Top of the Morning Brian Stelter, 2013-04-23 CNN

correspondent Brian Stelter reveals the dark side of morning television with exclusive material about current and past morning stars, from Matt Lauer to Katie Couric. When America wakes up with personable and charming hosts like Robin Roberts and George Stephanopoulos, it's hard to imagine their show bookers having to guard a guest's hotel room all night to prevent rival shows from poaching. But that is just a glimpse of the intense reality revealed in this gripping look into the most competitive time slot in television. Featuring exclusive content about all the major players of the 2000s, *Top of the Morning* illuminates what it takes to win the AM -- when every single viewer counts, tons of jobs are on the line, and hundreds of millions of dollars are at stake. Stelter is behind the scenes as Ann Curry replaces Meredith Vieira on the Today show, only to be fired a year later in a fiasco that made national headlines. He's backstage as Good Morning America launches an attack to dethrone Today and end the longest consecutive winning streak in morning television history. And he's there as Roberts is diagnosed with a crippling disease -- on what should be the happiest day of her career. So grab a cup of coffee, sit back, and discover the dark side of the sun. Praise for *Top of the Morning* Mr. Stelter pulls back the curtains and exposes a savage corporate world that might have been inhabited by the Sopranos. -- Washington Times A troubling look inside an enterprise as vicious and internecine as a soap opera. -- Kirkus Reviews

Devolution and Choice in Education Geoff Whitty, Sally Power, David Halpin, 1998 Examining recent school reforms in England and Wales, the USA, Australia, New Zealand and Sweden, the authors suggest that governments, while appearing to devolve power, have actually been increasing their own capacity to 'steer' the system.

Numeracy and Learning Difficulties includes how to tackle common learning difficulties by following different teaching practices and principles, identifying gaps in students' knowledge and developing curricula that bridges these gaps, improves numerical literacy using problem-solving strategies and skills, and a handy checklist of benchmarks in achievement.

Strategies to Promote Inclusive Practice Richard Rose, Christina Tilstone, 2003-08-29 This book considers current issues in the development of policies to promote inclusive education for pupils with special educational needs. By examining issues from the perspective of individual pupils, schools, and local education authorities, it raises critical commentary on the ways forward for a co-ordinated approach to inclusion. *Strategies to Promote Inclusive Practice* draws upon the experience and expertise of teachers, policy makers, and researchers, who explore the many factors which need to be addressed in the development of a more inclusive education system. The authors explore the link between theoretical perspectives and the production of policy, as well as the potential for translating this into good classroom practice. They provide examples of approaches which have proved successful in enabling pupils to become better equipped to

address the needs of a wide range of pupils. In considering the impact of recent policy, legislation, and research, the authors suggest that several models of inclusion may be necessary in order to become an inclusive education system. This book will be of interest to students, teachers, policy makers, and researchers, who are concerned to advance the debate on inclusion towards a more pragmatic approach to providing for all pupils with special needs. It is a companion text to *Promoting Inclusive Practice* edited by Christine Tilstone, Lani Florian and Richard Rose (RoutledgeFalmer, 1998), which was the joint winner of the 1999 TES/NASEN Academic Book Award.

Using Experience For Learning Boud, David, Cohen, Ruth, Walker, David, 1993-10-01 What are the key ideas that underpin learning from experience? How do we learn from experience? How does context and purpose influence learning? How does experience impact on individual and group learning? How can we help others to learn from their experience? *Using Experience for Learning* reflects current interest in the importance of experience in informal and formal learning, whether it be

applied for course credit, new forms of learning in the workplace, or acknowledging autonomous learning outside educational institutions. It also emphasizes the role of personal experience in learning: ideas are not separate from experience; relationships and personal interests impact on learning; and emotions have a vital part to play in intellectual learning. All the contributors write themselves into their chapters, giving an autobiographical account of how their experiences have influenced their learning and what has led them to their current views and practice. Using Experience for Learning brings together a wide range of perspectives and conceptual frameworks with contributors from four continents, and should be a valuable addition to the field of experiential learning.

