The uniqueness of this volume lies in its bringing together scholars from around the world to provide a broad synchronic and diachronic exploration of the relationship between text and image, as well as a reflection on the limits of representation through a re-thinking of the very acts of reading and viewing. While covering a variety of media—such as literature, painting, photography, film and comics—across time—from the 18th century to the 21st century—this collection also provides a special focus on the work of particular authors, such as A. S. Byatt, W. G. Sebald, and Art Spiegelman.
