Hany Farid

Fake Photos Hany Farid, 2019-09-10 A concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Stalin, Mao, Hitler, Mussolini, and other dictators routinely doctored photographs so that the images aligned with their messages. They erased people who were there, added people who were not, and manipulated backgrounds. They knew if they changed the visual record, they could change history. Once, altering images required hours in the darkroom; today, it can be done with a keyboard and mouse. Because photographs are so easily faked, fake photos are everywhere—supermarket tabloids, fashion magazines, political ads, and social media. How can we tell if an image is real or false? In this volume in the MIT Press Essential Knowledge series, Hany Farid offers a concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Farid, an expert in photo forensics, has spent two decades developing techniques for authenticating digital images. These techniques model the entire image-creation process in order to find the digital disruption introduced by manipulation of the image. Each section of the book describes a different technique for analyzing an image, beginning with those requiring minimal technical expertise and advancing to those at intermediate and higher levels. There are techniques for, among other things, reverse image searches, metadata analysis, finding image imperfections introduced by JPEG compression, image cloning, tracing pixel patterns, and detecting images that are computer generated. In each section, Farid describes the techniques, explains when they should be applied, and offers examples of image analysis.

It also discusses ways to use ArcMap's editor to edit, create and update data and techniques for developing custom map-based applications. 800 color photos, 40 line drawings, 25 charts, 35 tables, 70 maps.

Human Proportions for Artists Avarad Tennyson Fairbanks, Eugene F. Fairbanks, 2005 Human Proportions for Artists is a profusely illustrated reference book. It is intended for college level students and serious artists. Avarad Fairbanks made a proportion study of more than 100 measurements on each of 25 male and female adults. Detailed drawings were made illustrating these dimensions, including front and lateral fine features of the faces. Anatomical and anthropometric features are included and explained. These measurements are tabulated in life size and in different ratios from heroic, 3/2, to 1/12th life size in twelve columns. A presentation of relative proportions, using Leonardo da Vinci's system, is included. This book is intended as an assistance for creating fine realistic and representational art, including portraits, from monumental to miniature sizes.

Legends of the Fire Spirits Robert Lebling, 2010-07-30 'An energy, a pulse form of quantum physics perhaps, alive at the margins of sleep or madness, and more often in the whispering of a single unwelcome thought.' The Economist According to Islamic tradition, Allah created three types of beings: angels, made of light; humans, made of earth; and jinn, made of smokeless fire. Supernatural, shape-shifting, intelligent and blessed with free will and remarkable powers, jinn have over the ages been given many names - demon, spirit, ghoul, genie, ifrit and shaitan. Neither human nor immortal, they roam the earth inhabiting dark and empty places, luring humans to their deaths or demonically possessing them if harmed or offended. Despite the fact they cannot be seen, jinn are said to be strangely human-like - marrying, bearing children, forming communities and tribes, eating, sleeping, playing and facing judgement like any other human. They are ever-present partners in the human experience, causing endless mischief, providing amazing services and sometimes inducing sheer terror. Believed in by hundreds of millions of people throughout the world and from all faiths, jinn have played a particularly central role in the literature, culture and belief systems of the Middle East and the Islamic world. Legends of the Fire Spirits explores through time and across nations the enduring phenomenon of the jinn. From North Africa to Central Asia, from the Mediterranean to sub-Saharan Africa and beyond, this riveting, often chilling, yet reasoned book draws on long-forgotten ancient testimonies, medieval histories, colonial records, anthropologist's reports and traveller's tales to explore the different types of jinn, their behaviour, society, culture and long history of contact with

humankind. It documents their links with famous figures in history such as King Solomon and the Queen of Sheba and illustrates the varied and vivid portrayals of jinn in world literature. In essence Legends of the Fire Spirits demonstrates the colourful diversity of human culture and the durability of faith and is a magnificent and indispensable portrayal of the rich folklore of the Islamic world.

The Life of Hunger Amélie Nothomb,2006 As the daughter of a Belgian diplomat, Amelia Nothomb had an itinerant childhood, ranging from Tokyo to Peking, and Paris to New York. Recounting these formative journeys, 'The Life of Hunger' is both a fictional memoir and an examination of the self.

