Advanced Monitoring and Procedures for Small Animal Emergency and Critical Care Jamie M. Burkitt Creedon, Harold Davis, 2023-05-31 Advanced Monitoring and Procedures for Small Animal Emergency and Critical Care Detailed, standardized, step-by-step protocols for easy access to essential information in small animal emergency rooms and intensive care units Advanced Monitoring and Procedures for Small Animal Emergency and Critical Care, Second Edition offers a complete and clinically oriented reference for step-by-step detail on a wide range of procedures in the small animal emergency room and intensive care unit. Each protocol provides detailed instructions grounded in the evidence. The book is carefully designed for ease of use, with concise but comprehensive explanations, useful equipment lists, protocols called out in boxes, and extensive reference lists. In the revised and expanded Second Edition, information has been updated and expanded throughout, and information and chapters have been added in many important areas, including veterinary point-of-care ultrasound (VPOCUS), veterinary CPR, blood banking and transfusion medicine, advanced techniques for mechanical ventilation, and veterinary health care team wellbeing. A companion website offers the protocols in Word for editing and use in practice and the figures from the book in PowerPoint. Specific topics covered in Advanced Monitoring and Procedures for Small Animal Emergency and Critical Care include: The cardiovascular system, covering catheterization of the venous compartment, arterial puncture and catheterization, cardiac VPOCUS, principles of electrocardiography, and electrocardiogram interpretation The respiratory system, covering oxygen therapy, pulse oximetry and CO-oximetry, blood gas analysis, pleural space and lung VPOCUS, tracheal intubation, and temporary tracheostomy The urinary and abdominal systems, covering urethral catheterization, abdominal VPOCUS, peritoneal dialysis, technical management of hemodialysis patients, and peritoneal evaluation Transfusion medicine, covering blood banking, blood typing, cross-matching, and administration of blood and other biological products Advanced Monitoring and Procedures for Small Animal Emergency and Critical Care presents invaluable and accessible information for emergency situations, making it a highly useful reference for veterinary practitioners, veterinary technicians and nurses, veterinary students, small animal emergency and critical care residents, small animal emergency and critical care specialists, and emergency and critical care veterinary technicians and nurse specialists.

Management of Animal Care and Use Programs in Research, Education, and Testing Robert H. Weichbrod, Gail A. (Heidbrink) Thompson, John N. Norton, 2017-09-07 AAP Prose Award Finalist 2018/19 Management of Animal Care and Use Programs in Research, Education, and Testing, Second Edition is the extensively expanded revision of the popular Management of Laboratory Animal Care and Use Programs book published earlier this century. Following in the footsteps of the first edition, this revision serves as a first line management resource, providing for strong advocacy for advancing quality animal welfare and science worldwide, and continues as a valuable seminal reference for those engaged in all types of programs involving animal care and use. The new edition has more than doubled the number of chapters in the original volume to present a more comprehensive overview of the current breadth and depth of the field with applicability to an international audience. Readers are provided with the latest information and resource and reference material from authors who are noted experts in their field. The book: - Emphasizes the importance of developing a collaborative culture of care within an animal care and use program and provides information about how behavioral management through animal training can play an integral role in a veterinary health program - Provides a new section on Environment and Housing, containing chapters that focus on management considerations of housing and enrichment delineated by species - Expands coverage of regulatory oversight and compliance, assessment, and assurance issues and processes, including a greater discussion of globalization and harmonizing cultural and regulatory issues - Includes more in-depth treatment throughout the book of critical topics in program management, physical plant, animal health, and husbandry. Biomedical research using animals requires administrators and managers who are knowledgeable and highly skilled. They must adapt to the complexity of rapidly-changing technologies, balance research goals with a thorough understanding of regulatory requirements and guidelines, and know how to work with a multi-generational, multi-cultural workforce. This book is the ideal resource for these professionals. It also serves as an indispensable resource text for certification exams and credentialing boards for a multitude of professional societies Co-publishers on the second edition are: ACLAM (American College of Laboratory Animal Medicine); ECLAM (European College of Laboratory Animal Medicine); IACLAM (International Colleges of Laboratory Animal Medicine); JCLAM (Japanese College of Laboratory Animal Medicine); KCLAM (Korean College of Laboratory Animal Medicine); CALAS (Canadian Association of Laboratory Animal Medicine); LAMA (Laboratory Animal Management Association); and IAT (Institute of Animal Technology).

