Hamilton, 2006-12-06 Presents the findings of the bipartisan Iraq Study Group, which was formed in 2006 to examine the situation in Iraq and offer suggestions for the American military's future involvement in the region.

**Women's Health Care in Advanced Practice Nursing, Second Edition** Ivy M. Alexander, PhD, APRN, ANP-BC, FAANP, FAAN, Versie Johnson-Mallard, PhD, ARNP, WHNP-BC, FAANP, Elizabeth Kostas-Polston, PhD, APRN, WHNP-BC, FAANP, Catherine Ingram Fogel, PhD, RNC, FAAN, Nancy Fugate Woods, PhD, RN, FAAN, 2017-06-28 Replete with vital information, the second edition of this authoritative women's health text provides graduate nursing students and nurse practitioners with the resources to deliver optimal health to women of all ages. Edited by a team of highly distinguished clinicians, scholars, and educators, chapters retain a distinctive sociocultural lens that gives a view of women's health as it relates to women's lives and identities. Eighteen new chapters address clinical primary care topics, genetics, environmental and occupational health promotion, health considerations for female caregivers, transgender care, urologic health concerns, dementia care, and more. An instructor's toolkit includes multiple resources to enhance critical thinking, and case studies engage critical thinking skills to apply the multidimensional content in context. This uniquely comprehensive resource examines women's health through a variety of clinical practice and theoretical frameworks such as feminism, feminist theory, and globalization. The second edition retains the important focus on prevention, managing symptoms, and health problems that are unique to women. Chapters address relevant legal issues, health throughout the life span, nutrition and exercise, sleep difficulties, mental health, LGBTQ health, fertility, substance abuse, violence against women, and dozens of specific health disorders. **NEW TO THE SECOND EDITION:** Updated to include the most current evidence-based, primary care management guidelines in women's health Includes 18 new chapters addressing health promotion and symptom management Provides a robust instructor's toolkit to foster critical thinking Organized to enhance easy retrieval of numerous clinical topics Includes theoretical frameworks for women's health, health promotion and prevention, and women's health management Presents brand-new information on genetics, transgender health, endocrine-related problems, health considerations for caregivers, and dementia care **KEY FEATURES:** Distills cutting-edge information on women's health issues through a sociocultural framework Offers a comprehensive investigation of key topics in women's health Edited by renowned scholar/educators for advanced practice nursing students

**Cancer Care in Areas of Conflict** Omar Shamieh, Fouad M. Fouad, Asem H. Mansour, Richard Sullivan, Tezer Kutluk, 2023-11-23 Cancer is a global burden with more than 18 million diagnosed and an estimate of 10 million deaths in 2020 worldwide. Cancer continues to be a major and growing problem in conflict affected areas too. The incidence of cancer is expected to rise significantly in those countries compared to the rest of the world. Conflict, massive migration and displacement has put a tremendous pressure on all health care systems and health economy which halted improvement in many cancer care in majority of the countries. Countries affected by conflict like Syria, Ukraine, Iraq, Yemen, Latin America and others has led to destruction of the whole countries healthcare infrastructure including health care facilities, diagnostic facilities, and unavailability of drugs and loss of health care professionals due to death, migration or disabilities. This lead to inequitable access to care, lack of prevention, loss of screening programs, delay in diagnosis, loss of follow up and in many cases no anticancer therapy or palliative care to offer. Historically, most of humanitarian aid was focused on basic needs and first aid, leaving NCDs including cancer care with trivial support if any. Recently with the Russian invasion of Ukraine and the negative global economic crisis, refugees all over the globe will have devastating impact on cancer care screening, early detection, treatment and palliative care.