Ties Domenico Starnone,2017-03-07 The Strega Award-winning Italian author's "scalding and incisive" novel of marriage and family bonds that come undone in the wake of an affair (Library Journal, starred review). A New York Times Notable Book of the Year A Sunday Times and Kirkus Reviews Best Book of the Year Winner of the 2015 Bridge Prize for Best Novel Italy, 1970s. Like many marriages, Vanda and Aldo's has been subject to strain, attrition, and the burden of routine. Yet it has survived intact. Or so things appear. The rupture in their marriage lies years in the past, but if one looks closely enough, the fissures and fault lines are evident. It is a cracked vase that may shatter at the slightest touch. Or perhaps it has already shattered, and nobody is willing to acknowledge the fact. Domenico Starnone's thirteenth work of fiction is a powerful short novel about relationships, family, love, and the ineluctable consequences of one's actions. Known as a consummate stylist and beloved as a talented storyteller, Domenico Starnone is the winner of Italy's most prestigious literary award, the Strega. "The leanest, most understated and emotionally powerful novel by Domenico Starnone." –The New York Times

Handbook on Geospatial Infrastructure in Support of Census Activities ,2009 The handbook demonstrates how the use and application of contemporary geospatial technologies and geographical databases are beneficial at all stages of the population and housing census process.

Onco-Nephrology E-Book Kevin W. Finkel,Mark Anthony Perazella,Eric P Cohen,2019-07-02 Kidney disease and cancer

are frequent comorbidities that require specialized knowledge and expertise from both the nephrologist and the oncologist. Written by three pioneers in this growing subspecialty, Onco-Nephrology provides authoritative, definitive coverage of the mechanism and management of these two life-threatening diseases. This unique, single-volume resource covers current protocols and recommends management therapies to arrest kidney failure and allow oncologic treatments to continue and succeed. Addresses acute and chronic kidney diseases that develop from a variety of cancers. This includes direct kidney injury from the malignancy, paraneoplastic effects of the cancer, and various cancer agents used to treat the malignancy. Discusses key issues regarding kidney disease in patients with cancer, including conventional chemotherapeutic regimens and new novel therapies (targeted agents and immunotherapies) or the malignancies themselves that may promote kidney injury; patients with chronic kidney disease who acquire cancer unrelated to renal failure; and kidney transplantation, which has been shown to carry an increased risk of cancer. Contains dedicated chapters for each class of the conventional chemotherapeutic agents, targeted cancer agents, and cancer immunotherapies including the basic science, pathogenic mechanisms of injury, clinical manifestations, and treatment. Includes special chapters devoted to the individual classes of chemotherapies that relate to kidney disease for quick reference. Discusses increasingly complex problems due to more numerous and specialized anti-cancer drugs, as well as increased survival rates for both cancer and renal failure requiring long-term patient care. Covers anti-VEGF (antivascular endothelial growth factor) agents and cancer immunotherapies – treatments that are being recognized for adverse kidney effects. Utilizes a clear, logical format based on the ASN Core Curriculum for Onco-Nephrology, making this reference an excellent tool for board review, as well as a practical resource in daily practice.

Photographing Farmworkers in California Richard Steven Street,2004 The work of nearly every photographer of consequence since the nineteenth century is captured in this collection of photographs of California farmworkers, raising moral questions about the exploitation and colonization of an entire class of people.

Unsinkable Daniel Allen Butler,2012-01-02 The first modern work to give a comprehensive picture of the RMS Titanic and the people intertwined with her fate, from disaster to recovery. Drawn from primary sources and contemporary accounts and updated to coincide with the April 2012 anniversary, this new heart-rending narrative allows readers to come to their own conclusions about this legendary vessel. Daniel Allen Butler spend more than 30 years researching the work, delving into the lives of every principal participant. In addition to examining the roles played by individual, he also looks into the problems of equipment and errors in technical data that

resulted in the deaths of 1502 people. Rather than focussing on the night of the tragedy alone, he also investigates the events leading up to and following the fateful night.
