Alibaba Hong Shen, 2021-07-11 This book examines the political-economic dynamics in the development of a leading global Internet giant: Alibaba. As both a prominent example of, as well as providing the basic infrastructure for, China's outward expansion, Alibaba demonstrates the complex interplay between different state agencies and units of capital in the context of the rise of global China. Hong Shen investigates the development and expansions of Alibaba and discusses how Alibaba has not only become a leader of China's increasingly globalizing internet but has also increasingly served as a basic infrastructure model for other Chinese companies to go global. Shen also addresses how this process has been constantly shaped and reshaped by complex state-capital interactions along the way. This book shows how different units of capital, both inside and outside of China, have interacted with Alibaba's developmental strategies and illustrates how different state agencies, both domestic and international, have enabled or constrained the company's development, especially its global expansion. This book will appeal to students and scholars of critical political economy of media, global media and digital industries, communication, technology and society, and internet studies. Your Strategy Needs a Strategy Martin Reeves, Knut Haanaes, Janmejaya Kumar Sinha, 2015 What approach does your company use to develop and execute its strategy? We are confronted with a plethora of different approaches and frameworks which purport to answer this question from the classic Michael Porter approach to Kim and Mauborgne's blue ocean strategy to Steve Jobs' "build it and they will come" philosophy. The answer? There is no one approach that works for everyone but there is a best approach for your specific context. And it has never been more important to choose the right one: not only has the number of different approaches proliferated ten-fold over the past 40 years, but the environments in which executives must formulate and execute strategy have become increasingly diverse and complex. The difference between winning and losing has never been greater. And using the right approach pays off: firms that successfully match their approach to their environment realize significantly

better returns than those who don't. And, they avoid the common frustrations stemming from lack of perceived relevance and engagement around on the strategy process. How you choose and execute the right approach is the focus of this book. From Global BCG strategy experts Martin Reeves, Knut Haanæs, Janmejaya Sinha (and based on the bestselling article in Harvard Business Review), *Your Strategy Needs a Strategy* offers a practical guide to help you to match your approach to strategy to your environment and execute it effectively, to combine different approaches for companies which operate in multiple environments, and to lead your organization in making better strategic choices. Organizing approaches into five strategic archetypes Be Big, Be Fast, Be First, Be the Orchestrator, Be Viable the authors explain the conditions under which each is appropriate, when and how to execute each one, and how to avoid common strategy traps. They richly illustrate the idea with interviews with CEOs from different industries from around the globe. For anyone leading a business or charged with developing a winning strategy this book is for you. The world of strategy is thick with opposing ideas and frameworks; *Your Strategy Needs a Strategy* will help you cut through the noise and find clarity on which approach is your best bet.

Developing and Securing the Cloud Bhavani Thuraisingham, 2013-10-28 Although the use of cloud computing platforms and applications has expanded rapidly, most books on the subject focus on high-level concepts. There has long been a need for a book that provides detailed guidance on how to develop secure clouds. Filling this void, *Developing and Securing the Cloud* provides a comprehensive overview of cloud computing technology. Supplying step-by-step instruction on how to develop and secure cloud computing platforms and web services, it includes an easy-to-understand, basic-level overview of cloud computing and its supporting technologies. Presenting a framework for secure cloud computing development, the book describes supporting technologies for the cloud such as web services and security. It details the various layers of the cloud computing framework, including the virtual machine monitor and hypervisor, cloud data storage, cloud data management, and virtual network monitor. It also provides several examples of cloud products and prototypes, including private, public, and U.S. government clouds. Reviewing recent developments in cloud computing, the book illustrates the essential concepts, issues, and challenges in developing and securing today's cloud computing platforms and applications. It also examines prototypes built on experimental cloud computing systems that the author and her team have developed at the University of Texas at Dallas. This diverse reference is suitable for those in industry, government, and academia. Technologists will develop the understanding required to select the appropriate tools for particular cloud applications. Developers will discover alternative designs for cloud development, and managers will understand if it's best to build their own clouds or contract them out.

