Dinosaurs Mary Higby Schweitzer, Elena Rita Schroeter, Charles Doug Czajka, 2020-11-17 This textbook introduces research on dinosaurs by describing the science behind how we know what we know about dinosaurs. A wide range of topics is covered, from fossils and taphonomy to dinosaur physiology, evolution, and extinction. In addition, sedimentology, paleo-tectonics, and non-dinosaurian Mesozoic life are discussed. There is a special opportunity to capitalize on the enthusiasm for dinosaurs that students bring to classrooms to foster a deeper engagement in all sciences. Students are encouraged to synthesize information, employ critical thinking, construct hypotheses, devise methods to test these hypotheses, and come to new defensible conclusions, just as paleontologists do. Daring Dinos Hal Graham, 2018-09-19 NOT your average dinosaur book, but a *magical* learning book! Dinosaurs in this book will come alive in breathtaking 3D animation to charm and teach your child about T-Rex, Velociraptor, Pterodactyl, and more! These dinosaurs may look just normal on the physical book, but they leap out of the page

when you scan them with the free Holo Popups app (see directions below). Knowledge has never been more fun! It may be the stunning visual and the cool technology that first hook the kids, but the best part about Daring Dinos is that it fosters real learning -- which is our biggest intent behind this book series. We added vivid voiceovers, subtitles, and sound effects so that the children are motivated and empowered to learn vocabulary and spelling on their own. Holo Popups are the modern pop-up books: they aim to inspire curiosity, imagination, and creativity, and to instill in your child a love for reading and learning. Don't be surprised if your child starts to school you on dinosaur facts: Did you know that T-Rex could eat 500 pounds in one bite? Any art fans? The artwork in this book series is inspired by Mary Blair, a children's art pioneer who was a concept artist for early Disney movies. The artwork features popping colors and enchanting characters that your kids will adore. The cuties in this book include: Triceratops, Plesiosaur, Stegosaurus, Ankylosaurus, Dilophosaurus, Velociraptor, Tyrannosaurus Rex, Parasaurolophus, Brontosaurus, and Pterodactyl! We made the book to be versatile: you can sit back and enjoy the AR experience with your child, or turn off the voiceover and read to them. Feel the satisfaction of holding a beautiful physical book in your hands and the magic of watching it come to life right in front of you and your child. Directions for Enjoying Our AR Children's Book: 1. Download the Holo Popups app on your device (available on the App Store or Google Play). 2. Open the app and turn on your sound. 3. Open the book and point the spinning cursor over the illustration. 4. A dinosaur lands on your page and puts on a magic show!

A Little Bit of Dinosaur Elleen Hutcheson, Darcy Pattison, 2021-12-23 Did you know that you have a little bit of dinosaur in you? And it's your mother's fault. She fed you that cheese sandwich, which had a calcium atom that used to be in the bones of a T-rex. This humorous story follows a calcium atom as it journeys from dry bones to your jawbone! Inspired by U.S. environmentalist Aldo Leopoldo, this story follows a little bit of dinosaur, a calcium atom, as it travels over time from a dinosaur to a child. In his 1949 classic, *A Sand County Almanac*, Leopoldo beautifully discussed how man and nature are interconnected. This amazing circle of life is illustrated with humour and a touch of empathy. Sisters Elleen Hutcheson and Darcy Pattison team up to bring Leopoldo's circle of life to kids. Hutcheson is a high school biology teacher; five of Pattison's picture books have been named NSTA Outstanding Science Trade Books. Each is shaking her finger at their mother wondering why she fed them that cheese sandwich.
