*The Science of the Fastball* William Blewett,2013-02-18 This book presents a scientific but easy to understand explanation of pitching power. Illustrated with anecdotes about baseball's greatest power pitchers, it describes how they were able to achieve phenomenal fastball velocity and record-breaking strikeout numbers. How was a 17-year-old rookie named Bob Feller able to strike out Major League batters in record numbers? How do the tendons, ligaments, and muscles of the arm and shoulder work to amplify power for greater pitch velocity? How was minor league pitcher Steve Dalkowski able to throw the most phenomenal fastball ever seen (or heard)? Why do young pitchers with exceptional velocity often issue walks at exceptional rates? Why do good pitchers occasionally pitch badly? Why is exceptional hand speed important? What is it about overhand throwing that causes elbow and shoulder injuries? How can a pitcher achieve greater endurance and durability? What is the most reliable way to increase fastball velocity? This book addresses these and other questions for pitchers, coaches, managers, trainers, and fans.

**ECAI 2014** T. Schaub,G. Friedrich,B. O'Sullivan,2014-08 The role of artificial intelligence (AI) applications in fields as diverse as medicine, economics, linguistics, logical analysis and industry continues to grow in scope and importance. AI has become integral to the effective functioning of much of the technical infrastructure we all now take for granted as part of our daily lives. This book presents the papers from the 21st biennial European Conference on Artificial Intelligence, ECAI 2014, held in Prague, Czech Republic, in August 2014. The ECAI conference remains Europe's principal opportunity for researchers and practitioners of Artificial Intelligence to gather and to discuss the latest trends and challenges in all subfields of AI, as well as to demonstrate innovative applications and uses of advanced AI technology. Included here are the 158 long papers and 94 short papers selected for presentation at the conference. Many of the papers cover the fields of knowledge representation, reasoning and logic as well as agent-based and multi-agent systems, machine learning, and data mining. The proceedings of PAIS 2014 and the PAIS System Demonstrations are also included in this volume, which will be of interest to all those wishing to keep abreast of the latest developments in the field of AI.

**XX Olympiad** George Daniels,2015-11-18 The Summer Olympics of Munich 1972 were called e;The Cheerful Gamese;, but that was before the spectre of terrorism marked them forever in the history of sport. XX Olympiad, the eighteenth volume in The Olympic Century series, recalls the tragic events in Munich, along with the many moments of triumph.The book recounts the 18-hour standoff between police and eight Palestinian terrorists who took 11 Israeli athletes and coaches hostage in the Olympic Village. All the hostages and three terrorists would die during the ordeal. The Games resumed after 24 hours, and the heroes of Munich emerged: American swimmer Mark Spitz, who would claim a then-record seven gold medals; Soviet gymnast Olga Korbut, who charmed the world in winning three golds; and a 15-year-old Australian named Shane Gould, who challenged Spitz in the pool with three gold-medal performances. The book also recounts the curious story of marathon winner Frank Shorter entering the stadium running behind an imposter who had joined the race in the final stages. The book then turns its focus to the 1976 Winter Games of Innsbruck, Austria. The book profiles athletes like Austrian favourite Franz Klammer, who won the downhill with a heart-stopping final run; US figure skater Dorothy Hamill, who won gold and sparked a worldwide trend in hairstyles; and West German skier Rosi Mittermaier, who missed out on winning three golds by just 0.13 seconds.Juan Antonio Samaranch, former President of the International Olympic Committee, called The Olympic Century, e;The most comprehensive history of the Olympic games ever publishede;.

**Artificial Life VII** Mark A. Bedau,John S. McCaskill,Norman H. Packard,Steen Rasmussen,2000-08-01 The term artificial life describes research into synthetic systems that possess some of the essential properties of life. This interdisciplinary field includes biologists, computer scientists, physicists, chemists, geneticists, and others. Artificial life may be viewed as an attempt to understand high-level behavior from low-level rules—for example, how the simple interactions between ants and their environment lead to complex trail-following behavior. An understanding of such relationships in particular systems can suggest novel solutions to complex real-world problems such as disease prevention, stock-market prediction, and data mining on the Internet. Since their inception in 1987, the Artificial Life meetings have grown from small workshops to truly international conferences, reflecting the field's increasing appeal to researchers in all areas of science.

The Canon Of Hive Joe Schultz,2020-02-17 At the dawn of the century, John Yianni struck gold in creating Hive(R), a strategic game about using specialized bugs to surround an enemy bee. What makes this masterpiece so much fun is its simplicity. There are no complex rules that eject you from the puzzle mindset. Chance is off the table. There isn't even a board to set up. It's an intense duel with no sound... except for the satisfying CLACK-CLACK produced by the physical version. A quick search online will show that Hive claims a spot on virtually every list of top-ten strategy table games for two players. That is an important distinction-you can find the game of Hive without even searching for the game of Hive. Alas, this beautiful game is starting to get its dues. And with that recognition, Hive strategies have crystallized and evolved... over and over. There are now many skilled players. So, if you're interested in competing at the highest level, you would benefit greatly from the perspective of a true master...Joe Schultz (Jewdoka), the 2017 Hive World Champion, exposes the intricacies of the game in The Canon of Hive: Groundwork. As a devout practitioner of Judo, Jewdoka applies the principles of the gentle way to the game of Hive. This book will inspire you to maximize your efficiency and avoid the fruitless fight of strength vs. strength. You will also have the tools to create your own powerful style and perhaps one day claim the rank of champion.To facilitate your growing process, Groundwork quantizes the levels of Hive information into five levels: (1) Principle, (2) Fundamental, (3) Technique, (4) Tactic, and finally, (5) Strategy. By growing your skill in each level, you will have more room to expand your ability in the levels above. Because the main goal is to enable you to develop your own strategy, the bulk of this book hinges on level 3: Technique. In fact, 40 (yes 40!) technical tools sorted into five neat categories distilled for your creative combinations. But don't think that is the only part. The hinge is only as important as what it connects. You must start with your principle and ultimately arrive in your own Hive strategy.Despite having over 300 pages, Groundwork is an easy and captivating read. The bite-sized-chunk delivery allows you to learn something new or solidify a particular topic of interest within a restricted time frame. Just 5 min with this book is enough to unlock a hidden door that will help your gameplay right off the bat. You will want to come back to strengthen yourself time and time again. Groundwork is a great resource that will no doubt be a centerpiece on the lap of any interested player, no matter your skill level.Almost three years in the making, Groundwork has evolved to become the book that it is today. The long wait is over! Jewdoka is pleased to bring you The Canon of Hive: Groundwork, with the blessing of the creator himself: I have to say that this is an awesome book, I'm very impressed... This is a wonderful resource for the Hive community... It's such a joy reading the depth you have gone into. -John Yianni So, do you want to be the next Hive World Champion?