**Drain's PeriAnesthesia Nursing - E-Book** Jan Odom-Forren, 2012-07-02 **NEW** Evidence Based Research boxes are added to all the chapters in Section IV and Section V. **NEW!** Care of the Obese Patient Undergoing Bariatric Surgery chapter discusses the challenges that weight-loss surgery presents to the patient and perianesthesia nurse. Streamlined format includes an overview, chapter summary, and references for each chapter. More than 275 illustrations show key concepts and principles of care. Updated The Changing Health Care System and Its Implications for the PACU chapter includes content on healthcare reform. Revised Patient Safety and Legal Issues in the PACU chapter includes content on patient safety. Expanded Evidence-based Practice and Research and Bioterrorism and Its Impact on the PACU chapters include coverage of new developments and practices.

**Returning Home from Iraq and Afghanistan** Institute of Medicine, Board on the Health of Select Populations, Committee on the Initial Assessment of Readjustment Needs of Military Personnel, Veterans, and Their Families, 2010-03-31 Nearly 1.9 million U.S. troops have been deployed to Afghanistan and Iraq since October 2001. Many service members and veterans face serious challenges in readjusting to normal life after returning home. This initial book presents findings on the most critical challenges, and lays out the blueprint for the second phase of the study to determine how best to meet the needs of returning troops and their families.

*Analyzing Health Equity Using Household Survey Data* Adam Wagstaff, Owen O'Donnell, Eddy van Doorslaer, Magnus Lindelow, 2007-11-02 Have gaps in health outcomes between the poor and better off grown? Are they larger in one country than another? Are health sector subsidies more equally distributed in some countries than others? Are health care payments more progressive in one health care financing system than another? What are catastrophic payments and how can they be measured? How far do health care payments impoverish households? Answering questions such as these requires quantitative analysis. This in turn depends on a clear understanding of how to measure key variables in the analysis, such as health outcomes, health expenditures, need, and living standards. It also requires set quantitative methods for measuring inequality and inequity, progressivity, catastrophic expenditures, poverty impact, and so on. This book provides an overview of the key issues that arise in the measurement of health variables and living standards, outlines and explains essential tools and methods for distributional analysis, and, using worked examples, shows how these tools and methods can be applied in the health sector. The book seeks to provide the reader with both a solid grasp of the principles underpinning distributional analysis, while at the same time offering hands-on guidance on how to move from principles to practice.

*Military Personnel* Brenda S. Farrell, 2011-06-01 For ongoing operations in Afghanistan and Iraq, military medical personnel are among the first to arrive and the last to leave. Sustained U.S. involvement in these operations has placed stresses on the Department of Defense's (DoD) medical personnel. As the U.S. military role in Iraq and Afghanistan changes, the Army must adapt the number and mix of medical personnel it deploys. This report evaluated the extent to which: (1) DoD has assessed its need for medical personnel in theater to support ongoing operations; (2) the Army has adapted the composition and use of medical units to provide advanced medical care; and (3) the Army fills medical personnel gaps that arise in theater. Illus. This is a print on demand report.

*A National Trauma Care System* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on the Health of Select Populations, Board on Health Sciences Policy, Committee on Military Trauma Care's Learning Health System and Its Translation to the Civilian Sector, 2016-09-12 Advances in trauma care have accelerated over the past decade, spurred by the significant burden of injury from the wars in Afghanistan and Iraq. Between 2005 and 2013, the case fatality rate for United States service members injured in Afghanistan decreased by nearly 50 percent, despite an increase in the severity of injury among U.S. troops during the same period of time. But as the war in Afghanistan ends, knowledge and advances in trauma care developed by the Department of Defense (DoD) over the past decade from experiences in Afghanistan and Iraq may be lost. This would have implications for the quality of trauma care both within the DoD and in the civilian setting, where adoption of military advances in trauma care has become increasingly common and necessary to improve the response to multiple civilian casualty events. Intentional steps to codify and harvest the lessons learned within the military's trauma system are needed to ensure a ready military medical force for future combat and to prevent death from survivable injuries in both military and civilian systems. This will require partnership across military and civilian sectors and a sustained commitment from trauma system leaders at all levels to assure that the necessary knowledge and tools are not lost. A National Trauma Care System defines the components of a learning health system necessary to enable continued improvement in trauma care in both the civilian and the military sectors. This report provides recommendations to ensure that lessons learned over the past decade from the military's experiences in Afghanistan and Iraq are sustained and built upon for future combat operations and translated into the U.S. civilian system.

