Boeing 777 Bruce Campion-Smith,1997 Smith examines the development of the Boeing 777 aircraft and looks at its fly-by-wire technology. The 777 is the most recent in the Boeing family of jetliners and has revolutionized civil aviation. This is a lively, pocket-sized guide to an airline technology that will bring us into the 21st century.

The DoD C-17 Versus the Boeing 777. A Comparison of Acquisition and Development ,1999 In 1995, two significant aircraft made aviation history as they lifted off runways in different parts of the country. One, the Boeing 777, a wide-bodied, two-engine passenger plane created by private enterprise, made its first commercial transoceanic flight in June 1995. The other, the C-17, a military cargo plane created by the Department of Defense (DOD), received initial operating certification in January 1995. Each aircraft exhibited innovative design and high-tech features, but neither boasted an unprecedented level of untried technology. They were similar in many ways-both intended to ferry passengers or cargo with appropriate ease from one point to another. Yet each of these

aircraft had a unique story of development-one a straightforward narrative of almost 9 years, the other a complex, convoluted yarn spanning 24 years. Even after Congress approved funding, the C-17 time table was greater than the Boeing 777. This study compares and contrasts the histories of these two aircraft to determine why a private-sector company was able to develop and produce the 777 in significantly less time than the government took to develop and produce the C-17. The 777 originated in the late 1980s during market research by the Seattle-based Boeing Company. To determine what the market would bear, Boeing solicited input from commercial airlines, asking them what they wanted in a new aircraft. Once Boeing determined the type of aircraft to build, the company set a timeline, initiated innovative development procedures, and then followed a set of guidelines to produce the aircraft.

Flight 777 Ian Colvin,2013-02-19 On 1 June 1943 Flight 777, a Douglas DC-3, en route from Lisbon to Britain, was shot down over the Bay of Biscay by German aircraft. Among the dead was the actor Leslie Howard, who had returned from Hollywood to England to help the British war effort. Also on board was Howards tax adviser, Alfred Chenhalls, who smoked cigars and looked remarkably like Winston Churchill. Did the Germans believe that Churchill was on board Flight 777? Other aircraft flying that route went unmolested by the Luftwaffe in spite of the German air presence over the Bay of Biscay. These flights were operated by Dutch crews flying aircraft of KLM, which were on charter to BOAC, and it was an experience Dutch crew that was lost that day. Ian Colvin carried out an exhaustive investigation into the incident, including interviewing former Luftwaffe personnel and this book, first published in 1957, is the result of his endeavors.
