Youth Entrepreneurship Chris Ehiobuche, Chizoba Madueke, 2017-02-10 The challenges and opportunities facing the Nigerian youths demand rethinking of new ways of doing things. Youth unemployment and underemployment are at a record high. More than ever, the Nigerian youths are in dire need of finding other avenues to explore in pursuit of life endeavors. Youth employment, underemployment, and unemployment are serious concerns for our society, civilization, and the nation. Ehiobuche and Madueke took a different approach to discussing and presenting a practical approach to youth entrepreneurship from the notion of a shared responsibility for the change of mindset from falling into the victims theory dimensions to intelligent ventures and resilience. Their model presents insight on how a paradigm shift among the youths and the society in general from job search to business development may well lead to entrepreneurs and self-productive citizens. The authors hope to inspire, inform, and encourage today's youths to become tomorrow's entrepreneurs, leaders, and good citizens. Making the transition from seeking employment, unemployment, or underemployment to self-employment/entrepreneurship is the primary purpose of this book. The topics include the following: Conquering personal and cultural roadblocks to entrepreneurship Shifting mental and physical focus from employee to employer Avoiding common pitfalls in starting and running a sustainable small business Making the best out of being a youth The authors urge the Nigerian youths to avoid falling into a victim mentality and start their paradigm shift into the mindsets of entrepreneurs.

**Online around the World** Laura M. Steckman, Marilyn J. Andrews, 2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow

the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

*Social Media and Indian Youth* Dr.Sanjay Singh Baghel,Dr. Uma S. Singh,2015 Preface Social networking sites (SNS's) have become imperative to the lives of youth today. They are a compulsive and addictive behavior to our modern adolescence. Facebook, twitter, orkut, linkedin and other networking sites have not only given them a platform to interact, discuss and remain in touch with their loved ones who live at places across the globe but also to voice their opinions on social issues. It has created nothing less than a revolution across the world. The recent Jan Lokpal Bill Movement led by Anna Hajare and his team, and Nirbhaya Gang Rape case movement are uprising examples of SNS's where youths created mass awareness across the society. They not only participated to create a movement but also voiced their opinions through the various social networking sites mobilizing people to sign online petitions, sending them across to the respective authorities. It was an eye opening example for any country and the government to understand the power of Social networking sites. The SNS's have made a significant change in their personal and social lives, and played a crucial role in breaking boundaries, crossing nations, enabling them to communicate and share their view on issues like violation of human rights, girl's education, 10 • Social Media and Indian Youth adverse effects of global warming, wrong deeds of political leaders, crime against women, corruption etc. On one hand where social networking sites empower the youth and enable them to grow up to their social circle in terms of their own acquaintances, on the other it raises many questions about their life styles, safety, privacy and legal issues. U) compared to 10.92 million users in 2010 and was expected to reach 15.9 million users by end of 2012. 80% of the internet users are urban users and 20% are rural users in India and educated young people. Indians migrate to United States (US) for education and jobs and most of them will be in constant touch with friends and families which led to the rise in usage of social networks and it is further expected to increase as US companies set up offices in India employing thousands of

people here. Apart from this more technology related products like mobiles, laptops, other computing devices like PCs, tablets and finally the voyeuristic appeal with open networks will drive the usage further. Most popular social networking site in India is Facebook as recently it dethroned Indonesia from the number two slot with 46 million monthly active users in February 2012 on the site, an increase of 132% from the prior year. Urban cities like Mumbai, Delhi, Chennai, Kolkata, Bangalore, Hyderabad, Pune, Ahmedabad and other tier land 2 cities and towns dominate the social networking usage in India. 75% is dominated by male and mostly the young students and professionals in the age group of 18-24 are dominating the social media usage followed by the 25- 34 age group. *Mobile Communication and Society* Manuel Castells, Mireia Fernandez-Ardevol, Jack Linchuan Qiu, Araba Sey, 2009-09-18 How wireless technology is redefining the relationship of communication, technology, and society around the world—in everyday work and life, in youth culture, in politics, and in the developing world. Wireless networks are the fastest growing communications technology in history. Are mobile phones expressions of identity, fashionable gadgets, tools for life—or all of the above? *Mobile Communication and Society* looks at how the possibility of multimodal communication from anywhere to anywhere at any time affects everyday life at home, at work, and at school, and raises broader concerns about politics and culture both global and local. Drawing on data gathered from around the world, the authors explore who has access to wireless technology, and why, and analyze the patterns of social differentiation seen in unequal access. They explore the social effects of wireless communication—what it means for family life, for example, when everyone is constantly in touch, or for the idea of an office when workers can work anywhere. Is the technological ability to multitask further compressing time in our already hurried existence? The authors consider the rise of a mobile youth culture based on peer-to-peer networks, with its own language of texting, and its own values. They examine the phenomenon of flash mobs, and the possible political implications. And they look at the relationship between communication and development and the possibility that developing countries could leapfrog directly to wireless and satellite technology. This sweeping book—moving easily in its analysis from the United States to China, from Europe to Latin America and Africa—answers the key questions about our transformation into a mobile network society.

