**Attention All Shipping** Charlie Connelly,2011-06-02 This solemn, rhythmic intonation of the shipping forecast on BBC radio is as familiar as the sound of Big Ben chiming the hour. Since its first broadcast in the 1920s it has inspired poems, songs and novels in addition to its intended objective of warning generations of seafarers of impending storms and gales. Sitting at home listening to the shipping forecast can be a cosily reassuring experience. There's no danger of a westerly gale eight, veering southwesterly increasing nine later (visibility poor) gusting through your average suburban living room, blowing the Sunday papers all over the place and startling the cat. Yet familiar though the sea areas are by name, few people give much thought to where they are or what they contain. In ATTENTION ALL SHIPPING Charlie Connelly wittily explores the places behind the voice, those mysterious regions whose names seem often to bear no relation to conventional geography. Armchair travel will never be the same again.

**All Things New** John Eldredge,2017-09-26 New York Times bestselling author John Eldredge offers readers a breathtaking look into God's promise for a new heaven and a new earth. This revolutionary book about our future is based on the simple idea that, according to the Bible, heaven is not our eternal home--the New Earth is. As Jesus says in the gospel of Matthew, the next chapter of our story begins with the renewal of all things, by which he means the earth we love in all its beauty, our own selves, and the things that make for a rich life: music, art, food, laughter and all that we hold dear. Everything shall be renewed when the world is made new. More than anything else, how you envision your future shapes your current experience. If you knew that God was going to restore your life and everything you love any day; if you believed a great and glorious goodness was coming to you--not in a vague heaven but right here on this earth--you would have a hope to see you through anything, an anchor for your soul, an unbreakable spiritual lifeline, reaching past all appearances right to the very presence of God (Hebrews 6:19). Most Christians (most people for that matter) fail to look forward to their future because their view of heaven is vague, religious, and frankly boring. Hope begins when we understand that for the believer nothing is lost. Heaven is not a life in the clouds; it is not endless harp-strumming or worship-singing. Rather, the life we long for, the paradise Adam and Eve knew, is precisely the life that is coming to us. And that life is coming soon.

He's within striking distance of accomplishing it. On his side, he's got hundreds of well-trained mercenaries and conspirators, unlimited funding and no conscience to hold him back. He also controls the power grid for the United States and is finalizing research to form an army of super soldiers. For the United States we have Johann Smitz, known as 'Father' to his four operatives Stone, Weapon, Linda and Emily his daughter, yet to the government he's known as the 'Record Keeper'. All hope has been placed in the hands of this small band of dedicated patriots to thwart Bitters' plans. Father's four operatives must split up in order to complete the missions they have been assigned. Getting back control of the power grid and neutralizing the threats on home soil. While Ernie, without his cohorts, has to slip into a secure facility in Russia. The likes of which none have seen before and penetrate its research and development center, then confiscate the research and rescue a scientist that is integral to completing the super soldier formula. Each operative's heart is heavy knowing that, not only do they need to complete their missions successfully, they also need to retrieve their agency leader 'Father' who has been kidnapped by Bitters, tightening his grip for control.

**It's All Under Control** Jennifer Dukes Lee,2018-09-18 "It's All Under Control is the gift your soul has been desperately seeking—to feel how His arms of love are under you, carrying you though it all." —Ann Voskamp, New York Times bestselling author of *The Broken Way* and *The Greatest Gift* It's time to get our control under control. Jennifer Dukes Lee never thought she struggled with control. As long as everything went exactly the way she wanted it to, she was totally flexible. But then Jennifer discovered what happens when you try to wrap your arms around everything, thinking it's all on you: You get burned out on hustle. You toss and turn more at night, and you laugh less during the day. You're so busy—caring, serving, working, and trying so hard—that you can't even hear God's voice anymore. It's All Under Control is a book for every woman who is hanging on tight and trying to get each day right—yet finding that life often feels out of control and chaotic. Join Jennifer on the journey of learning how to: Overcome the anxieties and worries that burden your heart Prioritize your busy life so you can make choices that align with God's best for you Find freedom through a new "Do, Delegate, or Dismiss" approach to your daily tasks Let go of what God has not asked you to do, so you can shine at what he has Discover a new way of living that will free you to be you, and finally experience the peace of knowing a God who truly has it all under control.

**The Fourth Industrial Revolution** Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.
