Personal Relationships and Intimacy in the Age of Social Media Cristina Miguel,2018-11-11 This book examines how intimate relationships are built, negotiated and maintained through social media. The study takes a cross-platform approach, analysing three social media platforms of different genres – Badoo, Couchsurfing and Facebook – and exploring two interactive forces that shape the way people communicate through social media: the platforms' architecture and policies, and actual practises of use. Combining analysis of the political economy of social media with users' perspectives of their own practises – as well as exploring the tensions between the two – the book provides a detailed picture of intimacy as a complex structure of continuity and change.

Rethinking Romantic Love Begonya Enguix, Jordi Roca, 2016-11-14 This volume is the result of a thorough exploration of contemporary conceptions of romantic love from different points of view. Beginning with an initial text where the meanings of romantic love are discussed theoretically and historically, the contributions gathered here present current discussions about love in the present day and in different geographical contexts that range from Hungary to Italy or Spain. The first part of the book is devoted to the analysis of mobilities for the sake of love as a result of globalization. These mobilities are analysed in relation to love ideals, to gender equality and to online searches for the ideal partners. The second part of the book deals with the exploration of different imaginaries of love in particular geographical contexts. The topics dealt with here include love as sickness, love and violence, love ideals for men engaged in gender equality and love ideals for those who engage in cross-dressing practices. In the third part, writing about and for love is addressed. Love writings to the beloved dead, teenage girls' blogs and bestsellers such as *Fifty Shades of Grey* are discussed in particular detail. This book addresses current conceptions of romantic love in different social groups through different practices and in different countries, and shows that, despite the variability of discourses, experiences and practices related to love, a number of ideas of what love should be like – related to the Western ideals of romantic love – persist in all these contexts. The contributions to this volume are derived from extensive fieldwork and ethnographic research, and will be of undoubted interest for the academic milieu. However, given the topic it deals with, the book will also appeal to the general public, who will find in these pages many 'love stories' derived from the detailed study of the society which we inhabit and the ideals of love that we breathe.

Facebook Nation Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness – a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

Mind Change Susan Greenfield, 2015-02-10 We live in a world unimaginable only decades ago: a domain of backlit screens, instant information, and vibrant experiences that can outcompete dreary reality. Our brave new technologies offer incredible opportunities for work and play. But at what price? Now renowned neuroscientist Susan Greenfield--known in the United Kingdom for challenging entrenched conventional views--brings together a range of scientific studies, news events, and cultural criticism to create an incisive snapshot of "the global now." Disputing the assumption that our technologies are harmless tools, Greenfield explores whether incessant exposure

to social media sites, search engines, and videogames is capable of rewiring our brains, and whether the minds of people born before and after the advent of the Internet differ. Stressing the impact on Digital Natives—those who’ve never known a world without the Internet—Greenfield exposes how neuronal networking may be affected by unprecedented bombardments of audiovisual stimuli, how gaming can shape a chemical landscape in the brain similar to that in gambling addicts, how surfing the Net risks placing a premium on information rather than on deep knowledge and understanding, and how excessive use of social networking sites limits the maturation of empathy and identity. But *Mind Change* also delves into the potential benefits of our digital lifestyle. Sifting through the cocktail of not only threat but opportunity these technologies afford, Greenfield explores how gaming enhances vision and motor control, how touch tablets aid students with developmental disabilities, and how political “clicktivism” foment positive change. In a world where adults spend ten hours a day online, and where tablets are the common means by which children learn and play, *Mind Change* reveals as never before the complex physiological, social, and cultural ramifications of living in the digital age. A book that will be to the Internet what *An Inconvenient Truth* was to global warming, *Mind Change* is provocative, alarming, and a call to action to ensure a future in which technology fosters—not frustrates—deep thinking, creativity, and true fulfillment. Praise for *Mind Change* “Greenfield’s application of the mismatch between human and machine to the brain introduces an important variation on this pervasive view of technology. . . . She has a rare talent for explaining science in accessible prose.”—*The Washington Post* “Greenfield’s focus is on bringing to light the implications of Internet-induced ‘mind change’—as comparably multifaceted as the issue of climate change, she argues, and just as important.”—*Chicago Tribune* “*Mind Change* is exceedingly well organized and hits the right balance between academic and provocative.”—*Booklist* “[A] challenging, stimulating perspective from an informed neuroscientist on a complex, fast-moving, hugely consequential field.”—*Kirkus Reviews* “[Greenfield] is not just an engaging communicator but a thoughtful, responsible scientist, and the arguments she makes are well-supported and persuasive.”—*Mail on Sunday* “Greenfield’s admirable goal to prove an empirical basis for discussion is . . . an important one.”—*Financial Times* “An important presentation of an uncomfortable minority position.”—Jaron Lanier, *Nature*