**Contemporary Marriage** Kingsley Davis, 1986-08-20 This fascinating symposium is based on an assumption that no longer seems to need justification: that the institution of marriage is today experiencing profound changes. But the nature of those changes—their causes and consequences—is very much in need of explication. The experts contributing to this volume bring a wide range of perspectives—sociological, anthropological, economic, historical, psychological, and legal—to the problem of marriage in modern society. Together these essays help illuminate a form of relationship that is both vulnerable and resilient, biological and social, a reflection of and an influence on other social institutions. *Contemporary Marriage* begins with an important assessment of the revolution in marital behavior since World War II, tracing trends in marriage age, cohabitation, divorce, and fertility. The focus here is primarily on the United States and on industrial societies in general. Later chapters provide intriguing case studies of particular countries. There is a recurrent interest in the impact on marriage of modernization itself, but a number of essays probe influences other than industrial development, such as strong

cultural and historical patterns or legislation and state control. Beliefs and expectations about marriage are explored, and human sexuality and gender roles are also considered as factors in the nature of marriage. Contemporary Marriage offers a rich spectrum of approaches to a problem of central importance. The volume will reward an equally broad spectrum of readers interested in the meaning and future of marriage in our society.

*The Armies of the Streets* Adrian Cook, 2014-07-15 In July 1863 New York City experienced widespread rioting unparalleled in the history of the nation. Here for the first time is a scholarly analysis of the Draft Riots, dealing with motives and with the reasons for the recurring civil disorders in nineteenth-century New York: the appalling living conditions, the corruption of the civic government, and the geographical and economic factors that led up to the social upheaval.

Networked Publics Kazys Varnelis, 2012-08-17 How maturing digital media and network technologies are transforming place, culture, politics, and infrastructure in our everyday life. Digital media and network technologies are now part of everyday life. The Internet has become the backbone of communication, commerce, and media; the ubiquitous mobile phone connects us with others as it removes us from any stable sense of location. *Networked Publics*

examines the ways that the social and cultural shifts created by these technologies have transformed our relationships to (and definitions of) place, culture, politics, and infrastructure. Four chapters—each by an interdisciplinary team of scholars using collaborative software—provide a synoptic overview along with illustrative case studies. The chapter on place describes how digital networks enable us to be present in physical and networked places simultaneously—often at the expense of nondigital commitments. The chapter on culture explores the growth and impact of amateur-produced and remixed content online. The chapter on politics examines the new networked modes of bottom-up political expression and mobilization. And finally, the chapter on infrastructure notes the tension between openness and control in the flow of information, as seen in the current controversy over net neutrality.

*Industrial Pharmaceutical Biotechnology* Heinrich Klefenz, 2002-04-22 This volume focuses on pharmaceutical biotechnology as a key area of life sciences. The complete range of concepts, processes and technologies of biotechnology is applied in modern industrial pharmaceutical research, development and production. The results of genome sequencing and studies of biological-genetic function are combined with chemical, micro-electronic and microsystem technology to produce medical devices and diagnostic biochips. New organisational structures in the co-operation of institutes, companies and networks enable faster knowledge and product development and immediate application of the results of research and process development. This book is the ideal source of information for scientists and engineers in research and development, for decision-makers in biotech, pharma and chemical corporations, as well as for research institutes, but also for founders of biotech companies and people working for venture capital corporations.