All Horse Systems Go Nancy S Loving, 2014-01-01 A ridden horse is an athletic horse, and just as a human athlete needs to gauge his diet, condition his cardiovascular and respiratory systems, and take meticulous care of his muscles, bones, and ligaments, so too must the rider maintain these systems in her horse. Now, for the first time in one, full-color comprehensive book, Dr. Nancy S. Loving, noted equine veterinarian and dressage, event, and distance riding competitor, addresses the singularly challenging needs of keeping the working horse in working order. With chapters devoted to cardiovascular, respiratory, neurological, digestive, and reproductive health, as well to the hooves, bones, joints, tendons and ligaments, muscles, and skin, Dr. Loving provides a thorough understanding of the intricacies of the equine body. However, this is not just another veterinary manual. While diseases are indeed clearly explained, and relevant diagnostic tools and methods of prevention and treatment are offered for various ailments, Dr. Loving sets her book apart by diligently applying her scientific knowledge to the practical needs of every pleasure, sport, and performance horse owner—whether you simply hack with friends or compete at the highest level. Over 500 color photographs and 4,000 index entries suitably enrich this consummate text. Whether used as a study guide to better understand your equine athlete or as a quick-find reference when you notice a mysterious new swelling on his near foreleg, All Horse Systems Go is the integral ingredient to ensuring your horse can perform to the very best of his ability, whatever his task may be.

Critical Role of Animal Science Research in Food Security and Sustainability National Research Council, Division on Earth and Life Sciences, Board on Agriculture and Natural Resources, Policy and Global Affairs, Science and Technology for Sustainability Program, Committee on Considerations for the Future of Animal Science Research, 2015-03-31 By 2050 the world's population is projected to grow by one-third, reaching between 9 and 10 billion. With globalization and expected growth in global affluence, a substantial increase in per capita meat, dairy, and fish consumption is also anticipated. The demand for calories from animal products will nearly double, highlighting the critical importance of the world's animal agriculture system. Meeting the nutritional needs of this population and its demand for animal products will require a significant investment of resources as well as policy changes that are supportive of agricultural production. Ensuring sustainable agricultural growth will be essential to addressing this global challenge to food security. Critical Role of Animal Science Research in Food Security and Sustainability identifies areas of research and development, technology, and resource needs for research in the field of animal agriculture, both nationally and internationally. This report assesses the global demand for products of animal origin in 2050 within the framework of ensuring global food security; evaluates how climate change and natural resource constraints may impact the ability to meet future global demand for animal products in sustainable production systems; and identifies factors that may impact the ability of the United States to meet demand for animal products, including the need for trained human capital, product safety and quality, and effective communication and adoption of new knowledge, information, and technologies. The agricultural sector worldwide faces numerous daunting challenges that will require innovations, new technologies, and new ways of approaching agriculture if the food, feed, and fiber needs of the global population are to be met. The recommendations of Critical Role of Animal Science Research in Food Security and Sustainability will inform a new roadmap for animal science research to meet the challenges of sustainable animal production in the 21st

century.

Nanotechnology in Modern Animal Biotechnology Pawan Kumar Maurya, Sanjay Singh, 2019-07-20 Nanotechnology in Modern Animal Biotechnology: Concepts and Applications discusses the advancement of nanotechnologies in almost every field, ranging from materials science, to food, forensic, agriculture and life sciences, including biotechnology and medicine. Nanotechnology is already being harnessed to address many of the key problems in animal biotechnology, with future applications covering animal biotechnology (e.g. animal nutrition, health, disease diagnosis, and drug delivery). This book provides the tools, ideas and techniques of nanoscale principles to investigate, understand and transform biological systems. Nanotechnology provides the ability to manipulate materials at atomic and molecular levels and also arrange atom-by-atom on a scale of ~1-100 nm to create, new materials and devices with fundamentally new functions and properties arising due to their small scale. Details the basics of nanotechnology, along with comprehensive information on the state-of-the-art and future perspectives of nanotechnology in biosensors Provides recent perspectives and the challenges of nanomedicine Provides new insights into the role nanomaterials can play in curing various diseases Includes the most recent diagnostic methods, such as nanosensors