*Psychological Responses to the New Terrorism: A NATO-Russia Dialogue* C. Woburn,2005-11-25 Terrorism is to create a state of terror and fear. Therefore it is important to study the psychological factors and to understand and mitigate our response to terrorism. It is the creation of states of mind, of reducing people's resilience and will to resist, and causing such psychological and social pressure that eventually the political aims of a terrorist group will be fulfilled. This book is not about the prevention of terrorism, but concerned with the consequences of acts of terror and their impact on populations. It describes what citizens, professionals and governments can do to mitigate the consequences. The focus is less on the 'timeless' or 'universal' trauma reactions captured by labels such as post traumatic stress disorder, but more on culture and place specific reactions. A comparison is made between the responses visible in Russia (large scale adversity) and the western reaction (a cultural shift towards an age of anxiety and risk aversion). Also 'new' terrorism (chemical, biological and nuclear terrorism) is discussed, but in practice most terrorist attacks remain steadfastly conventional. A last topic is communication; such as communication between government and its citizens; between terrorists themselves, between terrorists and citizens and between citizens themselves. People talking to each other in the immediate aftermath of terrorist incidents gives much needed support and reassurance. More attention needs to be given to assisting these normalising processes and more needs to be done to safeguard such communications in the immediate aftermath of a terrorist attack.

*Handbook of Healthcare in the Arab World* Ismail Laher,2021-08-11 This handbook examines health and medical care in the Arab world from a systems biology approach. It features comprehensive coverage that includes details of key social, environmental, and cultural determinants. In addition, the contributors also investigate the developed infrastructure that manages and delivers health care and medical solutions throughout the region. More than 25 sections consider all aspects of health, from cancer to hormone replacement therapy, from the use of medications to vitamin deficiency in emergency medical care. Chapters highlight essential areas in the wellbeing and care of this population. These topics include women's health care, displaced and refugee women's health needs, childhood health, social and environmental causes of disease, health systems and health management, and a wide range of diseases of various body systems. This resource also explores issues related to access and barriers to health delivery throughout the region. Health in the Arab world is complex and rapidly changing. The health burden in the region is distributed unevenly based on gender, location, as well as other factors. In addition, crises such as armed conflicts and an expanding migrant population place additional stress on systems and providers at all levels. This timely resource will help readers better understand all these major issues and more. It will serve as an ideal guide for researchers in various biological disciplines, public health, and regulatory agencies.

**Foundations of the Islamic State** Patrick B. Johnston, Jacob N. Shapiro, Howard J. Shatz, Benjamin Bahney, Danielle F. Jung, Patrick K. Ryan, Jonathan Wallace, 2016-05-18 Drawing from 140 recently declassified documents, this report comprehensively examines the organization, territorial designs, management, personnel policies, and finances of the Islamic State of Iraq (ISI) and al-Qa'ida in Iraq. Analysis of the Islamic State predecessor groups is more than a historical recounting. It provides significant understanding of how ISI evolved into the present-day Islamic State and how to combat the group.

*Disease Control Priorities, Third Edition (Volume 9)* Dean T. Jamison, Hellen Gelband, Susan Horton, Prabhat Jha, Charles N. Mock, Rachel Nugent, 2017-12-06 As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a highest-priority essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

