Instructional Technology Tools: a Professional Development Plan L. Robert Furman EdD, 2012-03-15 The use of instructional technology in twenty-first-century classrooms is not a subject to be debated. Rather, it needs to be embraced as a standard practice rather than an enriching activity. In *Instructional Technology Tools: A Professional Development Plan*, author L. Robert Furman presents a comprehensive guide to help educators embrace the use of instructional technology tools in the classroom. Answering the typical questions often posed by teachers and staff, Furman emphasizes the practical use of technology and introduces a breakthrough development called E-ProDev Days for offsite electronic professional development. He gives administrators the tools necessary to conduct fulfilling and meaningful professional development days, in-house or electronically, revolving around technology. *Instructional Technology Tools: A Professional Development Plan* also includes professional development lesson plans; tutorials for teachers and students; sample sites where examples of each e-tool are available to share; addresses to obtain the e-tools. Presenting a logical and practical approach to teaching a staff how to successfully use e-tools in their classroom, *Instructional Technology Tools: A Professional Development Plan* helps administrators help teachers to enhance their classrooms, manage time, organize themselves, and save money.

Disorder and the Disinformation Society Jonathan Paul Marshall,James Goodman,Didar Zowghi,Francesca da

Rimini,2015-04-17 This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society. Through an investigation of informationalism, defined as a contemporary form of capitalism, it describes the social processes producing informational disorder. While most social theory sees disorder as secondary, pathological or uninteresting, this book takes disordering processes as central to social life. The book engages with theories of information society which privilege information order, offering a strong counterpoint centred on disinformation. Disorder and the Disinformation Society offers a practical agenda, arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism. It outlines the dynamics of software failure as they impinge on of information workers and on daily life, explores why computerized finance has become inherently self-disruptive, asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship, and reveals how social media can extend, but also distort, the development of social movements.

Review of Some Text to Speech Converters, Voice Changers, Video Editors, Animators, Speaking Avatar Makers and Live Str Dr. Hedaya Mahmood Alasooly, 2020-09-23 As videos are so much important today, I believe that everyone must have some knowledge on creating and editing videos for common tasks required by his personal or business use. This book has mainly an objective to evaluate some text to speech converters, voice changers, video editors, cartoon animators and video recording and live streaming programs. As I am Arabic, I gave special importance to look for the best tools that can convert Arabic text to voice with good quality because of the lack of these tools. And I also gave special importance to look for the best tools that can change the voice tune as a lot of people don't like to make videos with their voice for special reasons. Then I gave quick guide on how to use two websites that enable people to create cartoon animation videos in a simple way, animaker.com/ website and powtoon.com website. Then I gave quick guide on how to use one of the best animator programs, which is Reallusion Cartoon Animator 4. I explained also how it is possible to make face mockup through Cartoon Animator 4 Motion Live 2D Plugin. Then I introduced Adobe Character Animator as alternative program to make face mockup. Finally I explained about one of the video recording and live streaming programs, which is OBS Studio. I mentioned briefly how to setup OBS studio to create livestream video on Youtube and Facebook. At the end, I showed how to use Voki website to create customizable speaking avatars. This work is divided into the following sections. 1. Some tools to reshape the Arabic letters so they can be converted to voice in other tools. 2. Some tools to convert English text to speech TTS. 3. Some tools to convert Arabic text to speech TTS. 4. Narrating Postcolonial Arab Nations Lindsey Moore, 2017-10-30 *Narrating Postcolonial Arab Nations* significantly enhances the interface between postcolonial literary studies and the hitherto under-studied Arab world. Lindsey Moore brings together canonical and less familiar Arab novels and memoirs from the last half century to consider colonial continuities and consequences. Literary narratives are shown to oppose repressive versions of nationalism and to track desire lines toward more hospitable nations. The literatures discussed in this book enable a deeper historical understanding of twenty-first century Arab uprisings and their aftermaths. The book analyzes four rich sites of literary production: Egypt, Algeria, Lebanon, and Palestine. Moore explores ways in which authors critique particular nation-state formations and decolonizing histories, engage the general problematic of 'the nation', and redefine, repurpose, and transcend national literary canons. Chapter One contrasts Egyptian literary representations of popular revolt with official revolutionary discourse. Chapter Two addresses the enduring legacy of anti-colonial violence in Algeria and the place of Albert Camus in its literature. Chapter Three uses narratives of gender violence on the Beirut front line to reveal the divisibility and intersectional identity politics of postcolonial nation-states. Chapter Four emphasizes ways in which Palestinian memoirs insist upon remembering towards a postcolonial future. The book provides detailed analysis of literary narratives by Etel Adnan, Rabih Alameddine, Alaa al-Aswany, Rachid Boudjedra, Albert Camus, Rashid al-Daïf, Assia Djebar, Ghada Karmi, Naguib Mahfouz, Jean Said Makdisi, Edward Said, Boualem Sansal, Raja Shehadeh, Miral al-Tahawy, and Latifa al-Zayyat. It is an indispensable volume for students and scholars of Postcolonial, Arab, and World literatures.