Rodents National Research Council, Commission on Life Sciences, Institute for Laboratory Animal Research, Committee on Rodents, 1996-08-08 In the 15 years since the last Institute of Laboratory Animal Resources report on the general management of rodents was published, important advances in biomedical research and increased public awareness have created a new environment for animal research. Modern technology-such as insertion of functional genes from other species into mice or rats, elimination of a single selected gene or function in mice, and the re-creation of elements of the human immune system in mice-has greatly expanded the usefulness of rodents in drug development and as models of human diseases. The technologic requirements of such advanced systems have led to improved understanding and implementation of environmental requirements for the care and use of rodents in research. The intent of this report is to provide current information to laboratory animal scientists (including both animal-care technicians and veterinarians), investigators, research technicians, and administrators on general elements of rodent care and use that should be considered both for optimal design and conduct of research and to meet current standards of care and use.

Computer Information Systems and Industrial Management Khalid Saeed, Rituparna Chaki, Valentina Janev, 2019-09-12 This book constitutes the proceedings of the 18th International Conference on Computer Information Systems and Industrial Management Applications, CISIM 2019, held in Belgrade, Serbia, in September 2019. The 43 full papers presented together with 3 abstracts of keynotes were carefully reviewed and selected from 70 submissions. The main topics covered by the chapters in this book are biometrics, security systems, multimedia, classification and clustering, industrial management. Besides these, the reader will find interesting papers on computer information systems as applied to wireless networks, computer graphics, and intelligent systems. The papers are organized in the following topical sections: biometrics and pattern recognition applications; computer information systems; industrial management and other applications; machine learning and high performance computing; modelling and optimization; various aspects of computer security.

Nanotechnology in Modern Animal Biotechnology Sanjay Singh, Pawan Kumar Maurya, 2019-03-30 The book introduces the basic concepts of nanotechnology and the various technologies to characterize nanomaterials. It also covers the nanostructural features of mammalian cells/tissues and related nanomechanical properties. In addition, the book comprehensively describes the current state-of-the-art and future perspectives of nanotechnology in biosensors. It also discusses the potential of nanotechnology for delivering the diverse cancer therapeutics and illustrates its limitation due to the potential toxicity associated with oxidative stress. It also highlights the ethical issues and translational aspects related to nanotechnology. Finally, it summarizes the applications of nanotechnology in animal biotechnology, the recent perspectives and future challenges of nanomedicines. The content of the book are beneficial for the undergraduate, postgraduate and doctoral students as well the professionals working in the area of nanotechnology and nanomedicines.

Comprehensive analysis of the disaster risk reduction system for the agricultural sector in Armenia Food and Agriculture Organization of the United Nations, 2022-04-29 This report aims to highlight the current strengths of the institutional DRR system for agriculture in Armenia as well as indicate existing gaps and capacity needs to further enhance it. A comprehensive assessment is conducted, which includes a general overview of the country's agricultural sector and outlines the most frequent natural hazards that are impacting the sector. It is followed by an analysis of the existing legal, policy and institutional structure and discusses various components of the system, including e.g. the functioning of early warning systems, assessments of disaster risks, post-disaster needs assessments, including damages and losses assessments and the availability of agricultural insurance for farmers. It concludes by providing recommendations for capacity building interventions to strengthen the current system to reduce the adverse impacts of natural hazards, in particular, floods, landslides and droughts, and climate change on agriculture in Armenia.

The Pet Owner's Guide to Emergency Veterinary Care George Heath BS LATG, 2023-06-20 The Pet Owners Guide to

Emergency Veterinary Care is a Candid and Honest Discussion of what the author considers predatory veterinary practices and how to avoid them. Although there are many honest and compassionate Veterinarians with the upmost integrity that will not take advantage of a pet owner, terrified at the thought of loosing a beloved pet, there are others that will do exactly that. Indeed in many franchise veterinary operations business first over compassion and empathy for the working pay check to pay check family, can lead to both the loss of your pet and a financial crisis. My favorite sentence being “..these are the questions you ask so you don’t end up with a dead dog and a repossessed car”.
