The Donner Party Bob Mayer, 2017-03-17 I wish I could cry, but I cannot. If I could forget the tragedy, perhaps I would know how to cry again. Mary Graves. Survivor, the 'Donner Party' Every man-made disaster and catastrophe has at least six Cascade Events leading up to the final event, the catastrophe according to the Rule of Seven. This is a quick read of the Cascade Events that led up to Cannibalism while the 'Donner Party' emigrated west to California Bob examines the Rule of Seven, and how human error plays a role in many catastrophes. Nothing happens in isolation or as a result of a single event. Thus, by learning from history, we can gain insight into preventing a similar catastrophe in the future. Mulholland and the St. Francis Dam Failure Bob Mayer, 2017-03-17 Quote: During the Los Angeles Coroner's Inquest,

William Mulholland said, this inquest is a very painful for me to have to attend but it is the occasion of that is painful. The only ones I envy about this whole thing are the ones who are dead. In later testimony, after responding to a question, he added, Whether it is good or bad, don't blame anyone else, you just fasten it on me. If there was an error in human judgment, I was the human, I won't try to fasten it on anyone else. William Mulholland, chief engineer, Water Department Los Angeles Every man-made disaster and catastrophe has at least six Cascade Events leading up to the final event, the catastrophe according to the Rule of Seven. This is a quick read of the Cascade Events of the second greatest loss of life in the history of California: The St. Francis Dam. Bob examines the Rule of Seven, and how human error plays a role in many catastrophes. Nothing happens in isolation or as a result of a single event. Thus, by learning from history, we can gain insight into preventing a similar catastrophe in the future. William Mulholland, a self-taught engineer, brought water to Los Angeles, but he also brought a catastrophe in the form of the St. Francis dam which failed, killing hundreds. From the very land the dam was placed on, to its design, to the failure of Mulholland on the very day the dam would collapse when called by the worried dam-keeper, to see the pending catastrophe. This is one of many catastrophes that Bob Mayer, former Green Beret, West Point Graduate and NY Times Bestselling Author, examines in his series of shorts: The Anatomy of a Catastrophe.

Information Society and Globalization, 2011

The New Hate Arthur Goldwag, 2012

Free Speech Timothy Garton Ash, 2016-05-24 Never in human history was there such a chance for freedom of expression. If we have Internet access, any one of us can publish almost anything we like and potentially reach an audience of millions. Never was there a time when the evils of unlimited speech flowed so easily across frontiers: violent intimidation, gross violations of privacy, tidal waves of abuse. A pastor burns a Koran in Florida and UN officials die in Afghanistan. Drawing on a lifetime of writing about dictatorships and dissidents, Timothy Garton Ash argues that in this connected world that he calls cosmopolis, the way to combine freedom and diversity is to have more but also better free speech. Across all cultural divides we must strive to agree on how we disagree. He draws on a thirteen-language global online project—freespeechdebate.com—conducted out of Oxford University and devoted to doing just that. With vivid examples, from his personal experience of China's Orwellian censorship apparatus to the controversy around Charlie Hebdo to a very English court case involving food writer Nigella

Lawson, he proposes a framework for civilized conflict in a world where we are all becoming neighbors.

The Online Safety Playbook Arun Soni, 2022-03-01 Children must learn several fundamental skills early in life to protect their safety. Before crossing the street, look both ways. Seatbelts must be worn at all times. Do not talk to strangers. Another item to add to the list is to be wary of hackers and cyber predators. Teachers and parents may teach students of all ages fundamental cybersecurity skills and encourage them to use digital hygiene daily. They can achieve it by including more online educational resources into their curricula and at the same time educating and updating themselves with cybersecurity skills. Children can be taught to automatically protect themselves against cyber threats, just as they do while crossing the street. Just ask yourself- Are we preparing our children for life in the digital age? Are we providing them with the required training and resources to deal with never-before-seen cyber threats? Is our educational system able to keep up with the rapid changes in our society, including technological advancements? The only problem with teaching Cybersecurity in schools and homes is that educators/parents may not be entirely updated on the subject. Or may not feel confident enough to teach it due to a lack of knowledge. That is why there is assistance for students of all age groups, educators and parents.

