Architecturalized Asia Vimalin Rujivacharakul,H. Hazel Hahn,Ken Tadashi Oshima,Peter Christensen,2013-11-01 How did terms like “Asia,” “Eurasia,” “Indochina,” “Pacific Rim” or “Australasia” originate and evolve, and what are their connections to the built environment? In addressing this question,Architecturalized Asia bridges the fields of history and architecture by taking “Asia” as a discursive structure and cultural construct, whose spatial and ideological formation can be examined through the lenses of cartography, built environments, and visual narratives. The first section, on the study of architecture in Asia from the medieval through early modern periods, examines icons and symbols in maps as well as textual descriptions produced in Europe and Asia. The second section explores the establishment of the field of Asian architecture as well as the political and cultural imagining of “Asia” during the long nineteenth century, when “Asia” and its regions were redefined in the making of modern world maps mainly produced in Europe. The third section examines tangible structures produced in the twentieth century as legible documents of these notional constructions of Asia. In exploring the ways in which “Asia” has been drawn and framed both within and without the continent, this volume offers cutting-edge scholarship on architectural history, world history and the history of empires. Written by architectural historians and historians specializing in Asia and European empires, this unique volume addresses the connection between Asia and the world through the lenses of built environments and spatial conceptualizations. Architecturalized Asia will appeal to readers who are interested in Asian architecture, world architecture, Asian history, history of empires, and world history.

The Changing Map of Asia - A Political Geography W. Gordon East,2007-03 PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

A Map of the World Jane Hamilton,2010-12-15 NATIONAL BESTSELLER • From the author of the widely acclaimed The Book of Ruth comes a harrowing, heartbreaking drama about a rural American family and a disastrous event that forever changes their lives. It takes a writer of rare power and discipline to carry off an achievement like A Map of the World. Hamilton proves here that she is one of the best. —Newsweek The Goodwins, Howard, Alice, and their little girls, Emma and Claire, live on a dairy farm in Wisconsin. Although suspiciously regarded by their neighbors as that hippie couple because of their well-educated, urban background, Howard and Alice believe they have found a source of emotional strength in the farm, he tending the barn while Alice works as a nurse in the local elementary school. But their peaceful life is shattered one day when a neighbor's two-year-old daughter drowns in the Goodwins' pond while under Alice's care. Tormented by the accident, Alice descends even further into darkness when she is accused of sexually abusing a student at the elementary school. Soon, Alice is arrested, incarcerated, and as good as convicted in the eyes of a suspicious community. As a child, Alice designed her own map of the world to find her bearings. Now, as an adult, she must find her way again, through a maze of lies, doubt and ill will. A vivid human drama of guilt and betrayal, A Map of the World chronicles the intricate geographies of the human heart and all its mysterious, uncharted terrain. The result is a piercing drama about family bonds and a disappearing rural American life.

Early Maps of South-East Asia R. T. Fell,1988

Remapping the World in East Asia Mario Cams,Elke Papelitzky,2024-02-29 When European missionaries arrived in East Asia in the sixteenth century, they entered ongoing conversations about cosmology and world geography. Soon after, intellectuals in Ming China, Edo Japan, and Joseon Korea selectively encompassed elements of the late Renaissance worldview, leading to the creation of new artifacts that mitigated old and new knowledge in creative ways. Simultaneously, missionaries and their collaborators transcribed, replicated, and recombined from East Asian artifacts and

informed European audiences about the newly discovered lands known as the “Far East.” All these new artifacts enjoyed long afterlives that ensured the continuous remapping of the world in the following decades and centuries. Focusing on artifacts, this expansively illustrated volume tells the story of a meeting of worldviews. Tracing the connections emanating from each artifact, the authors illuminate how every map, globe, or book was shaped by the intellectual, social, and material cultures of East Asia, while connecting multiple global centers of learning and print culture. Crossing both historical and historiographical boundaries reveals how this series of artifacts embody a continuous and globally connected process of mapping the world, rather than a grand encounter between East and West. As such, this book rewrites the narrative surrounding the so-called “Ricci Maps,” which assumes that one Jesuit missionary brought scientific cartography to East Asia by translating and adapting a Renaissance world map. It argues for a revision of that narrative by emphasizing process and connectivity, displacing the European missionary and “his map” as central actors that supposedly bridged a formidable civilizational divide between Europe and China. Rather than a single map authored by a European missionary, a series of materially different artifacts were created as a result of discussions between the Jesuit Matteo Ricci and his Chinese contacts during the last decades of Ming rule. Each of these gave rise to the production of new artifacts that embodied broader intellectual conversations. By presenting eleven original chapters by Asian, European, and American scholars, this work covers an extensive range of artifacts and crosses boundaries between China, Japan, Korea, and the global pathways that connected them to the other end of the Eurasian landmass.

New World Secrets on Ancient Asian Maps Charlotte Harris Rees,2014-07-02 Charlotte Harris Rees is an independent researcher, a retired federal employee, and an honors graduate of Columbia International University. She has diligently studied the possibility of very early arrival of Chinese to America. In 2003 Rees and her brother took the Harris Map Collection to the Library of Congress where it remained for three years while being studied. In 2006 she published an abridged version of her father's, The Asiatic Fathers of America: Chinese Discovery and Colonization of Ancient America. Her Secret Maps of the Ancient World came out in 2008. In 2011 she released Chinese Sailed to America Before Columbus: More Secrets from the Dr. Hendon M. Harris, Jr. Map Collection. In 2013 she published Did Ancient chinese Explore America? Her books are listed by World Confederation of Institutes and Libraries for Chinese Overseas Studies.

Reimagining the Globe and Cultural Exchange: The East Asian Legacies of Matteo Ricci's World Map Laura Hostetler,2024-02-06 How did Asia come to be represented on European World maps? When and how did Asian Countries adopt a continental system for understanding the world? How did countries with disparate mapping traditions come to share a basic understanding and vision of the globe? This series of essays organized into sections on Jesuit Circuits of Communication and Publication; Jesuit World Maps in Chinese; Reverberations of Matteo Ricci's Maps in East Asia; and Reflections on the Curation of Cartographic Knowledge, go a long way toward answering these questions about the shaping of our modern understandings of the world.

China at the Center M. Antoni J. Ucerler,Theodore N. Foss,Mark Stephen Mir,2016-03-01 China at the Center focuses on two masterpieces of seventeenth-century map-making that illustrate the exchange of information (and misinformation) between Europe and Asia. The world maps created by Jesuit priests Matteo Ricci (1602) and Ferdinand Verbiest (1674) for the Chinese courts tell fascinating stories about the meeting of two worldviews. They provided Europeans with greater knowledge of China and the Chinese with new ideas about geography, astronomy, and the natural sciences. The maps also show the ways that certain myths were perpetuated, especially as seen in the vivid and imaginative descriptions of the peoples and places of the world and in their depictions of exotic fauna.