Something Will Happen, You'll See Christos

Ikonomou,2016-03-15 Ikonomou's stories convey the plight of those worst affected by the Greek economic crisis--laid-off workers, hungry children. In the urban sprawl between Athens and Piraeus, the narratives roam restlessly through the impoverished working-class quarters located off the tourist routes. Everyone is dreaming of escape: to the mountains, to an island or a palatial estate, into a Hans Christian Andersen story world. What are they fleeing? The old woes--gossip, watchful neighbors, the oppression and indifference of the rich--now made infinitely worse. In Ikonomou's concrete streets, the rain is always looming, the politicians' slogans are ignored, and the police remain a violent, threatening presence offstage. Yet even at the edge of destitution, his men and women act for themselves, trying to preserve what little solidarity remains in a deeply atomized society, and in one way or another finding their own voice. There is faith here, deep faith--though little or none in those who habitually ask for it. From the Trade Paperback edition.

Inclusive Education Melanie Nind,Kieron Sheehy,Katy Simmons,2003 This work illustrates the diverse learning contexts

within inclusive education and allows students to choose readings to support their individual interests. It shows how inclusive education addresses not just disability but also gender, ethnicity, class, socio-economic position, and children in care.

East of the Sun Julia Gregson, 2009-06-02 From award winner Julia Gregson, author of *Jasmine Nights*, this sweeping international bestseller brilliantly captures the lives of three young women on their way to a new life in India during the 1920s. As the *Kaisar-i-Hind* weighs anchor for Bombay in the autumn of 1928, its passengers ponder their fate in a distant land. They are part of the "Fishing Fleet"—the name given to the legions of English women who sail to India each year in search of husbands, heedless of the life that awaits them. The inexperienced chaperone Viva Holloway has been entrusted to watch over three unsettling charges. There's Rose, as beautiful as she is naïve, who plans to marry a cavalry officer she has met a mere handful of times. Her bridesmaid, Victoria, is hell-bent on losing her virginity en route before finding a husband of her own. And shadowing them all is the malevolent presence of a disturbed schoolboy named Guy Glover. From the parties of the wealthy Bombay socialites to the poverty of Tamarind Street, from the sooty streets of London to the genteel conversation of the Bombay Yacht Club, *East of the Sun* takes us back to a world we hardly understand but yearn to know. This is a book that has it all: glorious detail, fascinating characters, and masterful storytelling.

The Memory Palace Mira Bartok, 2011-08-09 A gorgeous memoir about the 17 year estrangement of the author and her homeless schizophrenic mother, and their reunion.

Negotiating Critical Literacies in Classrooms Barbara Comber, Anne Simpson, 2001 *Negotiating Critical Literacies in Classrooms* brings together accounts of educators who have sought to make a difference in the lives of their students through literacy education--from university classrooms in the United States,

England, and South Africa, to policy and curriculum development in Singapore and Australia. Each chapter represents the results of extended research on classroom practice. The authors in this collection write as teachers. The literacy classrooms they explore range from the early years of schooling, to primary and secondary education, through to community and university sites. Although the volume is organized around different levels of education, clearly overlapping themes emerge across the chapters, including identity formation and textual practices, politicizing curriculum and textbook production, and changing the power relations in classroom talk around text. An overarching theme of this collection is the belief that there is no one generic, universal critical literacy--in theory or in practice. Rather, the authors reveal how a range of theories can serve as productive starting points for educators working on social justice agendas through the literacy curriculum, and, equally important, how particular critical literacy theories or pedagogies must be worked out in specific locations. In each of these accounts, educators explain how they have taken a body of theory and worked with and on it in classrooms. Their rich portrayals and narratives of classroom realities illustrate the unanticipated effects of pedagogies that emerge in specific contexts. Experiences from the classrooms have led them to revise theories that are central to critical literacy, including constructs such as empowerment, resistance, and multiple readings. This collection documents what occurs when educators confront the difficult ethical and political issues that evolve in particular classroom situations. *Negotiating Critical Literacies in Classrooms* is appropriate as a text for courses in language and literacy education, and will be of broad interest to educational researchers, practitioners, and theorists. The practical classroom focus makes this book accessible and of interest to a wide range of teachers and an excellent resource for professional development. The international scope will appeal to a global educational readership.
