Derived Relational Responding Applications for Learners with Autism and Other Developmental Disabilities Ruth Anne

Rehfeldt,Yvonne Barnes-Holmes,2009-04-02 Copublished with Context Press Derived Relational Responding offers a series of revolutionary intervention programs for applied work in human language and cognition targeted at students with autism and other developmental disabilities. It presents a program drawn from derived stimulus relations that you can use to help students of all ages acquire foundational and advanced verbal, social, and cognitive skills. The first part of Derived Relational Responding provides step-by-step instructions for helping students learn relationally, acquire rudimentary verbal operants, and develop other basic language skills. In the second section of this book, you'll find ways to enhance students' receptive and expressive repertoires by developing their ability to read, spell, construct sentences, and use grammar. Finally, you'll find out how to teach students to apply the skills they've learned to higher order cognitive and social functions, including perspective-taking, empathy, mathematical reasoning, intelligence, and creativity. This applied behavior analytic training approach will help students make many substantial and lasting gains in language and cognition not possible with traditional interventions.

Wellington Square, Level 2 Keith Gaines,Shirley Tully,2000-05 Wellington Square is designed to meet the needs of children aged 7-13+ who are having difficulty in learning to read. It provides straightforward progression through all 5 levels of the scheme, from wordless picture books to storybooks with full-text.

The Moving Picture World ,1916

The Adventures of Super3 Annette C.H. Nelson,Danielle N. DuPuis,2010-07-26 This book offers the most dynamic, simplest way to teach

students the concept of the Super3, enabling them to effortlessly remember and apply it to their educational or everyday life. Information literacy and effective problem solving are increasingly important skills for students to have. The Super3 strategy of plan, do, and review, created by Mike Eisenberg and Bob Berkowitz, brought information literacy to young children and made an abstract concept easy to understand and apply. Now this book can revolutionize the way teachers teach the concept of the Super3 for outstanding results in both the classroom and school library environment. The Adventures of Super3: A Teacher's Guide to Information Literacy for Grades K-2 contains a collection of dynamic lesson plans that library media specialists or classroom instructors can use to teach problem-solving strategies to children in kindergarten through second grade. Problems range from finding the meaning of a word to picking the right pet for a family. Each lesson contains performance objectives, lesson time-frame, engagement, activities, closure, assessment, and suggested children's literature. Also included are printable materials for each lesson and a DVD with two entertaining animated shorts.

Interfaces Between Language And Cognition Yury Y. Shtyrov,Andriy Myachykov,Christoph Scheepers,2013-06-28 Cognitive mechanisms underlying linguistic communication do not only rely upon retrieval and processing of linguistic information; they also involve constant updating and organizing of this linguistic information in relation with other, more general, cognitive mechanisms. Some existing theoretical models assume such a tight interactive link between domain-general and domain-specific sources of information in the cognitive organization of the linguistic faculty and during language use. Domain-specific constraints may include, for example, grammatical as well as lexical and pragmatic knowledge. Domain-general constraints comprise processing limitations imposed by the cognitive mechanisms of memory, attention, learning, and social interaction. However, much of the existing research tends to focus on one or the other of the aforementioned areas, while integrative accounts are still rather sparse at present. Therefore, the aim of this Research Topic of Frontiers in Cognition is to bring together researchers who, with in their respective research fields and by using different methodologies, represent integrative approaches to the study of language. We invite submissions from a wide range of interrelated areas of research: cognitive architectures of language, aspects of language processing, linguistic development, bilingualism, language embodiment, neuropsychology of linguistic function, among others. We would like to solicit original research contributions discussing behavioral, neurophysiological, and computational evidence as well as papers on methodological and/or theoretical aspects of the interplay between linguistic and non-linguistic cognitive processes.

U.S. Government Films for Public Educational Use ,1964

Step-by-Step - Grades 1-2 (eBook) Nadine Rogers,Tina West,2009-09-01 Do you want to encourage your students to follow directions, enhance their creativity and increase their motivation in a fun-filled, productive way? If you do, then this is the book for you! These step-by-step activities also expand reading and vocabulary skills if you have students read them, and they develop listening skills when you read them aloud to your class. Organized by seasons, the activities include Presidents' Day, Mother's Day, Father's Day and a variety of other subjects and special days throughout the year. Students will learn how to follow directions for coloring, changing words into other words, drawing pictures, folding paper and more. Each activity includes easy-to-understand directions, and requires a minimum of preparation time by the teacher. Your class will enjoy the mystery of following step-by-step directions without knowing the results until they're actually done!

Challenges Encountered by Chinese ESL Learners Mable Chan,Alessandro G. Benati,2022-08-01 This book provides a blended approach in outlining the properties of grammatical knowledge that have been causing difficulty to Chinese speaking learners, including tense and aspect, articles, passives, unaccusatives, plurality and motion verbs. It explains from different linguistics perspectives how these constraints/difficulties might be dealt with. It also offers readers a comprehensive account of these problems, and outlines the possible pedagogical solutions teachers can try in the classroom. These topics are selected because they bring substantial challenges and difficulties to Chinese English as a Second Language (ESL) learners. This book bridges the gap between acquisition theory and language pedagogy research, benefiting not just language learners but

language teachers around the world, and all those who would like to witness collaboration between second language acquisition theory and second language teaching practice in general. It initiates future work in which researchers from different fields with diverging theoretical perspectives and methodological approaches will be able to develop studies that are compatible with each other. This overall can facilitate our understanding of second language acquisition, and how instruction might help.
