SMS Communication Louise-Amélie Cougnon,Cédrick Fairon,2014-07-15 The media often point an accusatory finger at new technologies; they suggest that there is always a loss of information or quality, or even that computer-mediated communication is destroying language. Most linguists, on the contrary, are firmly convinced that it is better to consider language as an evolving and changing entity. From this point of view, language is a social tool that has to be studied in-depth through the prism of objectivity, as a process in motion which is influenced by new social and technological stakes, rather than as a fading organism. In this volume we study and describe the societal phenomenon of SMS writing in its full complexity. The aim of this volume is threefold: to present recent linguistic research in the field of SMS communication; to inform the reader about existing large SMS corpora and processing tools and, finally, to display the many linguistic aspects that can be studied via a corpus of text messages. These articles were previously published in *Lingvisticae Investigationes* Vol. 35:2 (2012).

Disclosure in Health and Illness Mark Davis,Lenore Manderson,2014-04-24 Disclosure is a frequently used but rarely interrogated concept in health and social welfare. Abuse, disability, sexuality and health status can be ‘disclosed’ to peers and professionals, and on some occasions, disclosure is a requirement and not a choice. This innovative collection examines the new social and political implications of disclosure practices in health and illness. We make our identities and our connections with others by sharing life stories, experiences and innermost desires and are often asked to disclose facts about our lives, bodies and minds, at times with unintended consequences. Yet how and what, why and when people ‘disclose’ – and perceive, question and expose – and in what ways, has rarely received critical analytic attention. The contributors take up these problems by foregrounding the many shades of disclosure: from the secret, through the telling of diagnosis, to the more prosaic sharing of narratives from everyday life. The processes and implications of disclosing are addressed in areas such as: illness trajectories and end-of-life decisions; ethical research practices; medical procedures; and interpersonal relationships. Exploring the idea of disclosure as a moral imperative and a social act, this book offers a diverse range of empirical case studies, social theories and methodological insights to show how dominant and normative understandings of social relationships and their obligations shape our understanding of acts of disclosure, enquiry and exposure. It will be of interest to students and academics with an interest in narrative studies, medical anthropology, bioethics, health psychology, health studies and the sociology of health and illness.

Big Data Analytics ,2015-08-04 While the term Big Data is open to varying interpretation, it is quite clear that the Volume, Velocity, and Variety (3Vs) of data have impacted every aspect of computational science and its applications. The volume of data is increasing at a phenomenal rate and a majority of it is unstructured. With big data, the volume is so large that processing it using traditional database and software techniques is difficult, if not impossible. The drivers are the ubiquitous sensors, devices, social networks and the all-pervasive web. Scientists are increasingly looking to derive insights from the massive quantity of data to create new knowledge. In common usage, Big Data has come to refer simply to the use of predictive analytics or other certain advanced methods to extract value from data, without any required magnitude thereon. Challenges include analysis, capture, curation, search, sharing, storage, transfer, visualization, and information privacy. While there are challenges, there are huge opportunities emerging in the fields of Machine Learning, Data Mining, Statistics, Human-Computer Interfaces and Distributed Systems to address ways to analyze and reason with this data. The edited volume focuses on the challenges and opportunities posed by Big Data in a variety of domains and how statistical techniques and innovative algorithms can help glean insights and accelerate discovery. Big data has the potential to help companies improve operations and make faster, more intelligent decisions. Review of big data research challenges from diverse areas of scientific endeavor Rich perspective on a range of data science issues from leading researchers Insight into the mathematical and statistical theory underlying the computational methods used to address big data analytics problems in a variety of domains

Kasinomics GG Alcock,2015-10-01 Kasinomi is a book as eclectic, mysterious and colourful as the places and people it explores. eKasi, the lokasie, the South African township, once an apartheid ghetto, is today an amazingly transformed place. This township today is an eclectic mix of mansions, shacks, spaza shops, rocking taverns, hawkers, taxis and hot wheels. In this kasi there are vibrant businesses, energetic people, a tightly networked social community and abundant hope. That is not to say there isn't extreme poverty, suffering and dissatisfaction, particularly on the peripheries in the huge shack settlements, but to paint the place as a slum is a massive mistake. Kasinomi attempts to cast a light on the invisible matrix at the heart of South Africa's informal economies and the people who live in them. Living and doing business in African marketplaces requires an ethos uniquely suited to the informal, to the invisible, to the intangible. Kasinomi will take you down those rural pathways, weave between claustrophobic mazes of shacks, browse a muti market, visit a spirit returning ceremony and save money with gogo in a stokvel among many more people and places. After almost twenty years of focusing on marketing to the informal sector, GG Alcock, CEO of specialist marketing company Minanawe, showcases a number of groundbreaking and very successful case studies in this invisible informal world. His vivid anecdotes and life experiences and how they link to understanding and inspiration for business ideas will make you gasp, laugh and shake your head in wonder.