*Why Intelligence Fails* Robert Jervis, 2010-12-15 The U.S. government spends enormous resources each year on the gathering and analysis of intelligence, yet the history of American foreign policy is littered with missteps and misunderstandings that have resulted from intelligence failures. In *Why Intelligence Fails*, Robert Jervis examines the politics and psychology of two of the more spectacular intelligence failures in recent memory: the mistaken belief that the regime of the Shah in Iran was secure and stable in 1978, and the claim that Iraq had active WMD programs in 2002. The Iran case is based on a recently declassified report Jervis was commissioned to undertake by CIA thirty years ago and includes memoranda written by CIA officials in response to Jervis's findings. The Iraq case, also grounded in a review of the intelligence community's performance, is based on close readings of both classified and declassified documents, though Jervis's conclusions are entirely supported by evidence that has been declassified. In both cases, Jervis finds not only that intelligence was badly flawed but also that later explanations—analysts were bowing to political pressure and telling the White House what it wanted to hear or were willfully blind—were also incorrect. Proponents of these explanations claimed that initial errors were compounded by groupthink, lack of coordination within the government, and failure to share information. Policy prescriptions, including the recent establishment of a Director of National Intelligence, were supposed to remedy the situation. In Jervis's estimation, neither the explanations nor the prescriptions are adequate. The inferences that intelligence drew were actually quite plausible given the information available. Errors arose, he concludes, from insufficient attention to the ways in which information should be gathered and interpreted, a lack of self-awareness about the factors that led to the judgments, and an organizational culture that failed to probe for weaknesses and explore alternatives. Evaluating the inherent tensions between the methods and aims of intelligence personnel and policymakers from a unique insider's perspective, Jervis forcefully criticizes recent proposals for improving the performance of the intelligence community and discusses ways in which future analysis can be improved.

*On Point* Gregory Fontenot, E. J. Degen, David Tohn, 2005 Den amerikanske hærs første officielle historiske beretning om operationerne i den anden Irakiske Krig, Operation Iraqi Freedom, (OIF). Fra forberedelserne, mobiliseringen, forlægningen af enhederne til indsættelsen af disse i kampene ved Talil og As Samawah, An Najaf og de afsluttende kampe ved Bagdad. Foruden en detaljeret gennemgang af de enkelte

kampenheder(Order of Battle), beskrives og analyseres udviklingen i anvendte våben og doktriner fra den første til den anden Golf Krig.

Disease Control Priorities in Developing Countries Dean T. Jamison,Joel G. Breman,Anthony R. Measham,George Alleyne,Mariam Claeson,David B. Evans,Prabhat Jha,Anne Mills,Philip Musgrove,2006-04-02 Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progress toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.

**The Future of Health Care in the Kurdistan Region--Iraq** Melinda Moore (M.D.),C. Ross Anthony,Yee-Wei Lim,2014 Examines the health care system in the Kurdistan Region of Iraq, with an emphasis on primary care, and discusses what strategies can be pursued to move toward a more effective and higher-quality health care system.

**The War Injured Child** Ghassan Soleiman Abu-Sittah,Jamal J. Hoballah,2023-05-29 Around 1 in 6 of the world's children live in a conflict zone, and of these 357 million children, 165 million are affected by high intensity conflicts. Pediatric war injuries pose a huge challenge to health professionals treating such patients. The evidence base on the quality and scale of this challenge is scarce, and the majority of clinicians treating these patients are either not sufficiently experienced in the treatment of war injuries, are not pediatric surgeons, or both. The majority of the evidence in the literature comes from a small subset of children who were managed in well-resourced military facilities that differ drastically from the conditions in which the majority of war wounded children are treated. This book - the first of its kind - is a comprehensive and state-of-the-art guide for both local and humanitarian non-pediatric specialists who are often forced to operate on and treat children with war injuries with little or no previous experience or training. It provides healthcare workers in conflict settings with knowledge and practical advice on the entire continuum of care, from point of injury, to treatment and reconstruction, to rehabilitation and mental health support. It is comprised of concise yet comprehensive overviews of the current status of the pediatric war casualty patient treatment and will help guide patient management based on evidence from the literature, clinical and surgical experience and ongoing research and will stimulate investigative efforts in this dynamic and active field of war medicine. The book draws on the knowledge and long experience of clinicians at the American University of Beirut Medical Center, one of the largest tertiary care and referral centers in the Middle East, which has been the foremost civilian academic hospital treating war injuries, both adult and pediatric, initially from the Lebanese war and then the Iraqi and Syrian wars.
