Ranging widely across disciplines, she integrates detailed analyses of great literary works with insights drawn from the history of medicine, art history, comparative literature, anthropology, religion, and performance studies. *The Phantom Heroine* probes the complex literary and cultural roots of the Chinese ghost tradition. Zeitlin is the first to address its most remarkable feature: the phenomenon of verse attributed to phantom writers - that is, authors actually reputed to be spirits of the deceased. This book should appeal to readers interested in Chinese studies, gender studies, comparative literature, performance studies, the history of religion, and of course, ghost stories and the occult

In the Red Geremie R. Barmé, 2000-01-11 China, Geremie R. Barmé notes, has become one of the greatest writing and publishing nations on the planet, and both cultural activists and the state are embroiled in debates about the production and distribution of its cultural products. But what happens when global culture and Chinese capitalist-socialism meet in the marketplace? *In the Red* investigates what goes on behind the rhetoric of the official Chinese government and the dissident community and provides a unique perspective on mainstream Western perceptions of cultural developments, artistic freedom, and popular lifestyles in China today. Illustrated with fascinating cartoons and photographs and rich with facts, anecdotes, and events, *In the Red* exposes the complex relationship between official culture (produced, supported, or sanctioned by the government) and nonofficial or countercultures (especially among urban youths and dissidents). Two key and contrasting events loom large in this narrative: the 1989 protests that ended with the June 4 massacre and a nationwide purge, and Deng Xiaoping's 1992 tour of the south, in which he emphasized the need for radical economic reform. Although a level of political tolerance has evolved since the 1970s, Barmé sheds light on the significance of the intermittent denunciations of artists, ideas, and works.
