**I Was a Teenage Movie Maker** Don Glut, 2007-06-18

In 1953, a nine-year-old boy watched a prehistoric film called *Beast From 20,000 Fathoms* featuring the special effect magic of Ray Harryhausen. Enthralled by the movie but unsatisfied with what was available for at-home movie consumption, he decided to make his own science fiction thriller from dinosaurs to superheroes. This volume takes a firsthand look at the movie-making career of Don Glut. Beginning with his first movie, *Diplodocus At Large*, at age nine, it explores Glut's various attempts and the increasingly creative processes he used to bring his vision to life. Through the course of the work, Glut discusses his filmmaking experiences at the University of Southern California; the inspiration he received (and gave) through fanzines such as *Famous Monsters of Filmland* and *Castle of Frankenstein*; and the interest which his movies still generate. Films discussed include *The Earth Before Man*, *Spy Smasher vs. the Purple Monster*, *Dinosaur Valley Girls*, and *Frankenstein Meets Dracula*. A chronological filmography lists each of Glut's 41 films with notes regarding cast and a brief synopsis.

**Elinor Glyn as Novelist, Moviemaker, Glamour Icon and Businesswoman** Vincent L. Barnett, Alexis Weedon, 2016-04-29 The first full-length study of the authorial and cross-media practices of the English novelist Elinor Glyn (1864-1943), *Elinor Glyn as Novelist, Moviemaker, Glamour Icon and*

Businesswoman examines Glyn's work as a novelist in the United Kingdom followed by her success in Hollywood where she adapted her popular romantic novels into films. Making extensive use of newly available archival materials, Vincent L. Barnett and Alexis Weedon explore Glyn's experiences from multiple perspectives, including the artistic, legal and financial aspects of the adaptation process. At the same time, they document Glyn's personal and professional relationships with a number of prominent individuals in the Hollywood studio system, including Louis B. Mayer and Irving Thalberg. The authors contextualize Glyn's involvement in scenario-writing in relationship to other novelists in Hollywood, such as Edgar Wallace and Arnold Bennett, and also show how Glyn worked across Europe and America to transform her stories into other forms of media such as plays and movies. Providing a new perspective from which to understand the historical development of both British and American media industries in the first half of the twentieth century, this book will appeal to historians working in the fields of cultural and film studies, publishing and business history.

**S. Sylvan Simon, Moviemaker** David C. Tucker, 2021-01-29 He was Red Skelton's favorite director, and mentored Lucille Ball in the art of physical comedy. In his 15-year Hollywood career, S. Sylvan Simon (1910-1951) directed and/or produced more than 40 films, with stars like Lana Turner, Abbott and Costello, and Wallace Beery. Though he loved to make moviegoers laugh, he demonstrated his versatility with murder mysteries, war stories, and musicals. After a decade at MGM, he moved to Columbia, where he produced his own projects, including the Western melodrama *Lust for Gold*, and popular slapstick comedies like *The Fuller Brush Girl*. As head of production, reporting to irascible Harry Cohn, he

produced the award-winning *Born Yesterday*, and was working on *From Here to Eternity* when his life ended tragically at the age of 41. This first-ever account of Simon's life and career draws on interviews with family and colleagues, genealogical records, archival materials, and his own annotated scripts to tell the story of a stage-struck boy from Pittsburgh whose talent and tenacity made him a Hollywood success. The filmography provides production histories, critical commentary, and excerpts from published reviews. An appendix covers books written or edited by Simon, including his anthologized plays for amateur groups.

**After the Software Wars** Keith Curtis,2009  
Computers are an advancement whose importance is comparable to the invention of the wheel or movable type. While computers and the Internet have already changed many aspects of our lives, we still live in the dark ages of computing because

proprietary software is still the dominant model. One might say that the richest alchemist who ever lived is my former boss, Bill Gates. (Oracle founder Larry Ellison, and Google co-founders Sergey Brin and Larry Page are close behind.) Human knowledge increasingly exists in digital form, so building new and better models requires the software to be improved. People can only share ideas when they also share the software to display and modify them. It is the expanded use of free software that will allow a greater ability for people to work together and increase the pace of progress. This book will demonstrate that a system where anyone can edit, share, and review the body of work will lead not just to something that works, but eventually to the best that the world can achieve! With better cooperation among our scientists, robot-driven cars is just one of the many inventions that will arrive -- pervasive robotics, artificial intelligence, and much faster progress in biology, all of which rely heavily on software. - Publisher.