The End of Online Shopping Jongen Wijnand, 1999-01-05 Retail is going through difficult times and is suffering the consequences of both the economic crisis and the digitization of society. Fundamentally, there is a bigger problem: stores cannot keep up with the changing behavior of customers who are connected 24/7, customers for whom there is no distinction between online and offline. *The End of Online Shopping: The Future of New Retail in an Always Connected World* describes how the smart, the sharing, the circular, and the platform economy are shaping a

new era of always connected retail. Retailers urgently need to innovate if they want to stay relevant in a world dominated by marketplaces and sharing platforms. The book contains inspiring examples from different industries -- which include the usual suspects such as Amazon, Alibaba, and Google, but also local startups -- and covers all aspects of the customer journey, from orientation and selection to delivery. The End of Online Shopping provides an excellent overview of shopping trends and developments worldwide, and offers readers indispensable insights into the future of retail.

**Why Customers Would Rather Have a Smartphone than a Car** Cor Molenaar, 2016-03-03 Why Customers Would Rather Have a Smartphone than a Car explores some of the fundamental changes in consumer behaviour: Why do we buy less in shops and more on the internet? Why do we spend more on gadgets, smartphones and apps and not more on food, holidays or clothing? Why do most business people only look at symptoms and not the causes of changing customer behaviour? The new generation buys differently from the baby boomers; they have different priorities and preferences. The internet has changed us in the way we think, act and communicate. Whilst many retailers now understand the need for change, few of them have established convincing or sustainable models for the future. Cor Molenaar argues that by understanding the drivers behind these new consumer behaviours, retailers can identify the opportunities this represents and adapt their offering accordingly. The kind of relationship retailing he advocates involves the way the retailer interacts with their customer; the new environment that they need to sustain along with their ability to relate customer data, technology and new services. The author interweaves examples from traditional and virtual retailing with his research on consumer psychology and buying behaviour to offer a sophisticated and at times challenging guide for all those involved in retailing, as well as those responsible for planning and designing social and retail space.

**Islam and Capitalism in the Making of Modern Bahrain** Rajeswary Ampalavanar Brown, 2023-05-01 In recent decades, the culture, society, politics, and economics of Bahrain have been transformed, driving its global ambitions while retaining to a degree the rule of law and cosmopolitanism. Islam and Capitalism in the Making of Modern Bahrain examines the transformation of Bahrain from the 1930s, from a regional trading port and then an important oil producer into the financial hub for the Gulf and into a global centre of Islamic finance. It focuses on the

changes and tensions that transformation brought to Bahrain's political, legal, economic, religious, and social structures. In this book, Rajeswary Brown explores the rising force of youth populism driven by the persistence of poverty and unemployment, notably among rural Shi'ite communities and unemployed middle-class youth, as well as examining Bahrain's skillful reconciliation of the demands of Islamic faith, expressed in the Sharia, to the requirements of modern financial capitalism. In this, Bahrain's experience can be set against the modern history of much of the rest of the Middle East, most strikingly with respect to the position of Islamic charities, notably in Syria, comparisons of which are fully explored here.

**Making Money** Peet van Biljon,Alexandra Lajoux,2020-01-20 How much do you really know about money? Everyone uses it, but few know how it really works. Most books about money focus on specific aspects. This book breaks through the usual silos to present money as a broad social technology that serves the current needs of society. It reviews the latest developments in financial technology including cryptocurrency, blockchain, and the prospect of a cashless future; and clears up many misconceptions in the process. Starting with a very brief history, the authors provide insights on how money is made; why money has value and what can change its value; how central banks, treasuries, foreign exchange, lending, and blockchain work; why you may be trading against robots; and privacy and security issues in an increasingly cashless society that will change our lives. While written for a broad audience, this book is also essential reading for students entering courses in the area of business finance, or money and banking.
