Adversative and Concessive Conjunctions in EFL Writing Yan Zhang, 2020-10-01

This book explores the usage patterns of a group of adversative and concessive conjunctions in English texts written by Chinese EFL learners and their native speaker counterparts. Focusing on probability profiles and systemic potentials, the study encompasses three stages and combines the strengths of two research methods – the corpus-based approach and text-based analysis – to examine the conjunctions under the theoretical framework of systemic functional linguistics and rhetorical structure theory. Starting with an overview of seventeen conjunctions across two corpora in terms of overall frequency, positional distribution and distribution of semantic categories, the book then offers a more detailed discussion of three individual conjunctions, highlighting the interconnections between 1) syntactic positions and co-occurrence patterns and 2) semantic relations encoded by these conjunctions. Lastly, it presents a case study of one full-length text taken from the learner corpus, applying rhetorical structure theory to provide new insights into the relevance of adversative and concessive relations to text structure. This comprehensive, in-depth analysis is both diagnostic and pedagogically informative.

Governing the Commons in China Yan Zhang, 2017-01-20 The idea of 'the commons' is a long-standing concept in the English-speaking world and in English law. A similar concept occurs in China. How different from or similar to the English idea of 'the commons' is the idea in China; and how is the concept applied? This book explores this important subject. It examines the subject from a philosophical and theoretical perspective; considers 'the commons' widely, including tangible commons of resources, intangible commons of culture, identity and social capital, and institutional commons of welfare, security and public goods; and goes on to examine the concept as it applies to the hydropower developments along the Lancang River, outlining the different competing interests of local people, central and provincial government, and environmental considerations. It argues that the concept of 'the commons' in China is dual-dimensional, with a vertical dimension of 'public authority' and a horizontal dimension of 'commonly sharing', that power structures in China have often been flexible and polycentric, and that, correctly applied, this approach will do much to serve the common interest of the people, ensuring positive impacts for shared prosperity for multiple stakeholders, whilst mitigating the negative impacts involved in the delivery of such positive impacts.

Therapeutic Potentials of α -Melanocyte-Stimulating Hormone in Eye Diseases

Yan Zhang, 2020-05-11 The author began to understand the molecular mechanisms underlying regulation of hormone and metabolism in 1996 when he completed my bachelor's degree in the Department of Clinical Medicine in Tianjin Medical University and began my master's degree in the National Key Laboratory of Hormone and Brain Development, Tianjin Institute of Endocrinology. After getting his master's degree in Biochemistry in 1999, he went to the University of Florida, one of the public Ivy League in the United States, to pursue his doctor's degree in the Department of Neuroscience, College of Medicine. During the next five years, he systematically learned and studied, from the neuroscience and molecular biology perspectives, the retina, one of the most important tissues at the posterior part of the eye. After acquiring his Ph.D. degree as one of the outstanding graduate students in 2004, he started his brief 1st round of postdoctoral training. He went to Pennington Biomedical Research Center in the United States in 2007 to receive his 2nd and 3rd rounds of postdoctoral training in the Department of Neuroscience and the Department of Neurobiology, respectively. His work during this period focused on the molecular interactions between the signaling pathways mediated by α -melanocyte-stimulating hormone (α -MSH) and leptin at the interface of blood-brain barrier as well as the neural circuits regulating the physiological functions of α -MSH and leptin in the hypothalamus. He came back to his hometown Tianjin, China in 2010 and started to work as a full Professor and Principal Investigator in the Laboratory of Translational Medicine. He adjusted his research direction to the novel molecular interventions to retinal diseases and their mechanisms of action by integrating the knowledge and expertise during his training and education. Ten years have passed since he followed this direction. His research group has published a number of papers on the protective effects of α -MSH in several animal models of eye diseases, such as the rat models of diabetic retinopathy and dry eye, the mouse model of retinopathy of prematurity, and the chick model of glutamate-induced retinal excitotoxicity. He feels it necessary to summarize these results and integrate them with the current advances, thereby offering the scholars, graduate students, and medical doctors a monograph on α -MSH in the field of eye research.

