**“Buyurdum ki...” - The Whole World of Ottomanica and Beyond** ,2023-09-04 This book is dedicated to Claudia Römer and brings together 33 contributions spanning a period from the 15th to the 20th century and covering the wide range of topics with which the honouree is engaged. The volume is divided into six parts that present current research on language, literature, and style as well as newer approaches and perspectives in dealing with sources and terminologies. Aspects such as conquest, administration, and financing of provinces are found as well as problems of endowments and the circulation of goods in the Arab provinces of the Ottoman Empire. Another main topic is dedicated to minorities and their role and situation in various provinces and cities of the Ottoman Empire, as represented by various sources. But also topics like conversion, morality and control are illuminated. Finally, the volume provides an insight into the late Ottoman and early republican period, in which some previously unpublished sources (such as travel letters, memoirs) are presented and (re)discussed. The book is not only aimed at scholars and students of the Ottoman Empire; the thematic range is also of interest to linguists, historians, and cultural historians.

Coverage includes both individual and group therapies. Fifty reproducible forms and handouts can be photocopied from the book or downloaded from the companion website. The website also features a supplemental chapter on efficacy and outcomes research in neurorehabilitation, appendices with helpful resources, color versions of selected figures, and more.

**Engaging Chinese Students in Teaching and Learning at Western Higher Education Institutions** Karen Burrows,2016-09-23 There has been an increase over the past decade in the number of Chinese students studying in western Higher Education Institutions, with figures expected to increase over the next 10 years. However, this has proved particularly challenging for the lecturers in these Institutions regarding how best to engage and teach this particularly unique student group. The Chinese student presents these challenges due to the many cultural and language differences that can be identified, as well as to the western teacher's perception of how these students like to be taught. This book disputes such myths, and provide a useful guide on what those challenges are, offering practical guidance on how to overcome them. The book firstly identifies and defines the Chinese student studying for a degree in western universities and institutions, before going on to examine and explore the cultural differences by discussing issues around teaching and learning. A chapter focusing specifically on language breaks down the

differences in detail, with discussions around tonal language and its impact on the student's understanding. Further chapters discuss attitudes to learning, staff support for teaching this particular group, and, finally, some practical suggestions on how best to engage the student and enable them to achieve.

*Essentials of Teaching and Integrating Visual and Media Literacy* Danilo M. Baylen, Adriana D'Alba, 2015-04-23 This book focuses on how to effectively integrate the teaching and learning of visual and media literacies in K-12 and higher education. Not only does it address and review the elements and principles of visual design but also identifies, discusses and describes the value of media in learning diverse and challenging content across disciplines. Finally, this book provides a balanced treatment of how visual and media literacies support deep content learning, student engagement, critical thinking, creativity, problem solving, and production.

**Advances in Digital Forensics XII** Gilbert Peterson, Sujeet Sheno, 2016-09-19 Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance -- investigations of security breaches yield valuable information that can be used to design more secure systems. *Advances in Digital Forensics XII* describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Mobile Device Forensics, Network Forensics, Cloud Forensics, Social Media Forensics, Image Forensics, Forensic Techniques, and Forensic Tools. This book is the twelfth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty edited papers from the Twelfth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in New Delhi, India in the winter of 2016. *Advances in Digital Forensics XII* is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Gilbert Peterson, Chair, IFIP WG 11.9 on Digital Forensics, is a Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. Sujeet Sheno is the F.P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa, Tulsa, Oklahoma, USA.

*Digital Games and Mathematics Learning* Tom Lowrie, Robyn Jorgensen (Zevenbergen), 2015-10-05 Digital games offer enormous potential for learning and engagement in mathematics ideas and processes. This volume offers multidisciplinary perspectives—of educators, cognitive scientists, psychologists and sociologists—on how digital games influence the social activities and mathematical ideas of learners/gamers. Contributing authors identify opportunities for broadening current understandings of how mathematical ideas are fostered (and embedded) within digital game environments. In particular, the volume advocates for new and different ways of thinking about mathematics in our digital age—proposing that these mathematical ideas and numeracy practices are distinct from new literacies or multiliteracies. The authors acknowledge that the promise of digital games has not always been realised/fulfilled. There is emerging, and considerable, evidence to suggest that traditional discipline boundaries restrict opportunities for mathematical learning. Throughout the book, what constitutes mathematics learnings and pedagogy is contested. Multidisciplinary viewpoints are used to describe and understand the potential of digital games for learning mathematics and identify current tensions within the field. Mathematics learning is defined as being about problem solving; engagement in mathematical ideas and processes; and social engagement. The artefact, which is the game, shapes the ways in which the gamers engage with the social activity of gaming. In parallel, the book (as a textual artefact) will be supported by Springer's online platform—allowing for video and digital communication (including links to relevant websites) to be used as supplementary material and establish a dynamic communication space.

**Discovering Modern C++** Peter Gottschling, 2021-11-19 Discovering Modern C++, Second Edition by Peter Gottschling is an intensive introduction that guides you smoothly to sophisticated approaches based on advanced features. Thoroughly updated for C++17 and C++20, this Second Edition introduces key concepts using examples from many technical problem domains, drawing on his extensive experience training professionals and teaching C++ to students of physics, math, and engineering. This book is designed to help you get started rapidly and then master increasingly robust features, from lambdas to expression templates. You will also learn how to take advantage of the powerful libraries available to C++ programmers: both the Standard Template Library (STL) and scientific libraries for arithmetic, linear algebra, differential equations, and graphs. In this Second Edition, Gottschling also presents thorough and expert coverage of multi-threading and variadic templates. Throughout, Gottschling demonstrates how to write clear and expressive software using object orientation, generics, metaprogramming, and procedural techniques. By the time you are

finished, you will have mastered all the abstractions you need to write C++ programs with exceptional quality and performance.

**The Last Heroes** Gary Bridson-Daley,2017-11-01 The Second World War is famed for being the conflict that changed the face of warfare, and it is the last that changed the face of the world. In addition to remembering those that passed away in those dark days of war, a sincere debt of gratitude is owed to all those now in their twilight years who gave all that they had for King and Country. Here Gary Bridson-Daley presents forty-two of over a hundred interviews he conducted with veterans over recent years, adding to the history books the words and the original poetry of those that fought and supported the war effort to ensure freedom, peace and prosperity for generations to come. From each corner of the British Isles and every armed service, from Dam Buster George 'Johnny' Johnson through to riveter Susan Jones: heroes, all.
