   Global Mobile Media Gerard Goggin,2010-10-18 Gerard Goggin has produced an incisive and penetrating overview of the world according to mobiles. Covering sight, sound and status, plus a host of other issues, he provides a provocative analysis of how mobile communication gadgets come to play such a prominent role in our lives. Any scholar of New Media will want to read this book — James Katz, Department of Communication, Rutgers University, USA With billions of users worldwide, the cell phone is not only a successful communications technology; it is also key to the future of media. Global Mobile Media offers an overview of the complex topic of mobile media, looking at the emerging industry structures, new media economies, mobile media cultures and network politics of cell phones as they move centre-stage in media industries. The development, adoption and significance of cell phones for society and culture have been registered in a growing body of work. Where existing books have focused on communication, and on the social and cultural aspects of mobile media, Global Mobile Media looks at the media dimensions. Goggin provides a pioneering yet measured evaluation of how cell phone corporations, media interests, users and policy makers are together shaping a

new media dispensation. Global Mobile Media successfully places new mobile media historically, socially and culturally in a wider field of portable media technologies through extensive case studies, including: the rise of smartphones, with a detailed discussion of the Apple iPhone and how it has catalysed a new phase in convergent media, audiences and innovation the new agenda in cultural politics and media policy, featuring topics such as iPhone apps and control, mobile commons, and open mobile networks a succinct map of the political economy of mobile media, identifying key players, patterns of ownership and control, institutions, and issues a critical account of cell phones' involvement in and contribution to much-discussed new forms of production and consumption, such as user-generated content, p2p networks, open and free source software networks an anatomy of how cell phones relate to other online media, particularly the Internet and wireless technologies. Global Mobile Media is an engaging, accessible text which will be of immense interest to upper-level undergraduates, postgraduates and researchers in Communication Studies, Cultural Studies and Media Studies, as well as those taking New Media courses.

  <u>Smartphones</u> Mohammad Ilyas,Syed A. Ahson,2006 Analyzing the new technology of Smartphones in great detail, this guide discusses relevant reference solutions, the role of middleware on related operating systems, and how cell phone vendors consequently confront this growing challenge. A very detailed and cogent perspective on the world of Smartphones, the report examines its

vast feature sets, reveals its impact on other leading technologies and companies, and supplies extensive case studies on how Smartphones enhance user productivity and encourage deployment of user applications.

The Technology of Video and Audio Streaming David Austerberry,2013-07-24 * Learn the end-to-end process, starting with capture from a video or audio source through to the consumer's media player * A quick-start guide to streaming media technologies * How to monetize content and protect revenue with digital rights management For broadcasters, web developers, project managers implementing streaming media systems, David Austerberry shows how to

deploy the technology on your site, from video and audio capture through to the consumer's media player. The book first deals with Internet basics and gives a thorough coverage of telecommunications networks and the last mile to the home. Video and audio formats are covered, as well as compression standards including Windows Media and MPEG-4. The book then guides you through the streaming process, showing in-depth how to encode audio and video. The deployment of media servers, live webcasting and how the stream is displayed by the consumer's media player are also covered. A final section on associated technologies illustrates how you can protect your revenue sources with digital rights management, looks at content delivery networks and provides examples of successful streaming applications. The supporting website, www.davidausterberry.com/streaming.html, offers updated links to sources of information, manufacturers and suppliers. David Austerberry is co-owner of the new media communications consultancy, Informed Sauce. He has worked with streaming media since the late nineties. Before that, he has been product manager for a number of broadcast equipment manufacturers, and formerly had many years with a leading broadcaster.
