Art in Anime Dani Cavallaro, 2011-12-14 Anime, hand-drawn or computer-animated Japanese cartoons, appears in television series, films, video, video games, and commercials, and represents most genres of fiction. This critical study explores anime's relationship with art from a twofold perspective. Drawing from categories as varied as romance, comedy, slice of life drama, science fiction, bildungsroman, and school drama, it examines anime's representation of characters pursuing diverse artistic activities and related aesthetic visions, focusing closely on the concepts of creativity, talent, expressivity and experimentation. Additionally, the analysis engages with anime's own artistry, proposing that those characters' endeavors provide metaphors for the aims and objectives pursued by anime itself as an evolving art form. The cross-cultural resonance of this work makes it relevant not only to anime fans and scholars, but also to those interested in the phenomenon of image-making.

The Fairy Tale and Anime Dani Cavallaro, 2014-01-10 Over the last few decades, anime has consistently come into fruitful contact with themes, images and symbols associated with the fairy tale tradition. This critical text focuses on the ways in which fundamental principles of the fairy tale tradition are deployed, and hence come to manifest themselves narratively and cinematographically, in anime. Topics covered include modes of storytelling, aesthetics, as well as dramatic, ethical, psychological and social considerations. Of particular interest is the way in which allegorical commentaries on cultural and historical issues are illustrated in anime.
