Modern Management Based on Big Data III A.J.

Tallón-Ballesteros,2022-09-29 Data is the basic ingredient of all Big Data applications, and Big Data technologies are constantly deploying new strategies to maximise efficiency and reduce the time taken to process information. This book presents the proceedings of MMBD2022, the third edition of the conference series Modern Management based on Big Data (MMBD). The conference was originally scheduled to take place from 15 to 18 August 2022 in Seoul, South Korea, but was changed to a virtual event on the same dates. Some 200 submissions were received for presentation at the conference, 52 of which were ultimately accepted after exhaustive review by members of the programme committee and peer-reviewers, who took into account the breadth and depth of the research topics and

the scope of MMBD. Topics covered include data analytics, modelling, technologies and visualization, architectures for parallel processing systems, data mining tools and techniques, machine learning algorithms, and big data for engineering applications. There are also papers covering modern management, including topics such as strategy, decision making, manufacturing and logistics-based systems, engineering economy, information systems and law-based information treatment, and papers from a special session covering big data in manufacturing, retail, healthcare, accounting, banking, education, global trading, and e-commerce. Big data analysis and emerging applications were popular topics. The book includes many innovative and original ideas, as well as results of general significance, all supported by clear and rigorous reasoning and compelling evidence and methods, and will be of interest to all those working with Big Data.

CHINESE PAINTING Deng Qiaobin, 2019-12-26 Chinese Painting: An Intellectual History provides a panorama of Chinese painting from primitive times to the Qing Dynasty. But it is not a mere list of various theories, paintings, and painters in chronological order. Much space of the book is devoted to describing the political, cultural, and economic situations as well as the philosophical, literary, and academic elements that have influenced Chinese painting. In its presentation of painters, painting theories, schools, and genres, the book combines general introduction with case studies, and in so doing maintains an objective and unbiased stance. To controversial topics such as the role of Buddhism and Taoism and the division of Northern School and Southern School in landscape painting, the book analyzes political and cultural causes, but gives no definite answer, thus allowing interpretation by the readers. As the title suggests, the book is not an exclusive discussion on

painting theories; otherwise, a more appropriate title would be “Chinese Painting Theories,” or “A History of Chinese Painting.” By “intellectual,” the author meant to include not only systematic painting theories and fragmented commentaries that are written in words, but also the implicit and intangible message or thoughts underlying the creation of Chinese painting. Therefore, reading this book is not only a way of appreciating Chinese painting, but also helps in understanding Chinese culture.

Dream of a Red Factory Deborah A. Kaple, 1994-01-06

Drawing on previously unknown primary sources in both Chinese and Russian, Deborah A. Kaple has written a powerful and absorbing account of the model of factory management and organization that the Chinese communists formulated in the 1949-1953 period. She reveals that their new management techniques were adapted from Soviet propaganda during the harsh period of Stalin's post-war reconstruction. The idealized Stalinist management system consisted mainly of strict Communist Party control of all aspects of workers' lives, which is the root of such strong Party control over Chinese society today. *Dream of a Red Factory* is a rare and revealing look at the consolidation rule in China; told through the prism of the development of new socialist factories and enterprises. Kaple completely counters the old myth of the Soviet monolith in China, and carefully reconstructs how the Chinese communists came to rely on an idealized, propagandistic version of the Soviet model instead.
