Introduction to WhatsApp Gilad James, PhD, WhatsApp is a popular mobile application that was founded in 2009 by Jan Koum and Brian Acton. The app allows users to send text messages and voice messages, make voice and video calls, share images, documents, user locations, and other media. In addition

to personal messaging, WhatsApp also offers a range of features for businesses, including WhatsApp Business, which allows small businesses to communicate with their customers and share updates over the app. WhatsApp has grown to become one of the most widely used messaging apps in the world, with over 2 billion active users across 180 countries. WhatsApp makes use of end-to-end encryption to ensure that only the sender and recipient of a message can access its contents. The company has been praised for its commitment to user privacy, although it has also faced scrutiny over its handling of false information and its role in facilitating political unrest. Nevertheless, the app remains a vital tool for communication and connection, particularly in countries where other messaging apps are restricted or banned. Its continued popularity is a testament to the users' trust in its security and reliability.

   Global Perspectives on the Difficulties and Opportunities Faced by Migrant and Refugee Students in Higher Education Saeed, Sameerah Tawfeeq,Zhang, Min,2023-06-12 Higher education has been a source of opportunity and achievement for migrants and refugees around the world. It has provided them

with the tools and knowledge to pursue careers and build lives in their new communities, but it has also made them targets for discrimination. Colleges and universities are often ill-equipped to address the unique educational needs of their diverse student populations, and many times, the very institution that was meant to be a safe haven for them becomes their greatest barrier to success. Today, we are witnessing a crisis of higher education for migrants and refugees. Global Perspectives on the Difficulties and Opportunities Faced by Migrant and Refugee Students in Higher Education focuses on the formal and informal educational opportunities that are available to migrant students, as well as the barriers that prevent them from fully accessing these opportunities. The book also discusses how the experiences of migrant and refugee students in higher education have evolved and the impact that this evolution has had on their educational experiences. Finally, the book considers the ways in which higher education institutions have responded to the educational needs of migrant and refugee students and the role that the education industry has played in this response both formally and informally. Covering key topics such as immigration, educational needs, and displaced students, this premier reference source is ideal for administrators, policymakers, scholars, researchers, academicians, practitioners, instructors, and students.

ECEL 2020 19th European Conference on e-Learning Prof. Dr.-Ing. Carsten Busc,,Prof. Dr. Tilo Wendler,Martin Steinicke,2020-10-29

STEM Teachers and Teaching in the Digital Era Yifat Ben-David Kolikant,Dragana Martinovic,Marina Milner-Bolotin,2020-02-20 This book brings together researchers from Israel and Canada to discuss the challenges today's teachers and teacher-educators face in their practice. There is a growing expectation that the 21st century STEM teachers re-examine their teaching philosophies and adjust their practices to reflect the increasing role of digital technologies. This expectation presents a significant challenge to teachers, who are often asked to implement novel technology-rich pedagogies they did not have a chance to experience as students or become comfortable with. To exacerbate this challenge, the 21st century teachers function not only in a frequently-changing educational reality manifested by continuous

reforms, but are also bombarded by often contradictory and competing demands from the legislators, administrators, parents, and students. How do we break the vicious circle of reforms and support STEM teachers in making a real change in student learning? This book is unique for at least three reasons. First, it showcases research situated in Israel and Canada that examines the challenges today's teachers and teacher-educators face in their practice. While the governments of both countries emphasize STEM education, their approaches are different and thus provide for interesting comparisons. Second, in addition to including research-based chapters, prominent scholars discuss the contributions in each of the book sections, problematizing the issues from a global perspective. Third, technology has a potential to empower teachers in this era of change, and this book provides the unique insights from each country, while allowing for comparisons, discussing solutions, and asking new questions. This book will be of interest to all involved in STEM teacher education programs or graduate programs in education, as well as to educational administrators interested in implementing technology in their schools.

  Guide on digital agricultural extension and advisory services Food and Agriculture Organization of the United Nations,2023-03-30 Digital agricultural extension and advisory services (AEAS) have a great potential to enhance accessibility, delivery, transparency, scope and impacts of information and services for smallholder farmers. However, this potential is

often unfully harnessed and the benefits of digital AEAS unequally distributed due to an evident, widening digital divide between rural and urban areas, gender, and different social groups both within and among regions. Due to low-level e-literacy and digital skills, particularly smallholder farmers in rural areas in developing countries have limited access to and utilization of digital AEAS. Considering the above-mentioned benefits of digital AEAS, their poor uptake by smallholder farmers, and the importance of digital empowerment of smallholder farmers in particular, this guide, targeting smallholder farmers in need of digital AEAS as its principal users, provides a set of tools to enhance their digital skills in terms of basic knowledge and skills on using digital tools, methods of access to digital AEAS, methods of access to e-commerce, and capacity building.
