Architecturalized Asia Vimalin Rujivacharakul, H. Hazel Hahn, Ken Tadashi Oshima, Peter Christensen, 2013-11-01 How did terms like "Asia," "Eurasia," "Indochina," "Pacific Rim" or "Australasia" originate and evolve, and what are their connections to the built environment? In addressing this question, *Architecturalized Asia* bridges the fields of history and architecture by taking "Asia" as a discursive structure and cultural construct, whose spatial and ideological formation can be examined through the lenses of cartography, built environments, and visual narratives. The first section, on the study of architecture in Asia from the medieval through early modern periods, examines icons and symbols in maps as well as textual descriptions produced in Europe and Asia. The second section explores the establishment of the field of Asian architecture as well as the political and cultural imagining of "Asia" during the long nineteenth century, when "Asia" and its regions were redefined in the making of modern world maps mainly produced in Europe. The third section examines tangible structures produced in the twentieth century as legible documents of these notional constructions of Asia. In exploring the ways in which "Asia" has been drawn and framed both within and without the continent, this volume offers cutting-edge scholarship on architectural history, world history and the history of empires. Written by architectural historians and historians specializing in Asia and European empires, this unique volume addresses the connection between Asia and the world through the lenses of built environments and spatial conceptualizations. *Architecturalized Asia* will appeal to readers who are interested in Asian architecture, world architecture, Asian history, history of empires, and world history.

A Map of the World Jane Hamilton, 2010-12-15 NATIONAL BESTSELLER • From the author of the widely acclaimed *The Book of Ruth* comes a harrowing, heartbreaking drama about a rural American family and a disastrous event that forever changes their

lives. It takes a writer of rare power and discipline to carry off an achievement like *A Map of the World*. Hamilton proves here that she is one of the best. —*Newsweek* The Goodwins, Howard, Alice, and their little girls, Emma and Claire, live on a dairy farm in Wisconsin. Although suspiciously regarded by their neighbors as that hippie couple because of their well-educated, urban background, Howard and Alice believe they have found a source of emotional strength in the farm, he tending the barn while Alice works as a nurse in the local elementary school. But their peaceful life is shattered one day when a neighbor's two-year-old daughter drowns in the Goodwins' pond while under Alice's care. Tormented by the accident, Alice descends even further into darkness when she is accused of sexually abusing a student at the elementary school. Soon, Alice is arrested, incarcerated, and as good as convicted in the eyes of a suspicious community. As a child, Alice designed her own map of the world to find her bearings. Now, as an adult, she must find her way again, through a maze of lies, doubt and ill will. A vivid human drama of guilt and betrayal, *A Map of the World* chronicles the intricate geographies of the human heart and all its mysterious, uncharted terrain. The result is a piercing drama about family bonds and a disappearing rural American life.

The New Map of Asia (1900-1919) Herbert Adams
Gibbons, 1919

The Changing Map of Asia - A Political Geography W.

Gordon East, 2007-03 PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it

would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, - such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using

and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

Mapping the Chinese and Islamic Worlds Hyunhee

Park, 2012-08-27 Long before Vasco da Gama rounded the Cape of Good Hope en route to India, the peoples of Africa, the Middle East, and Asia engaged in vigorous cross-cultural exchanges across the Indian Ocean. This book focuses on the years 700 to 1500, a period when powerful dynasties governed both regions, to document the relationship between the Islamic and Chinese worlds before the arrival of the Europeans. Through a close analysis of the maps, geographic accounts, and travelogues compiled by both Chinese and Islamic writers, the book traces the development of major contacts between people in China and the Islamic world and explores their interactions on matters as varied as diplomacy, commerce, mutual understanding, world geography, navigation, shipbuilding, and scientific exploration. When the Mongols ruled both China and Iran in the thirteenth and fourteenth centuries, their geographic understanding of each other's society increased markedly. This rich, engaging, and pioneering study offers glimpses into the worlds of Asian geographers and mapmakers, whose accumulated wisdom underpinned the celebrated voyages of European explorers like Vasco da Gama.

East Asia in Old Maps Hiroshi Nakamura, 1964

The Japanese Buddhist World Map D. Max Moerman, 2021-12-31 From the fourteenth through the nineteenth centuries Japanese monks created hundreds of maps to construct and locate their place in a Buddhist world. This expansively illustrated volume is the first to explore the largely unknown archive of Japanese Buddhist world maps and analyze their production, reproduction, and reception. In examining these fascinating sources of visual and material culture, author D. Max Moerman argues for an alternative history of Japanese Buddhism—one that compels us to recognize the role of the Buddhist geographic imaginary in a culture that encompassed multiple cartographic and cosmological world views. The contents and contexts of Japanese Buddhist world maps reveal the ambivalent and shifting position of Japan in the Buddhist world, its encounter and negotiation with foreign ideas and technologies, and the possibilities for a global history of Buddhism and science. Moerman's visual and intellectual history traces the multiple trajectories of Japanese Buddhist world maps, beginning with the earliest extant Japanese map of the world: a painting by a fourteenth-century Japanese monk charting the cosmology and

geography of India and Central Asia based on an account written by a seventh-century Chinese pilgrim-monk. He goes on to discuss the cartographic inclusion and marginal position of Japan, the culture of the copy and the power of replication in Japanese Buddhism, and the transcultural processes of engagement and response to new visions of the world produced by Iberian Christians, Chinese Buddhists, and the Japanese maritime trade. Later chapters explore the transformations in the media and messages of Buddhist cartography in the age of print culture and in intellectual debates during the eighteenth and nineteenth centuries over cosmology and epistemology and the polemics of Buddhist science. The Japanese Buddhist World Map offers a wholly innovative picture of Japanese Buddhism that acknowledges the possibility of multiple and heterogeneous modernities and alternative visions of Japan and the world.

Chinese Maps Richard Joseph Smith, 1996 For nearly two thousand years the Chinese Emperor, self-proclaimed ruler of 'All under Heaven', demanded the obedience not only of his subjects within China but also of peoples throughout the known world. Maps played a crucial role in the administration of this vast system of states. Charts of foreign lands and images of the 'barbarians' that populated them presented the world as the Chinese wanted it to be seen: with the Middle Kingdom as lord and other states as vassals paying tribute to it. In this richly illustrated history, Richard J. Smith shows how the Chinese depicted foreign lands and peoples in maps and encyclopedias through the centuries. He discusses the debates surrounding the production of maps, as well as their technical aspects and political, military and administrative uses. Reproductions of many of the most beautiful and noteworthy maps of the Chinese world accompany the text. More than simple reflections of the lands and peoples they depict, these maps and illustrations are documents that reveal the evolving values of the grand and powerful society that produced them

Early Mapping of Southeast Asia Thomas

Suarez,2012-08-07 With dozens of rare color maps and other documents, Early Mapping of Southeast Asia follows the story of map-making, exploration and colonization in Asia from the 16th to the 19th centuries. It documents the idea of Southeast Asia as a geographical and cosmological construct, from the earliest of times up until the dawn of the modern era. Using maps, itineraries, sailing instructions, traveler's tales, religious texts and other contemporary sources, it examines the representation of Southeast Asia, both from the historical perspective of Western exploration and cartography, and also through the eyes of Asian neighbors. Southeast Asia has always occupied a special place in the imaginations of East and West. This book recounts the fascinating story of how Southeast Asia was, quite literally, put on the map, both in cartographic terms and as a literary and imaginative concept.
