**Standardization of work measurement** United States. Office of the Assistant Secretary of Defense (Installations and Logistics), 1975

Standardization of Work Measurement United States. Department of Defense, 1977 The purpose of this manual is to standardize instructions, methods, terminology and standard time data applicable to work measurement and the development of labor performance standards. The use of this manual is intended to: a. Maximize the productivity of industrial/management engineering personnel by providing a more rapid means of establishing labor

performance standards and eliminating duplication in labor performance standards development. b. Foster the increased use of engineered performance standards by making available standard time data of stated accuracy and reliability structured for maximum ease of application. c. Promote appropriate application of more efficient methods of performing work. d. Provide uniformity in labor performance standards development by standardizing the application of various work measurement techniques. e. Facilitate communication by providing common terminology and definitions.

**Milestones in Analog and Digital Computing** Herbert Bruderer, 2021-01-04 This Third Edition is the first English-language edition of the award-winning *Meilensteine der Rechentechnik*; illustrated in full color throughout in two volumes. The Third Edition is devoted to both analog and digital computing devices, as well as the world's most magnificent historical automata and select scientific instruments (employed in astronomy, surveying, time measurement, etc.). It also features detailed instructions for analog and digital mechanical calculating machines and instruments, and is the only such historical book with comprehensive technical glossaries of terms not found in print or in online dictionaries. The book also includes a very extensive bibliography based on the literature of numerous countries around the world. Meticulously researched, the author conducted a worldwide survey of science, technology and art museums with their main holdings of analog and digital calculating and computing machines and devices, historical automata and selected scientific instruments in order to describe a broad range of masterful technical achievements. Also covering the history of mathematics and computer science, this work documents the cultural heritage of technology as well.

The Measurement of Durable Goods Prices Robert J. Gordon, 2007-12-01 American business has recently been under fire, charged with inflated pricing and an inability to compete in the international marketplace. However, the evidence presented in this volume shows that the business community has been unfairly maligned—official measures of inflation and the standard of living have failed to account for progress in the quality of business equipment and consumer goods. Businesses have actually achieved higher productivity at lower prices, and new goods are lighter, faster, more energy efficient, and more reliable than their predecessors. Robert J. Gordon has written the first full-scale work to treat the extent of quality changes over the entire range of durable goods, from autos to aircraft, computers to compressors, from televisions to tractors. He combines and extends existing methods of measurement, drawing data from industry sources, Consumer Reports, and the venerable Sears catalog. Beyond his important finding that the American economy is more sound than officially recognized, Gordon provides a wealth of anecdotes tracing the postwar history of technological progress. Bolstering his argument that improved quality must be accurately measured, Gordon notes, for example, that today's mid-range personal computers outperform the multimillion-dollar mainframes of the 1970s. This remarkable book will be essential reading for economists and those in the business community.

**Source Data Automation Equipment Guide** United States. General Services Administration, 1970

**Standardization of Work Measurement. Volume 2, Clerical and Sales Occupations** United States. Defense Industrial Resources Support Office, 1975 This volume of Clerical and Sales Occupations standard time data is one of

several volumes included in the Defense Work Measurement Standard Time Data Program (DWMSTDP). It provides a single DoD source of clerical standard time data to be used in the economical development of labor standards for: Organizations, functions, or activities whose primary mission is clerical in nature, e.g., Finance, Data Processing, and Personnel Administration. Clerical jobs which are a part of organizations, functions, or activities whose primary mission is not clerical in nature, e.g., clerks, typists, and keypunch operators. Elements of work performed by personnel whose primary job is other than clerical but who do clerical work as a part of their job, e.g., filing of shop orders, filling out forms, sorting documents, and telephoning. This publication applies to all military services and defense agencies. The data contained herein will be used to the maximum extent possible in the development of labor performance standards in compliance with DoD Directive 5010.31 and DoD Instruction 5010.34.
