Euthalian Traditions Vemund Blomkvist,2012-10-30 The auxiliary material preserved in New Testament manuscripts has been neglected by scholars. The present study treats the Euthalian paraphrases and the biblical text of Acts and the Letters together, as a 'system'. The book is of interest to students of the reception of the New Testament. It also includes a study on the meta-terminology of the apparatus, written in collaboration with David Hellholm.

Complex Valued Nonlinear Adaptive Filters Danilo P. Mandic,Vanessa Su Lee Goh,2009-04-20 This book was written in response to the growing demand for a text that provides a unified treatment of linear and nonlinear complex valued adaptive filters, and methods for the processing of general complex signals (circular and noncircular). It brings together adaptive filtering algorithms for feedforward (transversal) and feedback architectures and the recent developments in the statistics of complex variable, under the powerful frameworks of CR (Wirtinger) calculus and augmented complex statistics. This offers a number of theoretical performance gains, which is illustrated on both stochastic gradient algorithms, such as the augmented complex least mean square (ACLMS), and those based on Kalman filters. This work is supported by a number of simulations using synthetic and real world data, including the noncircular and intermittent radar and wind signals.
