Create an Uber Clone in 7 Days Shai Almog,2018-07-28 Do you want to build a location based mobile application? Do you read technical books and feel that they left some parts out? Do you want to get into mobile programming with real world examples? If you answered yes to one of these questions this book might be for you! The goal of this book is to teach via familiarity. Since the Uber application is well designed and familiar we chose it as the target but the book isn't meant as a copy Uber cookbook. Many applications are built around ideas similar to Uber and utilize designs inspired by Uber. It's our assumption that you can learn a lot by understanding how to build something like Uber. We break down a real world application from client to the server. This fills in all the pieces, that typical tech books skim over. This book covers: iOS/Android development with Codename One Spring Boot server development on top of MySQL WebSockets, WebServices and push notification as the communication layer Creating a sublime UI to match professional designs Map based user interface User authorization via SMS/Social Networks Best practices, security and pitfalls of mobile development The book requires basic knowledge of Java but doesn't require prior knowledge of Codename One, Spring Boot or MySQL. Notice that this book is code heavy, it contains many listings as it implements a full stack mobile app. Uber (TM) is a trademark of Uber Technologies Inc. This work is intended strictly for educational purposes. We don't condone the misuse of Uber IP! About the Author: Shai's professional software development career started more than 25 years ago. He worked for/with countless companies including Sun Microsystems, Oracle, Samsung, Nokia as well as banks, insurance companies etc. Shai was a team member on the original Wireless Toolkit from Sun Microsystems. It was the most popular cross platform mobile development tool at the time, and revolutionized the field. Together with Chen Fishbein they created LWUIT which became the most successful mobile open source project from Sun Microsystems and the basis for Codename One. Shai is a Java One rockstar who shared the stage with the likes of James Gosling. As a highly rated speaker he was featured in multiple conferences such as JavaZone, codemotion, dev days etc. He blogs at Codename One as well as Hackernoon, JavaCodeGeeks and dzone (MVB).

NO CODE APP DEVELOPMENT Deepak S. Mote,2022-03-29 I see a lot of people face problems when they try to learn App development or have a lot of questions, How to Start? Which is the Best Platform? Is Coding necessary? Is Laptop Required? And when Students Attend my webinars, they mostly ask, Can we

build Apps without code? Really? Are you joking? Which are your Apps? How Many Downloads do they have? These Questions are never going to end. So, I decided to write a detailed book on this topic to explain psychology, methods & give answers to those questions. My most of Apps on Playstore are build with no code and crossed 2M+ downloads.

Android App Inventor - DIY Teddy Brask,2019-04-20 You will quickly learn the basic tricks to create your own app's. In this book we use:-Creative Minds-All software is FREE!-APP Inventor 2 from M.I.T. (<http://ai2.appinventor.mit.edu>)-Android mobiles or Tablet's-Real app's available for sale via Google Play!-Examples you can rebuild yourself. (ReMake)-Online resources, so you can create beautiful apps-Illustrations rather than long lines of texts. But Why? Because being able to code your own App is like going from being a spectator to a 1. division football game to play it yourself! If you can code, you can create your own worlds, show other avenues (with GPS), send SMS, make games about Warriors and Dragons, bring your wildest ideas to life. And You will begin to understand the world with eyes that see structure, solutions, possibilities, shortcuts. Maybe it's you who creates the foundation for 4 years old Lise to let her communicate with her artificial arm and even brush her teeth? Maybe it's you coding the app for thousands of refugees to let them find their loved ones through? Maybe it's you coding the next Subway Surfer... Programming can easily be difficult, complicated and almost incomprehensible to non-specialists. Or so it was once. Now everyone can join and make their own app's! Thanks, M.I.T!Should you then be able to spell and be Super-Man/Girl in Maths... NO! It's okay, but that's up to you...Happy coding!

Self-Driving Cars Lisa Idzikowski,Pete Schauer,2018-07-15 Once they were the stuff of science fiction, but almost out of nowhere, self-driving cars have become a reality. Experts suggest that driverless cars will appear on our roads within five to twenty years, and Uber has already piloted a self-driving car program in select cities. Driverless cars are undoubtedly cool, but are they safe? Why do we need self-driving cars? Is it a case of technology creating a need, or will they actually provide a benefit to society? This fascinating and timely volume offers a diverse array of perspectives written by experts on this twenty-first-century subject.

Do Androids Dream of Electric Cars? James Wilt,2020 Public transit in North America is in crisis. Ridership is down, fares are up, breakdowns more frequent, and in some cities trains are delayed because the tracks are literally on fire. Meanwhile, ride-sharing platforms like Uber and Lyft offer an alternative to standing on a crowded bus. And the electric and self-driving car manufacturers like Tesla and Google's Waymo promise a sustainable future without accidents caused by human error. But does Silicon Valley really have the right plans for moving us around and saving the planet? James Wilt takes a closer look at the state of public transit in North America and the devious ways that corporations have worked to dismantle our public systems. He provides hopeful answers to the question of how we might make public transit affordable, equitable, sustainable, and efficient.--