Facilitating Visual Socialities Casey Burkholder,Joshua Schwab-Cartas,Funké Aladejebi,2023-05-23 This edited collection seeks to enrich the dialogue about the expansive possibilities of visual sociological research facilitation. Although facilitating ethical research has long been identified within medical research literatures, there is a dearth of distinct perspectives and voices in academic theorizing when it comes to facilitating ethical research. For example, how can researchers learn and incorporate community created approaches to facilitation into their visual research approaches? Although ethics, positionality, and reflexivity remain important components of visual research, the authors argue that the incremental decisions made in real time by research facilitators within the process of visual research is currently under-theorized. This edited collection seeks to discuss how thinking about facilitation in a more critical and nuanced manner, as well as thinking through the kinds of relations, problems and local changes that happen within a project, can help visual sociological researchers move towards more equitable research practices.

Brands Adam Arvidsson,2006-04-19 Drawing on rich empirical material, this revealing book builds up a critical theory, arguing that brands have become an important tool for transforming everyday life into economic value. When branding lifestyles or value complexes onto their products, companies assume that consumers desire products for their ability to give meaning to their lives. Yet, brands also have a key function within managerial strategy. Examining the history of audience and market research, marketing thought and advertising strategy; the first part of this book traces the historical development of branding, whilst the second part evaluates new media, contemporary management and overall media economics to present the first systematic theory of brands: the brand as a key institution in information capitalism. It includes chapters on: consumption marketing brand management online branding the brand as informational capital. Richly illustrated with case studies from market research, advertising, shop displays, mobile phones, the internet and virtual companies, this outstanding book is essential reading for students and researchers of the sociology of media, cultural studies, advertising and consumer studies and marketing.

Web and Communication Technologies and Internet-Related Social Issues - HSI 2005 Shinji Shimojo,Shingo Ichii,Tok Wang Ling,Kwan-Ho Song,2005-08-25 The Internet has now become an integral part of everyday life for hundreds of millions of people around the world. The uses of the Internet have augmented commerce, communication, education, governance, entertainment, health care, etc. E-mail has become an indispensable part of life; the Web has become an indispensable source of information on just about everything; people now use governmentWebsitesto receive instructions and information, and?le paperwork with the government; many major online businesses have been created, such as Amazon, eBay, Google, Travelocity, eTrade, etc. However, the uses of the Internet have also had serious negative e?ects, - cluding spam, the spreading of viruses and worms, spyware, phishing, hacking, online fraud, invasions of privacy, etc. Viruses and worms often bring down tens of millions of computers around the world; many people get duped into furni- ing their personal identi?cations, and bank and insurance account information, etc. ; hackers break into government and corporation computers to steal cri- cal data; unsubstantiated rumors about individuals or organizations spread like wild?re on the Internet, etc. Further, the uses of the Internet are creating new paradigms in areas such as copyright, governance, etc. The widespread use of peer-to-peer ?le sharing systems, started by Napster,is forcing a reassessment of the value of holding copyright on digital media. Internet postings by vocal citizens to the Web sites of the news media, governmento?ces, and elected g- ernment o?cials are impacting government policies and swaying the opinions of other citizens. The aim of the International Conference on Human.

M-libraries 2 Mohamed Ally,Gill Needham,2010 Interest in m-library services has grown exponentially in the last five years, as libraries are recognizing the potential of ubiquitous and increasingly sophisticated mobile devices. Building on the highly regarded M-Libraries: libraries on the move to provide virtual access, this new book brings together research and case studies from all corners of the globe on the development and delivery of library services and content to mobile devices. Based on the proceedings of the Second International M-Libraries Conference held in Vancouver, this new collection of contributions from authorities in the field serves to demonstrate the ingenuity and creativity of developers and service providers in this area, ranging from the innovative application of basic mobile phone technology to provide information services in remote parts of the globe lacking internet access, to the development of new tools and technologies which harness the full functionality of popular mobile phones. Key topics include: enhancing library access through the use of mobile technology the university library digital reading room mobile access for workplace and language training the role of an agent supplying content on mobile devices cyberlearning and reference services via mobile devices podcasting as an outreach tool service models for information therapy services delivered to mobiles bibliographic ontology and e-books health literacy and healthy action in the connected age a collaborative approach to support flexible, blended and technology-enhanced learning The collection demonstrates the emergence of an evidence base for m-libraries, with a number of contributions presenting the results of user surveys and studies of user behaviour. Readership: This highly topical book should be read by information professionals in all sectors, and by policy makers, researchers, developers, publishers and suppliers. It will also be of great interest to library and information studies students and newcomers to the profession.
