📖 **Introduction to Physical Oceanography** Robert H. Stewart,2009-09 This book is written for college juniors and seniors and new graduate students in meteorology, ocean engineering, and oceanography. It begins with a brief overview of what is known about the ocean. This is followed by a description of the ocean basins, for the shape of the seas influences the physical processes in the water. Next, students will study the external forces, wind and heat, acting on the ocean, and the ocean’s response. It also includes the equations describing dynamic response of the ocean. For example, the equations of motion, the influence of earth’s rotation, and viscosity. Finally, students consider some particular examples: the deep circulation, the equatorial ocean and El Niño, and the circulation of particular areas of the ocean. Contents: 1) A Voyage of Discovery. 2) The Historical Setting. 3) The Physical Setting. 4) Atmospheric Influences. 5) The Oceanic Heat Budget. 6) Temperature, Salinity and Density. 7) The Equations of Motion. 8) Equations of Motion with Viscosity. 9) Response of the Upper Ocean to Winds. 10) Geostrophic Currents. 11) Wind Driven Ocean Circulation. 12) Vorticity in the Ocean. 13) Deep Circulation in the Ocean. 14) Equatorial Processes. 15) Numerical Models. 16) Ocean Waves. 17) Coastal Processes and Tides.

📖 **Ethnic and Vernacular Music, 1898-1960** Paul Vernon,1995-12-11 Detailed information on almost all ethnic and vernacular recordings from many countries on 78rpm is provided in this seminal work. The current state of discographical research in this wide and varied field is such that a research tool of this nature is badly needed. Jesse Walter Fewkes and Mary Hemenway recorded Native American music as early as 1890; Bela Bartok recorded rural music in the Balkans; Erich von Hornbostel, the grand old man of ethnomusicology in Europe, recorded in Southeast Asia. More than just a discography, this work demonstrates that cultures around the world and over time have more similarities than differences. A necessity for scholars, students, archivists, and individual record collectors and dealers. The goals of this volume are many and varied: to promote thought and discussion toward a concise definition of recorded ethnic music; to assist specialists working on individual discographical projects; to introduce users to the interconnectedness of cultures through regional music; to gather heretofore disparate pieces of information under one cover in a way that for the first time allows specialists to accurately identify all manner of recordings in many languages. The four sections of the volume work together for easy usage through cross referencing. The philosophy behind the volume was expressed by Rodney Gallop when he remarked that music, for him, was often the key to the understanding of other cultures.

📖 **A Commentary on Apollonius Rhodius Argonautica III, 1-471** Malcolm Campbell,2018-07-17 This is a commentary on the third book of Apollonius’ Argonautica, one of the most influential and admired products of the Hellenistic era. The author sets out to deal comprehensively with all important aspects of the work; in particular, proper attention is paid for the first time to the poet’s constant manipulation of the two Homeric epics; many thorny problems of text and interpretation are examined afresh; and a wealth of hitherto unadduced illustrative material drawn from Greek and Roman poetry of various genres and periods is used to shed light on a number of issues. The volume closes with a series of detailed digestive indexes dealing with diction, models and imitations, language and style, metre, transmission, mythology, religion, geography, ethnography and aetiology.

In this large compilation of essays, the city is described during various periods of its history, with a special emphasis on the last 150 years.
