Manipulation of Sound Properties by Acoustic

Metasurface and Metastructure Jiajun Zhao, 2016-08-06 This thesis focuses on the manipulation of sound properties by artificial materials. It elaborates on the fundamental design of acoustic metasurfaces and metastructures as the extension of metamaterials, and their functionality in the manipulation of sound properties. A broad and comprehensive guideline of designing acoustic metasurfaces and metastructures is also provided. Based on the proposed subwavelength metasurfaces and the metastructures with a simplified layout, multiple potential applications are demonstrated. This thesis will appeal to acoustic engineers and researchers who are interested in designing acoustic artificial structures.

Acoustic Profiles Randolph Jordan, 2023 The introduction lays out the basic theoretical framework for acoustic profiling, a method for listening to films by way of acoustic ecology (and vice-versa). This method is based on a double critical movement. On the one hand, a sound ecology of the cinema entails the application of acoustic ecology's prescribed listening practices to film sound studies. On the other hand, a new way of thinking about acoustic ecology is born of film studies, a way to consider acoustic ecology's practice through film studies' long history of dealing with problems of fidelity and realism through recording technologies. This intersection of fields offers a necessary critical discourse for handling the challenges inherent in navigating acoustic ecology's media practices. The four dimensions of acoustic ecology are described as documentation, analysis, prescription, and composition, and it is explained how these dimensions can intersect with a variety of standard concepts in film sound theory. In turn, this introduction explains how the set of films to be analyzed across the book will demonstrate, enact, and challenge these dimensions through their mediality, defined here as a mode of reflexivity that emphasizes the role of media

technologies in engaging with, rather than acting as barrier to, real-world space. The films expose the myth of vanishing mediation and invite audiences to reflect upon their approaches to the audiovisual construction of space so that we may carry this reflection out to the world beyond the frame of the screen and its surrounding walls. The intersection of acoustic ecology and film sound studies can make films work as both extensions of acoustic ecology and means for critically re-thinking the field--

Acoustic Guitars Ben Elder, Teja Gerken, John Morrish, Jerry Uwins, Mikael Jansson, Dave Hunter, 2018-02-13 Acoustic Guitars:

The Illustrated Encyclopedia is the most comprehensive guide of its type ever produced, covering decades of great instruments and the people who played them. You will find here the highest quality photos of acoustic guitars produced by every significant maker, from Alvarez to Zemaitis, plus detailed information, and a host of action pictures of important players from pop, rock, jazz, country classical, blues, and folk. An acoustic guitar need not be a simple brown box with a neck attached. Acoustic Guitars: The Illustrated Encyclopedia celebrates the unusual, the different and the purely bizarre in addition to the assured roots-based craft of the finest unadorned instruments, underlining the sheer diversity and variety of the acoustic stringed instruments that have been built and sold and played through three centuries. Here are resonator guitars made since the 1920s by Dobro, National, and others, often with highly decorated metal bodies; revered flat-tops from Martin, Taylor, Gibson, and more; peculiarly shaped and oddly featured creations from many of the custom builders; early 20th-century harp guitars with extra strings and extended bodies; creative archtops from D'Angelico, Epiphone, Benedetto, and more; and plastic-equipped constructions from Ovation. The comprehensive and informative text is in a clear A-to-Z format organized by brand name, written and researched by a unique team of the world's leading authorities on the subject. Acoustic Guitars: The Illustrated Encyclopedia shows in words and pictures just why and how the acoustic guitar continues to be the most popular musical instrument in the world.

Project Studios Philip Richard Newell, 2000 Offers a wealth of advice regarding the problems encountered in studio work and how to deal with them. Some feel for technical issue is needed to glean the most from what the book has to offer, but even the non-technical readers will extract useful and relevant information if they work in project studios. What have come to be known as 'project studios' exist in the area somewhere between home studios and fully commercial studios - in reality there are no

longer any clear dividing lines between bedroom or garage studios and the world's finest facilities. However, what is missing from so many project studios is experience in front-line recording, which can lead to bad recording practices, poor decision making, misapplication of equipment and the inability to get the best performances out of the musicians. This book attempts to pass on some of that experience in as readable a way as possible. *Projects Studios* covers in particular the problems of loudspeakers and acoustics, as these are the aspects by which all studio work is judged. They are also the subjects that cause the greatest misunderstanding and which, in turn, hold back progress. In this book the inexperienced studio operator will find the answers to getting first class, professional results every time. Famous recording studios featured in this book include: - Mike Oldfield's home studio - Eel Pie studios, owned by Pete Townsend of The Who and frequently used by the Coctear Twins With Studio Monitoring Design and Recording Spaces, this book completes a trilogy of titles comprising a complete library for the aspiring professional sound recordist. Together they offer: · A complete library for the aspiring professional sound recordist. · Comprehensive coverage of acoustics, monitoring and equipment interfacing. · Information of relevance to all studios, from the most meagre to the world's finest.
