Developing Inclusive Mobile Apps Rob Whitaker,2020-04-25 By failing to consider those with needs different to ourselves, we are telling these people they are not welcome in our app, and therefore that technology as a whole, is not for them. This is not hyperbole—23% of people in the US with a registered disability aren't online at all, that's three times more likely than the general population. When asked why they're not online, disabled respondents say their disability prevents them or that using the internet is too hard. To help your apps combat the issue of digital exclusion, this book covers considerations and tools mobile developers, or anyone creating mobile experiences, can use to make mobile work better for those with disabilities—mental or physical—and how to create a better experience for everyone. Software is not made up of cold, unthinking algorithms. Software is a craft in the truest sense of the word, and one of the greatest tools you can have as a craftsperson is empathy for the people who will be using your app. Each one of whom is an individual with different abilities, experiences, knowledge, and circumstances. What You'll Learn Create mobile experiences that work for as

many people as possible Incorporate a worldview of accessibility and customer service into your design Work with accessibility tools and techniques commonly available for developers Who This Book Is For Mobile developers working solo or as part of a team. UX designers, quality engineers, product owners, and anybody working in mobile.

Take Control of Your Paperless Office, 4th Edition Joe Kissell,2024-02-02 Digitize your documents and reduce paper clutter! Version 4.0.1, updated February 2, 2024 The paperless office doesn't have to be a myth! Turn paper into usable digital files, reducing clutter and increasing convenience. This book helps you assess your situation, develop a strategy, and learn clever techniques for keeping more paper at bay—with detailed discussion of the hardware, software, and processes needed to get the job done. Join Joe Kissell as he helps you clear the chaos of an office overflowing with paper. With Joe's guidance you can develop a personal clean-up strategy and choose your tools, including a scanner and the software you need to perform OCR (optical character recognition). You'll also learn about devices and services for storing your digitized documents and document management apps that help you categorize, locate, and view your digital document collections. Once you have your gear in hand, Joe shows you how to convert your paper documents to digitized files and gives you ideas for how to organize your office workflow, explaining how to develop day-to-day techniques that reduce the amount of time you spend pressing buttons, launching software, and managing documents. You'll also master paper-reducing skills such as: • Scanning or photographing documents you find while out and about—business cards, receipts, menus, flyers, and more—so you keep only digitized versions. Joe discusses a variety of mobile scanning options for iOS/iPadOS and Android. • Creating a digitized image of your signature so you can sign and share documents digitally, rather than printing them for the sole purpose of signing them with a pen. • Using paperless options for bills,

invoices, bank statements, and the like. • Cutting down on unwanted catalogs and junk mail. • Switching to (mostly) paperless postal mail. • Using your computer to send and receive faxes without a fax machine, fax modem, or separate phone line. (Amazingly, some people still need to do this even in the 21st century!) The book contains answers to numerous questions, including: • What is a searchable PDF, and why is it key to a paperless office? • What differentiates document scanners from other types of scanners? • What's a book scanner? • What if I need a mobile, portable scanner? • What does TWAIN stand for, and should my scanner support it? • Why do I need OCR software, and what features should I look for? • How do I choose a good scanner and OCR software? • How should I name and file my digitized documents? • What are my options if I need to edit a scanned PDF? • How can I automate my workflow for scanning documents? • What paper documents should I keep in physical form? • How do I use common tools to add a signature to a PDF? • How can I access my digital documents remotely? • How should I back up my important digital documents?