Crossroads Of Family Businesses In China: Succession And Transformation

Jean S K Lee, Anthea Yan Zhang, 2021-06-08 Crossroads of Family Businesses in China: Succession and Transformation studies the intergenerational succession in family-owned businesses, specifically in the Chinese mainland. With the succession of family businesses over time, transformation is required as it needs to correspond to the world's development to successfully sustain the company. There is a multitude of factors that play their roles accordingly to perform a prosperous accession. Hence, this book highlights common issues such as the challenges for both succession and transformation of the company, the interest of the second generation, introducing the second generation to the business before fully passing on, family culture and morale, the distinction between wealth inheritance and business succession, the unorthodox tradition of mother-to-daughter succession and opening management to professionals. These topics are substantiated by case studies of Chinese family businesses, such as Neoglory Group, Midea, Red Collar, Fotile and even more. The book offers theories, practices and models for strategic transformations during succession. Readers will be able to enjoy insights into a critical evaluation of the intersection between succession and transformation. They will also discover how the different methods of succession utilized by real-life Chinese family-owned businesses affect the businesses'

performance. This book will be their first step in constructing a thought on this topic, while indulging in an incredible learning experience.

Cyber Physical Systems Chi (Harold) Liu,Yan Zhang,2015-12-02 Cyber Physical Systems: Architectures, Protocols and Applications helps you understand the basic principles and key supporting standards of CPS. It analyzes different CPS applications from the bottom up, extracting the common characters that form a vertical structure. It presents mobile sensing platforms and their applications toward interrelated paradigms, highlighting and briefly discussing different types of mobile sensing platforms and the functionalities they offer. It then looks at the naming, addressing, and profile services of CPS and proposes a middleware component to meet the requirements of dynamic applications and sensors/actuators deployment/configurations across different platforms. The middle chapters of the book present a context-aware sensor search, selection, and ranking model which addresses the challenge of efficiently selecting a subset of relevant sensors out of a large set of sensors with similar functionality and capabilities. The authors consider various topics in the energy management of CPS and propose a novel energy-efficient framework. They also present the fundamental networking technologies of CPS and focus on machine-to-machine communications for CPS, specifically the open technologies such as IPv6-based solutions that can be integrated into IoT and enable wireless sensor communications. In the book's final chapters, the authors bring you up to date on mobile cloud computing (MCC) research activities that enhance the capabilities of resource-constrained smart devices in CPS sensory environments. They also present a few representative CPS applications, including connected healthcare, gaming in public transport crowds, and a series of MCC-enabled emerging CPS applications. You will find that these application fields fully demonstrate the great potential of applying CPS in public life.

Chinese through Song, Second Edition Hong Zhang, Zu-yan Chen, 2014-09-01 An innovative approach to teaching Chinese language and culture, using folk and popular songs. Offering an innovative approach to language learning, *Chinese through Song* helps students develop their language proficiency and music appreciation through the use of folk, popular, and art songs. Because songs emphasize the color, pronunciation, and intonation of every syllable, they can be a valuable tool for improving a student's spoken language skills. By learning and performing the songs in this book, students will expand their vocabularies and improve their pronunciation, voice projection, and language expression—all while learning about Chinese culture in a fun and stimulating way. This revised and expanded edition includes thirty songs, many of them new to this edition. They feature lucid and vivid language, as well as beautiful and relatively simple melodies. They are good for voice development and can be practiced in different modes of performance, including solos, duets, rounds, and musical dramas. Each chapter comprises up to seven sections: (1) a song, including sheet music and lyrics in Chinese characters and pinyin Romanization; (2) a line-by-line English translation; (3) a vocabulary list designed for students who have completed at least one year of Chinese; (4) cultural notes that help students understand the historical and social context of the song; (5) language notes on the

use of key words and important sentence patterns; (6) singing instructions, including remarks on interpretation and performance; and (7) language exercises for both classroom practice and homework assignments. Chinese through Song may be used in several ways: as the main textbook for an interdisciplinary, intermediate-level course, emphasizing both language acquisition and musical performance; as a supplement to regular Chinese language classes, from elementary through advanced levels; as a resource for extracurricular activities (for example, a Chinese chorus or a performance at a Chinese New Year party); and as a general songbook.