Axis of Resistance Tim Anderson, 2020-01-01 his book, *Axis of Resistance: towards an independent Middle East*, follows the author's 2016 book *The Dirty War on Syria*. It examines the end of the war on Syria and the wider elements of the regional conflict, in particular the prospects for a democratic Palestine, the character of the Resistance and the role of Iran. It draws attention to these broad leitmotifs underpinning each particular history that are key to understanding both the parts and the whole: A single, essentially colonial impetus drives each particular US aggression from Libya to Afghanistan. These hybrid wars utilize propaganda offensives, economic siege warfare, terrorist proxies, direct invasions and military occupations followed by repression via client

states. The aim is to keep resistance forces fragmented. Just as each aggression forms part of a broader Washington strategy, similarly the integration of the resistance in particular remains critical to its success. The Resistance has a common character but no idealized personality or ideology. However the common features are a demand for popular self-determination and for accountable social structures that serve broad social interests. Western policy has been worse than a crime it's been a blunder. Tim Anderson's epic study shows what a crime, what a blunder it has been. And how ugly the monster which now stalks the land. My land, your land, the whole of humanity. It is a must read." GEORGE GALLOWAY, British politician "Axis of Resistance will take its place alongside the few books worth reading on how and by whom the flickering lights of the imperial twilight of 'the West' in the Middle East were finally extinguished." DR. JEREMY SALT, Middle East historian, former professor Melbourne University

The Moment of Lift Melinda Gates, 2019-04-23 NEW YORK TIMES BESTSELLER "In her book, Melinda tells the stories of the inspiring people she's met through her work all over the world, digs into the data, and powerfully illustrates issues that need our attention—from child marriage to gender inequity in the workplace." – President Barack Obama "The Moment of Lift is an urgent call to courage. It changed how I think about myself, my family, my work, and what's possible in the world. Melinda weaves together vulnerable, brave storytelling and compelling data to make this one of those rare books that you carry in your heart and mind long after the last page." – Brené Brown, Ph.D., author of the New York Times #1 bestseller Dare to Lead "Melinda Gates has spent many years working with women around the world. This book is an urgent manifesto for an equal society where women are valued and recognized in all spheres of life. Most of all, it is a call for unity, inclusion and connection. We need this message more than ever." – Malala Yousafzai Melinda Gates's book is a lesson in listening. A powerful, poignant, and ultimately humble call to arms. – Tara Westover, author of the New York Times #1 bestseller Educated A debut from Melinda Gates, a timely and necessary call to action for women's empowerment. "How can we summon a moment of lift for human beings – and especially for women? Because when you lift up women, you lift up humanity." For the last twenty years, Melinda Gates has been on a mission to find solutions for people with the most urgent needs, wherever they live. Throughout this journey, one thing has become increasingly clear to her: If you want to lift a society up, you need to stop keeping women down. In this moving and compelling book, Melinda shares lessons she's learned from the inspiring people she's met during her work and travels around the world. As she writes in the introduction, "That is why I had to write this book—to share the stories of people who have given focus and urgency to my life. I want all of us to see ways we can lift women up where we live." Melinda's unforgettable narrative is backed by startling data as she presents the issues that most need our attention—from child marriage to lack of access to contraceptives to gender inequity in the workplace. And, for the first time, she writes about her personal life and the road to equality in her own marriage. Throughout, she shows how there has never been more opportunity to change the world—and ourselves. Writing with emotion, candor, and grace, she introduces us to remarkable women and shows the power of connecting with one another. When we lift others up, they lift us up, too.

Special attention is given to ICTs in accelerating private sector development (PSD) in developing countries. Many national and donor strategies related to PSD fail to take adequate account of the ICT potential, which has greatly expanded thanks to changes in the global ICT landscape. Different facets of the ICT-PSD interface are explored, including: ICT infrastructure as a factor in the investment climate; ICT use by the private sector; the ICT sector as a part of the private sector, and finally, ICT use in interventions aimed at facilitating PSD.