The Sociolinguistics of Hip-hop as Critical Conscience Andrew S. Ross, Damian J. Rivers, 2017-12-19 This book adopts a sociolinguistic perspective to trace the origins and enduring significance of hip-hop as a global tool of resistance to oppression. The contributors, who represent a range of international perspectives, analyse how hip-hop is employed to express dissatisfaction and dissent relating to such issues as immigration, racism, stereotypes and post-colonialism. Utilising a range of methodological approaches, they shed light on diverse hip-hop cultures and practices around the world, highlighting issues of relevance in the different countries from which their research originates. Together, the authors expand on current global understandings of hip-hop, language and culture, and underline its immense power as a form of popular culture through which the disenfranchised and oppressed can gain and maintain a voice. This thought-provoking edited collection is a must-read for scholars and students of linguistics, race studies and political activism, and for anyone with an interest in hip-hop.

The Social and Behavioural Aspects of Climate Change Pim Martens, Chiung Ting Chang, 2017-09-08 Over the past few years, and certainly since the publication of the Stern Report, there has been increasing recognition that climate change is not only an environmental crisis, but one with important social and economic dimensions. There is now a growing need for multi-disciplinary research and for the science of climate change to be usefully translated for policy-makers. Until very recently, scientific and policy emphasis on climate change has focused almost exclusively on mitigation efforts: mechanisms and regulations to reduce greenhouse gas emissions. The success of such efforts to date is debatable. In fact, the impact of ever more stringent emission control programmes could potentially have enormous social consequences. Little effort has been expended on the exploration of a systematic evaluation of climate stabilization benefits or the costs of adapting to a changed climate, let alone attempting to integrate different approaches. There is an increasing recognition that the key actors in the climate crisis also need to be preparing for change that is unavoidable. This has resulted in a greater consideration of vulnerability and adaptation. The book, based on the research programme Vulnerability, Adaptation and Mitigation (VAM) which ran from 2004 to 2010, funded by the Netherlands Organisation for Scientific Research (NWO), presents a cluster of case studies of industries, communities and institutions which each show how vulnerability, adaptation and mitigation analyses can be integrated using social behavioural sciences. Each chapter makes specific recommendations for the studied industry sector, community or institution, analyses the latest research developments of the field and identifies priorities for future research. The book argues that the inherent complexity of climate change will ultimately require a much more integrated response both scientifically – to better understand multiple causes and impacts – as well as at the scientific/policy interface, where new forms of engagement between scientists, policy-makers and wider stakeholder groups can make a valuable contribution to more informed climate policy and practice. The book is particularly timely as the scientific research and policy debate

is shifting from one of problem-framing to new agendas that are much more concerned with implementation, the improvement of assessment methodologies from a multi-disciplinary perspective, and the reframing of current scientific understanding towards mitigation, adaptation and vulnerability. A critical element in responding to the climate change challenge will be to ensure the translation of these new scientific insights into innovative policy and practice on the ground. This book provides some fundamental elements to answer this need. *The Social and Behavioural Aspects of Climate Change: Linking Vulnerability, Adaptation and Mitigation* will be essential reading for social science researchers and policy managers in the area of climate change, as well as for those who want to know what the social and behavioural sciences can contribute toward coping with climate hazards. NGOs, law firms and businesses in the energy sector or other climate related fields will also find the book of great value.

Digital Renaissance Joel Waldfoegel, 2018-11-13 How digital technology is upending the traditional creative industries—and why that might be a good thing The digital revolution poses a mortal threat to the major creative industries—music, publishing, television, and the movies. The ease with which digital files can be copied and distributed has unleashed a wave of piracy with disastrous effects on revenue. Cheap, easy self-publishing is eroding the position of these gatekeepers and guardians of culture. Does this revolution herald the collapse of culture, as some commentators claim? Far from it. In *Digital Renaissance*, Joel Waldfoegel argues that digital technology is enabling a new golden age of popular culture, a veritable digital renaissance. By reducing the costs of production, distribution, and promotion, digital technology is democratizing access to the cultural marketplace. More books, songs, television shows, and movies are being produced than ever before. Nor does this mean a tidal wave of derivative, poorly produced kitsch; analyzing decades of production and sales data, as well as bestseller and best-of lists, Waldfoegel finds that the new digital model is just as successful at producing high-quality, successful work as the old industry model, and in many cases more so. The vaunted gatekeeper role of the creative industries proves to have been largely mythical. The high costs of production have stifled creativity in industries that require ever-bigger blockbusters to cover the losses on ever-more-expensive failures. Are we drowning in a tide of cultural silt, or living in a golden age for culture? The answers in *Digital Renaissance* may surprise you.
