Heterogeneous Catalysis in Organic

Transformations Varun Rawat, Anirban Das, Chandra Mohan Srivastava, 2022-04-06 As the broad challenges around energy and the environment have become the focus of much research, scientists and experts have dedicated their efforts to developing more active and selective catalytic systems for key chemical transformations. For many decades environmentally viable protocols for the synthesis of fine chemicals have been the crux of academic and industrial research. Heterogeneous Catalysis in Organic Transformations serves as an overview of this work, providing a complete description of role of heterogeneous catalysis in organic transformations and offering a review of the current and near future technologies and applications. Discusses the fundamentals of catalysis and compares the advantages and disadvantages of different types of catalyst systems Examines oxide nanoparticles and noble metal nanoparticles Consider organometallic compounds, solid-supported catalysts, and mesoporous materials Describes recent advances in metal-based heterogeneous catalysts and new reactions with possible mechanistic pathways Providing a comprehensive review of heterogeneous catalysis from the basics through recent advances, this book will be of keen interest to undergraduates, graduates, and researchers in chemistry, chemical engineering, and associated fields.

Risk Thinking for Cloud-Based Application

Services Eric Bauer,2017-04-07 Many enterprises are moving their applications and IT services to the cloud. Better risk management results in fewer operational surprises and failures, greater stakeholder confidence and reduced regulatory concerns; proactive risk management maximizes the likelihood that an enterprise's objectives will be achieved, thereby enabling organizational success. This work methodically considers the risks and opportunities that an enterprise taking their applications or services onto the cloud must consider to obtain the cost reductions and service velocity improvements they desire without suffering the consequences of unacceptable user service quality.

The Global Player: How to Become "the Logistics Company for the World" Thomas Musiolik, 2012
According to Frank Appel, CEO of Deutsche Post DHL, within its Strategy 2015 framework, DHL will become the logistics company for the world. In times of globalization and economic downturn, the effects of which can be felt in the entire

logistics industry, this goal is an enormous challenge for DHL. In order to attain this goal, it is essential for DHL to create a closer linkage of its business areas, to slim down its processes and to put a stronger focus on the ever-changing needs of the customer. The objective of this book is to offer cost reduction solutions and give suggestions on how quality can be improved, which will distinguish DHL from its competitors while fulfilling the needs of the customer, i.e. become the logistics company for the world. This book is divided into four sections. First, there is a synopsis of the history of DHL, as well as a description of its organizational and corporate structure and concludes with a comparison of the business segments of DHL with its main competitors. After that, the corporate strategy is analyzed: (1) its core competencies, (2) its mergers and acquisitions, (3) Ansoff, and (4) BCG/BCG II. The section concludes by examining which strategy could be appropriate for a successful future for DHL. The third section deals with the competitive strategy of DHL. Porter's Five Forces are utilized to analyze the attractiveness of the industry, as well as its competitors, suppliers and customers. This is followed by an analysis of the appropriate strategy for DHL Logistics by means of the Generic Strategies according to Porter, the Hybrid Strategies, the TOWS and an evaluation of the strategic options. The next step will explain the appropriate processes for the strategy of the value chain. A Scenario 2020, which draws a picture of what the industry might look like in

ten years, concludes this section. The final section will highlight the factors that can give DHL sustainable competitive advantages. The functional strategies are presented, the global key markets are analyzed and appropriate strategic alliances are examined. The author sets great value upon clear and interesting statements that ensure an easy understanding of the subject matter but at the same time facilitate a fast transfer into practice.

Bispectral Methods of Signal Processing

Alexander V. Totsky, Alexander A. Zelensky, Victor F. Kravchenko, 2014-12-11 By studying applications in radar, telecommunications and digital image restoration, this monograph discusses signal processing techniques based on bispectral methods. Improved robustness against different forms of noise as well as preservation of phase information render this method a valuable alternative to common power-spectrum analysis used in radar object recognition, digital wireless communications, and jitter removal in images.

QoS and QoE Management in UMTS Cellular Systems

David Soldani, Man Li, Renaud Cuny, 2007-01-11 This comprehensive volume provides state-of-the-art guidance on Quality of Service (QoS) and Quality of end-user Experience (QoE) management in UMTS cellular systems, tackling planning, provisioning, monitoring and optimisation issues in a single accessible resource. In addition, a detailed discussion is provided on service applications, QoS concept, architecture and functions in access, packet & circuit switched core and backbone networks. Defines and explains the differences between QoS and QoE, and end-to-end concept, based on the premise that it is the end-user who is the ultimate beneficiary of QoS. Covers QoS and QoE issues related to present and forthcoming service applications, including multimedia messaging service (MMS), Video Sharing (VS), content download, business connectivity, Push to talk over Cellular (PoC), Voice over IP (VoIP), presence, instant messaging, gaming, streaming and browsing. Presents QoS concepts and architecture as defined in 3GPP Releases 97/98, 99, 5, 6, and 7, and provides a comprehensive description of protocols and packet data transfer across WCDMA evolved and (E)GPRS networks. Discusses service driven radio network planning aspects for (E)GPRS and WCDMA. Includes three detailed chapters covering concepts, means and methods for QoS provisioning, QoS & QoE performance monitoring and optimisation. This book is aimed at operators, vendors, deployers, consultants and managers specialising in the research, development, implementation, marketing and sales of products and tools for QoS

and QoE management in UMTS networks. It will also be of interest to postgraduate students and researchers in the field of telecommunications and specialising in UMTS QoS and QoE principles and practices.
