Media Moms & Digital Dads Yalda T Uhls, 2016-10-04 Is social media ruining our kids? How much Internet activity is too much? What do FOMO (Fear of Missing Out), sexting, and selfies mean for teens? Are you curious about what research says about how media and technology are affecting childhood? Supported by academic research focused on technology, *Media Moms & Digital Dads* breaks down complex issues in a friendly, accessible fashion, making it a highly useful and, ultimately, reassuring read for anyone who worries about the impact that media might be having on young minds. Each chapter delves into a different issue related to kids and media so parents can easily find their particular issue of concern. Dr. Uhls ends each chapter with quick takeaways, in the form of tips and guidance for parents. Dr. Uhls' expertise as a former Hollywood film executive and as a current expert on child development and the media gives her a unique and important perspective. As a trained scientist she understands the myriad studies conducted by researchers, and as a mom of digital teens, she knows what actually works and can relate to the reality of being a parent in the 21st century. Dr. Uhls also describes the primary research she conducted at UCLA, including whether extensive screen time impacts non-verbal emotional understanding, which has been covered in the *New York Times*, *Time* magazine, and on National Public Radio. There are few more important issues for parents today than helping children safely navigate the digital world in which we live, a world that provides immense opportunity for learning and connecting yet also puts kids in a position to make mistakes and even cause harm. Knowing what the facts are and when and how to get involved is perhaps one of the most challenging aspects of modern parenting. *Media Moms & Digital Dads* offers parents reassuring and fact-based guidance on how best to manage screens and media for their children.

**Sound Souvenirs** Karin Bijsterveld, José van Dijck, 2009 In recent decades, the importance of sound for remembering the past and for creating a sense of belonging has been increasingly acknowledged. We keep sound souvenirs such as cassette tapes and long play albums in our attics because we want to be able to recreate the music and everyday sounds we once cherished. Artists and ordinary listeners deploy the newest digital audio technologies to recycle past sounds into present tunes. Sound and memory are inextricably intertwined, not just through the commercially exploited nostalgia on oldies radio stations, but through the exchange of valued songs by means of pristine recordings and cultural practices such as collecting, archiving and listing. This book explores several types of cultural practices involving the remembrance and restoration of past sounds. At the same time, it theorizes the cultural meaning of collecting, recycling, reciting, and remembering sound and music.

**Mirror Sound** Spencer Tweedy, Lawrence Azerrad, 2020-10-20 A visual portrait that delves into the people and processes behind self-recorded music, featuring some of the biggest names in music today. Everywhere you look, musicians are creating, recording, and selling their music without the help of big-name studios, producers, or labels. This book offers tangible--and visually stunning--proof that self-recording is a path to artistic freedom. Each chapter takes on a specific aspect of self-recording through original interviews with musicians and all new photography, revealing the joys and complications of recording music on one's own terms. You'll learn how some of your favorite musicians charted their path to self-recording and how they use emerging technologies to make exceptional music. The book features intimate shots of artists recording in living rooms, backyards, and garages--such as Eleanor Friedberger, Mac DeMarco, Vagabon, Tune-Yards, Yuka Honda, and more. The first book devoted entirely to the practice of self-recording, *Mirror Sound* charts a way forward for any musician who aspires to make their own music and those who just love to listen.

**Recording Studio Design** Philip Newell, 2013-04-26 Philip Newell's comprehensive reference work contains pearls of wisdom which anyone involved in sound recording will want to apply to their own studio design. He discusses the fundamentals of good studio acoustics and monitoring in an exhaustive yet accessible manner. *Recording Studio Design* covers the basic principles, their application in practical circumstances, and the reasons for their importance to the daily success of recording studios. All issues are approached from the premise that most readers will be more

interested in how these things affect their daily lives rather than wishing to make an in-depth study of pure acoustics. Therefore frequent reference is made to examples of actual studios, their various design problems and solutions. Because of the importance of good acoustics to the success of most studios, and because of the financial burden which failure may impose, getting things right first time is essential. The advice contained in Recording Studio Design offers workable ways to improve the success rate of any studio, large or small.

**Sound Media** Lars Nyre,2009-06-02 Sound Media considers how music recording, radio broadcasting and muzak influence people's daily lives and introduces the many and varied creative techniques that have developed in music and journalism throughout the twentieth century. Lars Nyre starts with the contemporary cultures of sound media, and works back to the archaic soundscapes of the 1870s. The first part of the book devotes five chapters to contemporary digital media, and presents the internet, the personal computer, digital radio (news and talk) and various types of loudspeaker media (muzak, DJ-ing, clubbing and PA systems). The second part examines the historical accumulation of techniques and sounds in sound media, and presents multitrack music in the 1960s, the golden age of radio in the 1950s and back to the 1930s, microphone recording of music in the 1930s, the experimental phase of wireless radio in the 1910s and 1900s, and the invention of the gramophone and phonograph in the late nineteenth century. Sound Media includes a soundtrack CD with thirty-six examples from broadcasting and music recording in Europe and the USA, from Edith Piaf to Sarah Cox, and is richly illustrated with figures, timelines and technical drawings.

**The Age of Surveillance Capitalism** Shoshana Zuboff,2019-01-15 The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called surveillance capitalism, and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance

capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new behavioral futures markets, where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new means of behavioral modification. The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a Big Other operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled hive of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.
